Linux Observability with BPF David Calavera,Lorenzo Fontana,2019-11-14 Build your expertise in the BPF virtual machine in the Linux kernel with this practical guide for systems engineers. You'll not only dive into the BPF program lifecycle but also learn to write applications that observe and modify the kernel's behavior; inject code to monitor, trace, and securely observe events in the kernel; and more. Authors David Calavera and Lorenzo Fontana help you harness the power of BPF to make any computing system more observable. Familiarize yourself with the essential concepts you'll use on a day-to-day basis and augment your knowledge about performance optimization, networking, and security. Then see how it all comes together with code examples in C, Go, and Python. Write applications that use BPF to observe and modify the Linux kernel's behavior on demand Inject code to monitor, trace, and observe events in the kernel in a secure way—no need to recompile the kernel or reboot the system Explore code examples in C, Go, and Python Gain a more thorough understanding of the BPF program lifecycle

Batman forever? The economics of overlapping rights Cuntz, Alexander,Kaiser, Franziska,World Intellectual Property Organization,2020-10-13 When copyrighted comic characters are also protected under trademark laws, intellectual property (IP) rights can be overlapping. Arguably, registering a trademark can increase transaction costs for cross-media uses of characters, or it can help advertise across multiple sales channels. In an application to book, movie and video game publishing industries, we thus ask how creative reuse (innovation in uses) is affected in situations of overlapping rights, and whether 'fuzzy boundaries' of right frameworks are in fact enhancing or decreasing content sales.

Trademark Law and Theory Graeme B. Dinwoodie,Mark D. Janis,2008 Boasting an impressive list of contributors, this first edition of Trademark Law and Theory brings together a compilation of well-written and powerfully argued works by leading international academics. The book is certainly one of the most extensive and thought provoking overviews of contemporary trademark law and theory yet to be published. . . Whilst all the contributions share in common their examination of the rapidity of change within trademark systems, the editors should be commended on their generous seasoning of other cross cutting themes throughout the Handbook. . . This fascinating compendium enriches our understanding of the shape, substance, and form of trademark law and theory. . . this Handbook is perhaps a rare exception to the adage that no book can be all things to all men . Its broad sweep approach and cross cutting themes enable a range of interested parties, such as policymakers; academics in the fields of marketing, business, consumer psychology; in addition to the usual suspects; to dip in and out of the Handbook as they wish. . . a unique and erudite collection of essays concerning trademark law and theory. . . Odette Hutchinson, Communications Law Trademarks is an area of vital, practical everyday concern, and the idea of producing a volume that brings together the perspectives of 19 thoughtful and experienced legal scholars is a bold and exciting initiative. The present volume does not disappoint and the two editors are to be congratulated on orchestrating an ensemble that simultaneously informs and stimulates. The title is apt: it is truly contemporary and is highly theoretical and doctrinal in character, while the interesting choice of the word handbook suggests clearly that this is a work in progress, a snapshot at a particular time of the challenging lines of individual research that each contributor to the volume is undertaking. It is a fine addition to a larger series of research handbooks in intellectual property published by Edward Elgar under the series editorship of Jeremy Phillips. . . The editors have done a fine job in presenting this material in such a clear and coherent fashion. . . this is an excellent and rewarding volume of readings that will be of interest to anyone working in the area of trademarks, whether as an academic or as a practitioner. Indeed, for the practitioner it will be of particular value, in that it contains, and opens up, many areas of inquiry that may not always be apparent when working at the coalface of a particular problem. . . For both kinds of readers, the real value of the volume is to have so many different kinds of perspectives brought together within the space of a single volume. . . this is a handsome production: the publishers and editors are to be commended on the clarity and cleanness of the typeface and headings, the thoroughness of the index, and the accuracy of their proof reading. It has also been given a striking and evocative cover. Sam Ricketson, University of Melbourne Law School Australia, European Intellectual Property Review Trademark Law and Theory is a first-rate exploration of the issues that will dominate trademark law in the 21st century. Authors from five continents provide a truly global perspective on the present and future of trademark law. An exceptional collection of contributors and contributions. Robert Denicola, University of Nebraska, US This compendium is an excellent source of writing on all aspects of trademark law and practice by experts from Europe, the United States, South Africa, Singapore, New Zealand and Australia. It will be a stimulating read for lawyers, academics, students and policymakers alike on the present and developing trends in law and policy relating to trademarks as marketing tools and cultural artefacts. The editors deserve congratulation on their concept for the book and their judicious selection of material. David Vaver, University of Oxford, UK All students, young and older, in the burgeoni

