**Clinical Rehabilitation Experience Utilizing Serious Games** Michael Lawo,Peter Knackfuß,2018-05-02 This book emerged out of research done during the period between 2004 and 2016 on the topic of mobile and wearable computing. It did not solely focus on technical solutions and the search for a general approach but also on the question how people can live with this technology. Thus social and organizational aspects were also part of the research. The findings demonstrate the opportunities of serious games and reveal the need of clinical studies when targeting at solutions that are to become part of any kind of therapy. The result is a comprehensive presentation of research findings covering different important aspects in the domain of wearable and pervasive computing for a better life.

*Game-Based Learning* Patrick Felicia,2014-06-26 This book is an invitation to delve into the world of Game-Based Learning, to understand the many facets that make games a truly interesting and effective tool to teach and train in the 21st century. It includes nine chapters which were initially presented at the iGBL conference, a conference held throughout Ireland, where researchers, practitioners, students and other stakeholders meet and share their interest in games and education. These chapters touch on some very important topics, including games for health; formal education; poetry and games; science teaching through mobile games; relaxation with gaming devices; and accounting for disabilities with handheld devices. Together, these chapters illustrate the advancements in the field of Game-Based Learning, the challenges faced by developers and educators, as well as the opportunities that this medium can offer. Each chapter is written with practicality in mind in an effort to provide the reader with both a solid theoretical approach and background, coupled to some practical guidelines and suggestions that can be applied easily.

**Virtual and Augmented Reality (VR/AR)** Ralf Doerner,Wolfgang Broll,Paul Grimm,Bernhard Jung,2022-01-12 This comprehensive textbook offers a scientifically sound and at the same time practical introduction to Virtual and Augmented Reality (VR/AR). Readers will gain the theoretical foundation needed to design, implement or enhance VR/AR systems, evaluate and improve user interfaces and applications using VR/AR methods, assess and enrich user experiences, and develop a deeper understanding of how to apply VR/AR techniques. Whether utilizing the book for a principal course of study or reference reading, students of computer science, education, media, natural sciences, engineering and other subject areas can benefit from its in-depth content and vivid explanation. The modular structure allows selective sequencing of topics to the requirements of each teaching unit and provides an easy-to-use format from which to choose specific themes for individual self-study. Instructors are provided with extensive materials for creating courses as well as a foundational text upon which to build their advanced topics. The book enables users from both research and industry to deal with the subject in detail so they can properly assess the extent and benefits of VR/AR deployment and determine required resources. Technology enthusiasts and professionals can learn about the current status quo in the field of VR/AR and interested newcomers can gain insight into this fascinating world. Grounded on a solid scientific foundation, this textbook, addresses topics such as perceptual aspects of VR/AR, input and output devices including tracking, interactions in virtual worlds, real-time aspects of VR/AR systems and the authoring of VR/AR applications in addition to providing a broad collection of case studies.

**EB00K: Understanding Alternative Media** Olga Bailey,Bart Cammaerts,Nico Carpentier,2007-12-16 What are alternative media? What roles do alternative media play in pluralistic, democratic societies? What are the similarities and differences between alternative media, community media, civil society media and rhizomatic media? How do alternative media work in practice? This clear and concise text offers a one-stop guide through the complex political, social and economic debates that surround alternative media and provides a fresh and insightful look at the renewed importance of this form of communication. Combing diverse case studies from countries including the UK, North America and Brazil, the authors propose an original theoretical framework to help understand the subject. Looking at both 'old' and 'new' media, the book argues for the importance of an alternative media and suggests a political agenda as a way of broadening its scope. Understanding Alternative Media is valuable reading for students in media, journalism and communications studies, researchers, academics, and journalists.

**Tourism, Culture and Heritage in a Smart Economy** Vicky Katsoni,Amitabh Upadhyia,Anastasia Stratigea,2017-02-21 This book explores the ways in which information and communication technologies (ICTs) offer a powerful tool for the development of smart tourism. Numerous examples are presented from across the entire spectrum of cultural and heritage tourism, including art, innovations in museum interpretation and collections management, cross-cultural visions, gastronomy, film tourism, dark tourism, sports tourism, and wine tourism. Emphasis is placed on the importance of the smart destinations concept and a knowledge economy driven by innovation, creativity, and entrepreneurship. New modes of tourism management are described, and tourism products, services, and strategies for the stimulation of economic innovation and promotion of knowledge transfer are outlined. The potential of diverse emerging ICTs in this context is clearly explained, covering location-based services, internet of things, smart cities, mobile services, gamification, digital collections and the virtual visitor, social media, social networking, and augmented reality. The book is edited in collaboration with the International Association of Cultural and Digital Tourism (IACuDiT) and includes the proceedings of the Third International Conference on Cultural and Digital Tourism.

