Postcolonial Theology of Religions Jenny Dagggers,2013-07-18 This original and ambitious book considers the terms of engagement between Christian theology and other religious traditions, beginning with criticism of Christian theology of religions as entangled with European colonial modernity. Jenny Dagggers covers recent efforts to disentangle Eurocentrism from the meeting of the religions, and investigates new constructive possibilities arising in the postcolonial context. In dialogue with Asian and feminist theologies, she reflects on ways forward for relations between the religions and offers a particularist model for theology of religions, standing within a classical Trinitarian framework.

The Oxford Handbook of Christianity in Asia Felix Wilfred,2014-05-23 Named by the International Bulletin of Missionary Studies as an Outstanding Book of 2014 for Mission Studies Despite the ongoing global expansion of Christianity, there remains a lack of comprehensive scholarship on its development in Asia. This volume fills the gap by exploring the world of Asian Christianity and its manifold expressions, including worship, theology, spirituality, inter-religious relations, interventions in society, and mission. The contributors, from over twenty countries, deconstruct many of the widespread misconceptions and interpretations of Christianity in Asia. They analyze how the growth of Christian beliefs throughout the continent is linked with the socio-political and cultural processes of colonization, decolonization, modernization, democratization, identity construction of social groups, and various social movements. With a particular focus on inter-religious encounters and emerging theological and spiritual paradigms, the volume provides alternative frames for understanding the phenomenon of conversion and studies how the scriptures of other religious traditions are used in the practice of Christianity within Asia.

Growing Greener Cities Eugenie L. Birch,Susan M. Wachter,2011-09-02 Nineteenth-century landscape architect Frederick Law Olmsted described his most famous project, the design of New York's Central Park, as a democratic development of highest significance. Over the years, the significance of green in civic life has grown. In twenty-first-century America, not only open space but also other issues of sustainability—such as potable water and carbon footprints—have become crucial elements in the quality of life in the city and surrounding environment. Confronted by a U.S. population that is more than 70 percent urban, growing concern about global warming, rising energy prices, and unabated globalization, today's decision makers must find ways to bring urban life into balance with the Earth in order to sustain the natural, economic, and political environment of the modern city. In *Growing Greener Cities*, a collection of essays on urban sustainability and environmental issues edited by Eugenie L. Birch and Susan M. Wachter, scholars and practitioners alike promote activities that recognize and conserve nature's ability to sustain urban life. These essays demonstrate how partnerships across professional organizations, businesses, advocacy groups, governments, and individuals themselves can bring green solutions to cities from London to Seattle. Beyond park and recreational spaces, initiatives that fall under the green umbrella range from public transit and infrastructure improvement to aquifer protection and urban agriculture. *Growing Greener Cities* offers an overview of the urban green movement, case studies in effective policy implementation, and tools for measuring and managing success. Thoroughly illustrated with color graphs, maps, and photographs, *Growing Greener Cities* provides a panoramic view of urban sustainability and environmental issues for green-minded city planners, policy makers, and citizens.