The Future of the Public Domain Lucie M. C. R. Guibault,2006-01-01 The presence of a robust public domain is an essential precondition for cultural, social and economic development and for a healthy democratic process. But the public domain is under pressure as a result of the ongoing march towards an information economy. Items of information, which in the `old economy had little or no economic value, such as factual data, personal data, genetic information and pure ideas, have acquired independent economic value in the current information age, and consequently become the object of property rights making the information a tradable commodity. How and to what extent does the commodification of information affect the free flow of information and the integrity of the public domain? Does the freedom of expression and information, guaranteed inter alia in the European Convention on Human Rights, call for active state intervention to `save the public domain? What means both legal and practical are available or might be conceived to guarantee and foster a robust public domain? These were the main questions that were addressed in a major collaborative research project led by the Institute for Information Law of the University of Amsterdam (IViR) in co-operation with the Tilburg Institute for Law, Technology and Society (TILT) of Tilburg University, and funded by ITeR, the Dutch National Program for Information Technology and Law. Thirteen contributions from academia worldwide make up the present book, addressing the future of the public domain from a different angle. In addition, all authors were invited to reflect upon the notion and role of the public domain in the context of information law and policy. Should this concept be limited to that of a `negative image of (intellectual) property protection, i.e. all publicly available information not subject to a property right, and therefore freely (i.e. gratis) available, or should a broader approach be taken, e.g. all information available from public sources at affordable cost? Should information policies be aimed at maximizing the public domain or optimizing information flows? To what extent are these aims congruent? This book takes a broader, `information law oriented approach towards the question of preserving the public domain, in which a wide range of interrelated legal questions

converge. Issues treated in this book include: Economic analysis of the public domain Fundamental rights analysis of the public domain Impact of the application of technological protection measures and contractual restrictions on the public domain The impact of the expansion of copyright, database right and patent rights on the public domain The impact of the commodification of private data, government information, indigenous knowledge on the public domain The capacity of the Open Source and Creative Commons Movements to preserve the integrity of the public domain The Future of the Public Domain is an important work for all those interested or involved in the regulation of the knowledge economy. Legal scholars, academic and research institutions, corporate counsel, lawyers, government policymakers and regulators all these and more will benefit enormously from the thoughtful and incisive discussions presented here.

Trademark Protection and Freedom of Expression Wolfgang Sakulin,2011-01-01 Trademark law grants right holders an exclusive right to prevent third parties from using a sign. This can readily be seen as the antithesis of freedom of expression, which arguably includes a right of third parties to non-exclusive use of a sign for a variety of purposes, ranging from informing consumers, to voicing criticism or to artistic expression. Drawing on cultural theory and⊓ which has shown that society is involved in a constant struggle about shaping the meaning of signs (including trademarks) and⊓ this highly original and provocative book contends that trademark law fails to sufficiently differentiate between commercial purpose and the social, political, or cultural meanings carried by one and the same sign. The author shows that the and⊓functional approachand⊓ to justifying trademark rights taken in current jurisprudence and doctrine is deficient, in that it does not take sufficient account of the fact that trademark rights can restrict the freedom of expression of third parties. Specifically, the exercise of rights granted under the European Trademark Regulation and the national trademark rights harmonized by the European Trademark Directive can cause a disproportionate impairment of the freedom of commercial and non-commercial expression of third parties as protected by Article 10 of the European Convention on Human Rights (ECHR). The authorand⊓s in-depth analysis explores such elements as the following: o the economic and ethical rationales of trademark rights; o whether trademark rights under European law can be justified by these rationales; o how freedom of expression can serve as a limitation to trademark rights; o what level of protection such freedom of expression grants to third parties; o the role of trademarks of social, cultural, or political importance in public discourse; o chilling effects on public discourse that can be caused by the exercise of trademark rights; o the interpretation of provisions regulating the grant and revocation of trademark rights in light of freedom of expression; and o the interpretation of the scope of protection and the limitations of trademark rights in light of freedom of expression. In effect, the analysis serves to expand the focus of legislators, courts, and trademark registering authorities from the interests of trademark right holders, who seemingly are granted ever more protection, to the justified interests of third parties. The critical analysis of existing trademark law leads the author to clearly identify the areas of trademark law in which the law needs to be reinterpreted and the areas in which legislative action should be taken, with recommendations for a number of limitations that should aid legislators in drafting concrete amendments. The new insights and imperatives provided by this book are sure to prove useful to both courts interpreting existing provisions of trademark laws and to legislators who are faced with the challenges of drafting new rules or revising existing laws.