**Community Series: Towards a Meaningful Instrumental Music Education. Methods, Perspectives, and Challenges – Volume II** Andrea Schiavio,Marja-Leena Juntunen,Dylan van der Schyff,Luc Nijs,2024-02-26 Trying to understand the complex interplay between effective learning and personal experience is one of the main challenges for instrumental music education. Much of the research that focuses on effective learning outcomes often adopts experimental methodologies that do not allow for a thorough examination of the subjective and social processes that accompany each student's musical journey; on the contrary, contributions dedicated to the detailed analysis of the learners' lived experience often do not offer generalizable outcomes to different types of learning and

teaching.

**Affect and Emotion in Human-Computer Interaction** Christian Peter, Russell Beale, 2008-08-25 Affect and emotion play an important role in our everyday lives: They are present whatever we do, wherever we are, and wherever we go, without us being aware of them for much of the time. When it comes to interaction, be it with humans, technology, or humans via technology, we suddenly become more aware of emotion, either by seeing the other's emotional expression, or by not getting an emotional response while anticipating one. Given this, it seems only sensible to explore affect and emotion in human-computer interaction, to investigate the underlying principles, to study the role they play, to develop methods to quantify them, and to finally build applications that make use of them. This is the research field for which, over ten years ago, Rosalind Picard coined the phrase affective computing. The present book provides an account of the latest work on a variety of aspects related to affect and emotion in human-technology interaction. It covers theoretical issues, user experience and design aspects as well as sensing issues, and reports on a number of affective applications that have been developed in recent years.

**Advances in Computer Entertainment** Anton Nijholt, Teresa Romão, Dennis Reidsma, 2012-10-12 This book constitutes the refereed conference proceedings of the 9th International Conference on Advances in Computer Entertainment, ACE 2012, held in Kathmandu, Nepal, in November 2012. The 10 full paper and 19 short papers presented together with 5 papers from the special track Arts and Culture and 35 extended abstracts were carefully reviewed and selected from a total of 140 submissions in all categories. The papers cover topics across a wide spectrum of disciplines including computer science, design, arts, sociology, anthropology, psychology, and marketing. Focusing on all areas related to interactive entertainment they aim at stimulating discussion in the development of new and compelling entertainment computing and interactive art concepts and applications.

**Encyclopedia of Cloud Computing** San Murugesan, Irena Bojanova, 2016-05-09 The Encyclopedia of Cloud Computing provides IT professionals, educators, researchers and students with a compendium of cloud computing knowledge. Authored by a spectrum of subject matter experts in industry and academia, this unique publication, in a single volume, covers a wide range of cloud computing topics, including technological trends and developments, research opportunities, best practices, standards, and cloud adoption. Providing multiple perspectives, it also addresses questions that stakeholders might have in the context of development, operation, management, and use of clouds. Furthermore, it examines cloud computing's impact now and in the future. The encyclopedia presents 56 chapters logically organized into 10 sections. Each chapter covers a major topic/area with cross-references to other chapters and contains tables, illustrations, side-bars as appropriate. Furthermore, each chapter presents its summary at the beginning and backend material, references and additional resources for further information.

**ICTE in Transportation and Logistics 2019** Egils Ginters, Mario Arturo Ruiz Estrada, Miquel Angel Piera Eroles, 2020-01-30 This proceedings volume explores the latest advances in transport and logistics, while also discussing the applications of modern information technologies, telecommunications, electronics, and prospective research methods and analyzing their impacts on society and the environment, which in turn determine the future development of these technologies. The book is intended for a broad readership, including transport and logistics business planners and technical experts, leveraging industry knowledge and facilitating technology adoption in promising business regions and transit corridors such as Ukraine, Kazakhstan, and others. The authors, who include policy planners and crafters as well as education and training professionals, address various types of intermodal transport such as rail, road, maritime, air, etc.

