**1215** Danny Danziger, John Gillingham, 2004 Danziger sweeps readers back eight centuries in an absorbing portrait of life at a time that saw the Crusades, Richard the Lionheart and the legendary Robin Hood all make their marks in history. At the center of this period is the document that has become the capstone of modern freedom: The Magna Carta.

**U-1215** Eric Marcelo, 2023-04-17 It is 1944 and Germany is losing the Battle of the Atlantic. The Allied convoys are getting through and, soon, the Allies will be able to mount an assault on Occupied Europe. U-1215 is a new and secret German submarine, so secret that even Hitler doesn't know it

exists. She is fast, silent, and deadly...and nuclear powered.

**Colonial England, 1066-1215** J. C. Holt, 1997-07-01 The process of colonization that followed the  
Norman Conquest defined much of the history of England over the next 150 years, structurally altering  
the distribution of land and power in society. The author's subjects include Domesday Book, the  
establishment of knight-service, aristocratic structures and nomenclature, the relation of family to  
property, and security of title and inheritance. He comments on the work of Maitland, Round and  
Stenton and ends with studies of the treaty of Winchester (1153), the casus regis and Magna Carta.

**Aware** Daniel J. Siegel, M.D.,2019-10-17 The Science and Practice of Meditation Practical instruction for mastering The Wheel of Awareness, a life-changing tool for cultivating more focus, presence and peace in one's day-to-day life. An in-depth look at the science that underlies meditation's effectiveness, Aware teaches readers how to harness the power of the principle: Where attention goes, neural firing flows, and neural connection grows. The author reveals how developing The Wheel of Awareness practice to focus attention, open awareness, and cultivate kind intention can literally help you grow a healthier brain and reduce fear, anxiety, and stress in your life. Whether you have no experience with a reflective practice or are an experienced practitioner, this book is a hands-

on guide that will enable you to become more focused and present as well as more energized and emotionally resilient in the face of stress and the everyday challenges life throws your way. Daniel J. Siegel, M.D. is a New York Times bestselling author. He received his medical degree from Harvard University and completed his postgraduate medical education at UCLA, where he is currently a clinical professor.

**The Church and Vale of Evesham, 700–1215** D. C. Cox, 2015 In c.701, a minster was founded in the lower Avon Valley on a deserted promontory called Evesham. Over the next five hundred years it became a Benedictine abbey and turned the Vale of Evesham into a federation of Christian communities. A landscape of scattered farms grew into one of open fields and villages, manor houses and chapels. Evesham itself developed into a town, and the abbots played a role in the affairs of the kingdom. But individual contemplation and prayer within the abbey were compromised by its corporate aspirations. As Evesham abbey waxed ever grander, exerting a national influence, it became a ready patron of the arts but had less time for private spirituality. The story ends badly in the prolonged

scandal of Abbot Norreis, a libertine whose appetites caused religion to collapse at Evesham before his own sudden downfall. This book integrates the evidence of archaeology, maps, and documents in a continuous narrative that pays as much attention to religious and cultural life as to institutional and economic matters. It provides a complete survey over one of the most important and wealthy Benedictine abbeys and its landscape, a stage on which was enacted the tense interplay of lordship and prayer.--Back cover.

**Marriage Litigation in the Western Church, 1215–1517** Wolfgang P. Müller, 2021-09-16 From the establishment of a coherent doctrine on sacramental marriage to the eve of the Reformation, late medieval church courts were used for marriage cases in a variety of ways. Ranging widely across Western Europe, including the Upper and Lower Rhine regions, England, Italy, Catalonia, and Castile, this study explores the stark discrepancies in practice between the North of Europe and the South. Wolfgang P. Müller draws attention to the existence of public penitential proceedings in the North and their absence in the South, and explains the difference in demand, as well as highlighting variations in

how individuals obtained written documentation of their marital status. Integrating legal and theological perspectives on marriage with late medieval social history, Müller addresses critical questions around the relationship between the church and medieval marriage, and what this reveals about both institutions.

Improving Situational Awareness for First Responders Via Mobile Computing Bradley J. Betts, 2005

This project looks to improve first responder situational awareness using mobile computing techniques. The prototype system combines wireless communication, real-time location determination, digital imaging, and three-dimensional graphics. Responder locations are tracked in an outdoor environment via GPS and uploaded to a central server via GPRS or an 802.11 network. Responders can also wirelessly share digital images and text reports, both with other responders and with the incident commander. A pre-built three dimensional graphics model of the emergency scene is used to visualize responder and report locations. Responders have a choice of information end points, ranging from programmable cellular phones to tablet computers. The system also employs location-aware

computing to make responders aware of particular hazards as they approach them. The prototype was developed in conjunction with the NASA Ames Disaster Assistance and Rescue Team and has undergone field testing during responder exercises at NASA Ames.

**The Western church from A.D. 450 to A.D. 1215** Oscar Daniel Watkins, 1920

On Becoming Aware Natalie Depraz, Francisco J. Varela, Pierre Vermersch, 2003 This book searches for the sources and means for a disciplined practical approach to exploring human experience. The spirit of this book is pragmatic and relies on a Husserlian phenomenology primarily

understood as a method of exploring our experience. The authors do not aim at a neo-Kantian a priori 'new theory' of experience but instead they describe a concrete activity: how we examine what we live through, how we become aware of our own mental life. The range of experiences of which we can become aware is vast: all the normal dimensions of human life (perception, motion, memory, imagination, speech, everyday social interactions), cognitive events that can be precisely defined as tasks in laboratory experiments (e.g., a protocol for visual attention), but also manifestations of mental life more fraught with meaning (dreaming, intense emotions, social tensions, altered states of consciousness). The central assertion in this work is that this immanent ability is habitually ignored or at best practiced unsystematically, that is to say, blindly. Exploring human experience amounts to developing and cultivating this basic ability through specific training. Only a hands-on, non-dogmatic approach can lead to progress, and that is what animates this book. (Series B)