E-Business Essentials Nick Bontis,2004-09-01 This special issue of QJEC marks the final instalment of the journal. The QJEC has had a long-standing history of international scholarship focused on the emerging field of electronic commerce with a broad, interdisciplinary approach. It has established the field's intellectual foundation with state-of-the-art research from business, computer science, engineering, law, psychology, and sociology. This particular issue focuses on an eclectic group of papers that are international in scope with authors from Canada, Australia, France, Germany, South Africa and Italy. The papers range in topics from valuing dot com companies, to mobile health and portals, to supply chain management.

A Manager's Guide to Software Engineering Roger S. Pressman,1996-02 Pressman explains the complexities of software engineering to a managerial audience by highlighting its impact on the corporation. In a relaxed question-and-answer format, he helps readers frame and answer four key questions--What is software engineering and why it is important to us? How do we manage teh changes it requires? How can it help us manage projects more effectively?

Trade Related Aspects of Intellectual Property Rights Carlos Correa,2020-07-23 The TRIPS Agreement is the most comprehensive and influential international treaty on intellectual property rights. It brings intellectual property rules into the framework of the World Trade Organization, obliging all WTO Member States to meet minimum standards of intellectual property protection and enforcement. This has required massive changes in some national laws, particularly in developing countries. This volume provides a detailed legal analysis of the provisions of the TRIPS Agreement, as well as elements to consider their economic implications in different legal and socio-economic contexts. This book provides an in depth analysis of the principles and of the substantive and enforcement provisions of the TRIPS Agreement, the most influential international treaty on intellectual property currently in force. It discusses the legal context in which the Agreement was negotiated, the objectives of their proponents and the nature of the obligations it created for the members of the World Trade Organization. In particular, it examines the minimum standards that must be implemented with regard to patents, trademarks, industrial designs, geographical indications, copyright and related rights, integrated circuits, trade-secrets and test data for pharmaceutical and agrochemical products. Trade Related Aspects of Intellectual Property Rights: A Commentary on the TRIPS Agreement elaborates on the interpretation of provisions contained in said Agreement, in the light of the customary principles for the interpretation of international law. The analysis -which is supported by a review of the relevant GATT and WTO jurisprudence- identifies the policy space left to such members to implement their obligations in accordance with their own legal systems and public policy objectives, including in respect of complex issues such as patentability criteria, compulsory licenses, exceptions and limitations to copyright, border measures, injunctive relief and the protection of test data under the discipline of unfair competition.

Trade Marks and Brands Lionel Bently,Jennifer Davis,Jane C. Ginsburg,2011-03-03 Developments in trade marks law have called into question a variety of basic features, as well as bolder extensions, of legal protection. Other disciplines can help us think about fundamental issues such as: what is a trade mark? What does it do? What should be the scope of its protection? This volume assembles essays examining trade marks and brands from a multiplicity of fields: from business history, marketing, linguistics, legal history, philosophy, sociology and geography. Each chapter pairs lawyers' and non-lawyers' perspectives, so that each commentator addresses and critiques his or her counterpart's analysis. The perspectives of non-legal fields are intended to enrich legal academics' and practitioners' reflections about trade marks, and to expose lawyers, judges and policy-makers to ideas, concepts and methods that could prove to be of particular importance in the development of positive law.