**Changing Television Environments** Manfred Tscheligi, Marianna Obrist, Arthur Lugmayr, 2008-06-25 This book constitutes the refereed proceedings of the 6th European Conference on Interactive Television, EuroITV 2008, held in Salzburg, Austria, in July 2008. The 42 revised full papers were carefully reviewed and selected from 156 submissions. The contributions cover significant aspects of the interactive television domain including submissions on user studies, technical challenges related to new developments as well as new kind of formats. The papers are organized in topical sections on interactive TV, interactive authoring, personalisation and recommender systems, mobile TV, social TV, new TV environments, iTV architectures and systems, user interfaces and interaction design, user studies, and accessibility.

**Trustworthy Internet** Nicola Blefari-Melazzi, Giuseppe Bianchi, Luca Salgarelli, 2011-06-15 This book collects a selection of the papers presented at the 21st International Tyrrhenian Workshop on Digital Communications, organized by CNIT and dedicated this year to the theme Trustworthy Internet. The workshop provided a lively discussion on the challenges involved in reshaping the Internet into a trustworthy reality, articulated around the Internet by and for People, the Internet of Contents, the Internet of Services and the Internet of Things, supported by the Network Infrastructure foundation. The papers have been revised after the workshop to take account of feedbacks received by the audience. The book also includes: i) an introduction by the Editors, setting the scene and presenting evolution scenarios; ii) five papers written by the session chairmen, reputed scientists, and each dedicated to a facet of the trustworthy Internet vision; iii) a concluding paper, reporting the outcomes of a panel held at the conclusion of the workshop, written by the two keynote speakers.

**Virtual Storytelling. Using Virtual Reality Technologies for Storytelling** Marc Cavazza, Stéphane Donikian, 2007-11-25 This book constitutes the refereed proceedings of the 4th International Conference on Virtual Storytelling, ICVS 2007, held in Saint-Malo, France, in December 2007. The 12 revised full papers, three invited papers and seven poster and demo papers were carefully reviewed and selected. The papers are organized in topical sections on authoring tools and story models, behavior modeling, user interactivity, an invited session: related EU projects, as well as the poster and demo session.

**Metadata and Semantic Research** Fabio Sartori, Miguel-Angel Sicilia, Nikos Manouselis, 2009-09-29 This volume constitutes the selected papers of the third international conference on Metadata and Semantic Research, MTSR 2009, held in Milan, Italy, in September/October 2009. In order to give a novel perspective in which both theoretical and application aspects of metadata research contribute in the growth of the area, this book mirrors the structure of the Congress, grouping the papers into three main categories: 1) theoretical research: results and proposals, 2) applications: case studies and proposals, 3) special track: metadata and semantics for agriculture, food and environment. The book contains 32 full papers (10 for the first category, 10 for the second and 12 for the third), selected from a preliminary initial set of about 70 submissions.

**Group Recommender Systems** Alexander Felfernig, Ludovico Boratto, Martin Stettinger, Marko Tkalčič, 2023-11-27 This book discusses different aspects of group recommender systems, which are systems that help to identify recommendations for groups instead of single users. In this context, the authors present different related techniques and applications. The book includes in-depth summaries of group recommendation algorithms, related

industrial applications, different aspects of preference construction and explanations, user interface aspects of group recommender systems, and related psychological aspects that play a crucial role in group decision scenarios.

**Trends in Computer Science, Engineering and Information Technology** Dhinaharan Nagamalai, Eric Renault, Murugan Dhanuskodi, 2011-09-14 This book constitutes the refereed proceedings of the First International Conference on Computer Science, Engineering and Information Technology, CCSEIT 2011, held in Tirunelveli, India, in September 2011. The 73 revised full papers were carefully reviewed and selected from more than 400 initial submissions. The papers feature significant contributions to all major fields of the Computer Science and Information Technology in theoretical and practical aspects.

**Applied Soft Computing and Communication Networks** Sabu M. Thampi, Jaime Lloret Mauri, Xavier Fernando, Rajendra Boppana, S. Geetha, Axel Sikora, 2021-07-01 This book constitutes thoroughly refereed post-conference proceedings of the International Applied Soft Computing and Communication Networks (ACN 2020) held in VIT, Chennai, India, during October 14–17, 2020. The research papers presented were carefully reviewed and selected from several initial submissions. The book is directed to the researchers and scientists engaged in various fields of intelligent systems.
