Network Administrator Street Smarts Toby Skandier,2006-07-14 Develop the skills you need in the real world Hit the ground running with the street-smart training you'll find in this practical book. Using a year in the life approach, it gives you an inside look at network administration, with key information organized around the actual day-to-day tasks, scenarios, and challenges you'll face in the field. This valuable training tool is loaded with hands-on, step-by-step exercises covering all phases of network administration, including: Designing a network Implementing and configuring networks Maintaining and securing networks Troubleshooting a network An invaluable study tool This no-nonsense book also covers the common tasks that CompTIA expects all its Network+ candidates to know how to perform. So whether you're preparing for certification or seeking practical skills to break into the field you'll find the instruction you need, including: Choosing an Internet access technology Configuring wireless components Determining optimal placement of routers and servers Setting up hubs, switches, and routers Configuring a Windows(r) client Troubleshooting your network The Street Smarts series is designed to help current or aspiring IT professionals put their certification to work for them. Full of practical, real world scenarios, each book features actual tasks from the field and then offers step-by-step exercises that teach the skills necessary to complete those tasks. And because the exercises are based upon exam objectives from leading technology certifications, each Street Smarts book can be used as a lab manual for certification prep.

Biophysical and Computational Tools in Drug Discovery Anil Kumar Saxena,2021-10-18 This book reviews recent physicochemical and biophysical techniques applied in drug discovery research, and it outlines the latest advances in computational drug design. Divided into 10 chapters, the book discusses about the role of structural biology in drug discovery, and offers useful application cases of several biophysical and computational methods, including time-resolved fluorometry (TRF) with Förster resonance energy transfer (FRET), X-Ray crystallography, nuclear magnetic resonance spectroscopy, mass spectroscopy, generative machine learning for inverse molecular design, quantum mechanics/molecular mechanics (QM/MM,ONIOM) and quantum molecular dynamics (QMT) methods. Particular attention is given to computational search techniques applied to peptide vaccines using novel mathematical descriptors and structure and ligand-based virtual screening techniques in drug discovery research. Given its scope, the book is a valuable resource for students, researchers and professionals from pharmaceutical industry interested in drug design and discovery.