Software Shock Roger S. Pressman,S. Russell Herron,1991 Software is pervasive, affecting every area of our life from our work to our entertainment. Yet, few of us understand exactly what it is and how it will affect our future. What we do know is the confusion and frustration we often feel over the changes brought on by technology. We suffer from software shock. Authors Roger Pressman and Russell Herron offer a solution. In clear, nontechnical language, they demystify this complicated technology. They trace the history of software technology and look at the people and corporate cultures that compose the software industry. They also offer a tantalizing view of the deeper impact that computers and software will have in the future, covering such topics as -- how our privacy can be invaded by hackers -- how our national security can be compromised by technoterrorists -- how small errors jeopardize our vital systems, like our telephone networks -- how teaching computers can revolutionize education -- how software can increase your professional and personal productivity -- how intelligent cars and software-based highways will make driving a hands-off experience. Software Shock will help technical and nontechnical readers -- and their families -- understand the importance of software and cope with the dangers and opportunities it brings to the world.

From GATT to TRIPs Friedrich-Karl Beier,1996-09-26 The Agreement on Trade-Related Aspects of Intellectual Property Rights of 1994 constitutes a milestone in the international protection of these rights and the most far-reaching agreement to follow upon the venerable Paris and Berne Conventions. Under the aegis of the newly established World Trade Organization, international intellectual property protection has for the first time been linked to trade policy issues. The TRIPs Agreement also obliges its Members as regards the enforcement of rights and dispute settlement. This volume in the IIC Studies series undertakes a comprehensive analysis of all the fields of industrial and intellectual property law regulated and affected by TRIPs. It is an indispensable tool for lawyers, practitioners and scholars in this area.

Concise International and European IP Law Thomas Cottier,Pierre Véron,2011 Beyond specificities of each intellectual property right, some principles and rules are common to all or several intellectual property rights. Therefore certain statutory provisions enacted at European or international levels are of great importance for all or various intellectual property rights. Intellectual property is one of the branches of law where the international harmonization started the earliest thanks to international conventions (e.g. the Paris Convention of 20 March 1883 for the Protection of Industrial Property). Harmonization is still at work today (e.g. with the Agreement on Trade-related Aspects of Intellectual Property Rights) and has been carried on to a high degree at a regional level thanks to the secondary legislation of the European Union (especially thanks to directives and regulations). This volume aims to offer the reader a rapid understanding of some of these European or international texts which deal with some general and jurisdictional issues and are very important from a practical point of view. Key features include: * An article-by-article commentary on the relevant international treaties and European instruments * It is intended to provide the reader with a short and straightforward explanation of the principles of law to be drawn from each provision * Editors and authors are all prominent specialists (academics and practitioners) in the field of international and European IP law Concise International and European IP Law - TRIPS, Paris Convention, European Enforcement and Transfer of Technology is part of 'Concise IP', a series of five volumes of commentary on European intellectual property legislation edited by Thomas Dreier, Charles Gielen and Richard Hacon. The formula of this series is based on the successful German and Dutch formula 'KurzKommentar' and 'Tekst en Commentaar'. The five volumes cover: Patents and related matters, Trademarks and designs, Copyrights and neighbouring rights, IT and a general volume including jurisdictional issues.

The TRIPS Agreement Daniel J. Gervais,2003 This work provides practitioners with in-depth, article-by-article analysis of the TRIPS Agreement. For each article it describes the evolution of the provision and its negotiating history, difficulties in its interpretation and application, and the key points practitioners must consider in their work. In addition, it examines the history and context of the Agreement and assesses its likely impact on the future development of the international intellectual property framework.
