Developer's Digital Media Reference Curtis Poole,Janette Bradley,2013-04-26 Designed for media professionals working across a broad range of formats, Developer's Digital Media Reference is an excellent reference guide for those keeping pace with this dynamic industry. As convergence between the World Wide Web, multimedia, and television production communities continues, there is an increased demand for professionals to familiarize themselves with the many new delivery contexts, including hybrid DVD (where digital video content and computer data live on the same disc), interactive TV, and streaming media. Developer's Digital Media Reference covers essential technologies such as SVG (scalable vector graphics), SMIL (Synchronized Multimedia Integration Language, a markup language for creating animations on the web), MPEG-4 (compression standard for streaming audio/video), and Dynamic Web Applications. In addition to serving as a quick-look-up guide, this text is organized to explain today's major media: server-based architectures, disc-based architectures, distribution architectures, and merging/shared architectures. Each topic is discussed in terms of the technological background-evolution, current tools, and production tips and techniques.

Sustainable Data from Digital Fieldwork Linda Barwick,Nicholas Thieberger,2006 Academic fieldwork data collections are often unique and unrepeatable records of highly significant events collected at considerable expense of researcher time, effort and resources. While fieldworkers have been quick to take advantage of digital technologies to enable them to collect and organise their data, standards and workflows are only now beginning to emerge to assist researchers to submit their data for archiving and access. This collection of refereed papers from the conference of the same name held at the University of Sydney in December 2006 provides a record of recent research practice by fieldworkers in linguistics, botany and anthropology, and by archive and repository managers.
