Public Private Partnerships Robert M. Clark, Simon Hakim, 2019-10-18 This book discusses Public-Private Partnerships (PPPs) and their potential to protect and maintain critical infrastructure in a variety of global governmental settings. Critical infrastructure is defined as essential services that underpin and support the backbone of a nation's economy, security, and health. These services include the power used by homes and businesses, drinking water, transportation, stores and shops, and communications. As governmental budgets dwindle, the maintenance of critical infrastructure and the delivery of its related services are often strained. PPPs have the potential to fill the void between government accounting and capital budgeting. This volume provides a survey of PPPs in critical infrastructure, combining theory and case studies to provide a comprehensive view of possible applications. Written by a diverse group of international experts, the chapters detail PPPs across industries such as transportation, social infrastructure, healthcare, emergency services, and water across municipalities from the US to New Zealand to Hong Kong. Chapters discuss objectives and legal requirements associated with PPPs, the potential advantages and limitations of PPPs, and provide guidance as to how to structure a successful PPP for infrastructure investment. This book is of interest to researchers studying public administration, public finance, and infrastructure as well as practitioners and decision makers interested in instituting PPPs in their communities.

Unlocking Africa's Business Potential Landry Signé, 2020-04-07 Africa welcomes business investment and offers some of the world's highest returns and impacts Africa has tremendous economic potential and offers rewarding opportunities for global businesses looking for new markets and long-term investments with favorable returns. Africa has been one of the world's fastest-growing regions over the past decade, and by 2030 will be home to nearly 1.7 billion people and an estimated \$6.7 trillion worth of consumer and business spending. Increased political stability in recent years and improving regional integration are making market access easier, and business expansion will generate jobs for women and youth, who represent the vast majority of the population. Current economic growth and poverty-alleviation efforts mean that more than 43 percent of the continent's people will reach middle- or upper-class status by 2030. *Unlocking Africa's Business Potential* examines business opportunities in the eight sectors with the highest potential returns on private investment—the same sectors that will foster economic growth and diversification, job creation, and improved general welfare. These sectors include: consumer markets, agriculture and agriprocessing, information and communication technology, manufacturing, oil and gas, tourism, banking, and infrastructure and construction. The book's analysis of these sectors is based on case studies that identify specific opportunities for investment and growth, along with long-term market projections to inform decision-making. The book identifies potential risks to business and offers mitigation strategies. It also provides policymakers with solutions to attract new business investments, including how to remove barriers to business and accelerate development of the private sector.

The Sustainable City VII M. Pacetti, G. Passerini, C.A. Brebbia, G. Latini, 2012-05-07 Containing research on sustainable urban redevelopment presented at the latest in a biennial series organised by the Wessex Institute of Technology, this book addresses an area of growing interest. The conference series was first held in 2000. These proceedings are split into two volumes. All these problems, which continue to grow in our society, require the development of new solutions. Topics include: Volume I – Urban Strategies; Eco-town Planning; Planning, development and management; Planning, development and management for urban conservation and regeneration; Case studies; Landscape planning and design; Environmental management; Intelligent environments and emerging technologies. Cities, Networks, and Global Environmental Governance Sofie Bouteligier, 2013 As a result of global dynamics—the increasing interconnection of people and places—innovations in global environmental governance have altered the role of cities in shaping the future of the planet. This book is a timely study of the importance of these social transformations in our increasingly global and increasingly urban world. Through analysis of transnational municipal networks, such as

Metropolis and the C40 Cities Climate Leadership Group, Sofie Bouteligier's innovative study examines theories of the network society and global cities from a global ecology perspective. Through direct observation and interviews and using two types of city networks that have been treated separately in the literature, she discovers the structure and logic pertaining to office networks of environmental non-governmental organizations and environmental consultancy firms. In doing so she incisively demonstrates the ways in which cities fulfill the role of strategic sites of global environmental governance, concentrating knowledge, infrastructure, and institutions vital to the function of transnational actors.

The Making of the Queen Elizabeth Olympic Park John C. Hopkins,Peter Neal,2013-01-14 This is the story of The Making of the Queen Elizabeth Olympic Park by the Olympic Delivery Authority. Situated in east London adjacent to Victoria Park, one of the world's earliest public parks built in the 19th century, the Park provides an innovative blueprint for contemporary urban park design and is recognised as an exemplar sustainable development for the 21st century. As a primary legacy of the London 2012 Olympic and Paralympic Games, the Park was conceived as a new piece of sustainable city, transforming a largely neglected, contaminated, post-industrial district, into a new community for up to 20,000 residents, shifting the centre of gravity of London eastwards. Written by those at the heart of the project, it draws significantly on contributions from the many experts who have shaped and guided the creation of the Park, including interviews with the key players responsible for delivering the project. It provides the only authoritative account of the planning, design and construction of the Park beginning with the bid to host the games, setting out its historical, philosophical and physical context; describing the strategic fit within the Thames Gateway, Lower Lea Valley and Stratford City; explaining how One Planet Living principles developed by WWF and BioRegional underpinned sustainability throughout the project; and concludes with a 'Walk in Park' capturing its essence for both Games and Legacy. Richly illustrated, it is a unique reference for those involved in the planning, design, delivery and management of sustainable urban parks and new communities on post-industrial and other land, and those seeking to host future Games and other large-scale international events.

Innovation in Energy Law and Technology Donald N. Zillman,Martha M. The Challenge of Governance in South Sudan Steven C Roach,Derrick K Hudson,2018-09-05 South Sudan is one of the world's most divided and unstable countries. Since achieving statehood in 2011, the country has plunged into civil war (2013-15) and become the scene of some of the worst human rights abuses on the African continent. Despite ongoing political turmoil, states and international institutions have pledged enormous resources to stabilize the country and shore up the current peace process, but have had limited influence in dealing with the effects of rampant corruption and factionalism. The Challenge of Governance in South Sudan examines the factors that continue to haunt peace-building efforts, including the domination of the SPLM/A, factionalization, corruption, human rights atrocities, an ineffective constitution, and the role of international actors. It brings together a diverse set of leading scholars to reflect on these factors and propose ways of promoting peace and stability in South Sudan. In particular, the book asks whether the disparity between domestic priorities/policies and foreign intervention strategies has prevented the peace process from moving forward. The contributors probe this issue by addressing the flaws of past?peace agreements, poor governance, a weakly articulated peacekeeping mission, US foreign policy, and a lack of moral accountability. This book is perfect for students, scholars and policy makers with an interest in the challenges faced by the world's newest country.

Building Sustainable Cities of the Future Justin Bishop,2017-08-28 This book draws upon the expertise of academic researchers, urban planners and architects to explore the challenge of building the sustainable cities of the future. It addresses this challenge by considering current cities and those of the near future, and creates a picture of the sustainable city from the bottom up. Individual chapters cover topics such as transport, energy supply, sustainable urbanism and promoting social equality in large infrastructure projects. Real-world examples are presented to illustrate how systems thinking is used to integrate different components of a city so as to ensure that the whole is more sustainable than its parts. Written in an accessible style, this book is intended for general readers as much as it is for students and researchers interested in sustainable cities and related topics. It is also ideal for urban planners seeking best-practice guidelines for sustainable urban development.
