World Development Report 2020 World Bank,2019-11-19 Global value chains (GVCs) powered the surge of international trade after 1990 and now account for almost half of all trade. This shift enabled an unprecedented economic convergence: poor countries grew rapidly and began to catch up with richer countries. Since the 2008 global financial crisis, however, the growth of trade has been sluggish and the expansion of GVCs has stalled. Meanwhile, serious threats have emerged to the model of trade-led growth. New technologies could draw production closer to the consumer and reduce the demand for labor. And trade conflicts among large countries could lead to a retrenchment or a segmentation of GVCs. World Development Report 2020: Trading for Development in the Age of Global Value Chains examines whether there is still a path to development through GVCs and trade. It concludes that technological change is, at this stage, more a boon than a curse. GVCs can continue to boost growth, create better jobs, and reduce poverty provided that developing countries implement deeper reforms to promote GVC participation; industrial countries pursue open, predictable policies; and all countries revive multilateral cooperation.

Japanoise David Novak,2013-06-03 Drawing on more than a decade of research in Japan and the United States, David Novak traces the cultural feedback that generates and sustains Noise, an underground music genre combining distortion and electronic effects.

The Tale of Genji John T. Carpenter,Melissa McCormick,Monika Bincsik,Kyoko Kinoshita,Sano Midori,2019-03-04 With its vivid descriptions of courtly society, gardens, and architecture in early eleventh-century Japan, The Tale of Genji—recognized as the world’s first novel—has captivated audiences around the globe and inspired artistic traditions for one thousand years. Its female author, Murasaki Shikibu, was a diarist, a renowned poet, and, as a tutor to the young empress, the ultimate palace insider; her monumental work of fiction offers entry into an elaborate, mysterious world of court romance, political intrigue, elite customs, and religious life. This handsomely designed and illustrated book explores the outstanding art associated with Genji through in-depth essays and discussions of more than one hundred works. The Tale of Genji has influenced all forms of Japanese artistic expression, from intimately scaled albums to boldly designed hanging scrolls and screen paintings, lacquer boxes, incense burners, games, palanquins for transporting young brides to their new homes, and even contemporary manga. The authors, both art historians and Genji scholars, discuss the tale’s transmission and reception over the centuries; illuminate its place within the history of Japanese literature and calligraphy; highlight its key episodes and characters; and explore its wide-ranging influence on Japanese culture, design, and aesthetics into the modern era. p.p1 {margin: 0.0px 0.0px 0.0px 0.0px; font: 14.0px Verdana}

The Dada Painters and Poets Robert Motherwell,1989 Presents a collection of essays, manifestos, and illustrations that provide an overview of the Dada movement in art, describing its convictions, antics, and spirit, through the words and art of its principal practitioners.

In the Realm of the Diamond Queen Anna Lowenhaupt Tsing,2021-04-13 In this highly original and much-anticipated ethnography, Anna Tsing challenges not only anthropologists and feminists but all those who study culture to reconsider some of their dearest assumptions. By choosing to locate her study among Meratus Dayaks, a marginal and marginalized group in the deep rainforest of South Kalimantan, Indonesia, Tsing deliberately sets into motion the familiar and stubborn urban fantasies of self and other. Unusual encounters with her remarkably creative and unconventional Meratus friends and teachers, however, provide the opportunity to rethink notions of tradition, community, culture, power, and gender--and the doing of anthropology. Tsing's masterful weaving of ethnography and theory, as well as her humor and lucidity, allow for an extraordinary reading experience for

students, scholars, and anyone interested in the complexities of culture. Engaging Meratus in wider conversations involving Indonesian bureaucrats, family planners, experts in international development, Javanese soldiers, American and French feminists, Asian-Americans, right-to-life advocates, and Western intellectuals, Tsing looks not for consensus and coherence in Meratus culture but rather allows individual Meratus men and women to return our gaze. Bearing the fruit from the lively contemporary conversations between anthropology and cultural studies, *In the Realm of the Diamond Queen* will prove to be a model for thinking and writing about gender, power, and the politics of identity.

Beyond the Makerspace Ann Shivers-McNair, 2021-06-07 Makerspaces—local workshops that offer access to and training on fabrication technologies, often with a focus on creativity, education, and entrepreneurship—proliferated in the 2010s, popping up in cities across the world. *Beyond the Makerspace* is a longitudinal, ethnographically informed study of a particular Seattle makerspace that begins in 2015 and ends with the closing of the space in 2018. Examining acts of making with objects, tools, words, and relationships, *Beyond the Makerspace* reads making as a kind of rhetoric, or meaning-making work, and argues that acts of making things are rhetorical in the sense that they are culturally situated and that they mark boundaries of what counts as making and who counts as maker. By focusing on a particular makerspace over time, Shivers-McNair attends to a changing cohort of makerspace regulars as they face challenges of bringing their vision of inclusivity and diversity to fruition, and offers an examination of how makers are made (and unmade, and remade) in a makerspace. *Beyond the Makerspace* contributes not only to our understanding of making and makerspaces, but also to our understanding of how to study making—and meaning making, more broadly—in ways that examine and intervene in the marking of difference. Thus, the book examines what (and whose) values and practices we are taking up when we identify as makers or when we turn a writing classroom or a library space into a makerspace.

Nuclear War Raymond G. Wilson, 2014 *Nuclear War: Hiroshima, Nagasaki, and A Workable Moral Strategy for Achieving and Preserving World Peace* Raymond G. Wilson The real truth of the matter is, as you and I know, that a financial element in the large centers has owned the government of the United States since the days of Andrew Jackson. □Franklin D. Roosevelt There is considerable reason to believe President Roosevelt's statement is quite true, thus the financial element in the large centers shares responsibility and blame for the tens, if not hundreds, of thousands of war deaths in the last two decades. The people of the world need protection from those responsible for provoking nations to war. In the United States this responsibility lies with all elements in the highest levels of government, the decision makers. It lies with those who tinker with political and economic machinations, most likely for the advantage of a financial element in the large centers. These are probably people young enough and sufficiently uninformed to have no conception of the atrocity of the nuclear confrontations and conflagrations to which they are quite possibly leading the world. This group of people may include most people serving in the U.S. Congress and from personal experience many in the U.S. Military. I have my doubts whether Presidents have seen all of the results of the world's first nuclear war; they are probably shielded from this. Photographs of the victims were confiscated and held confidential for more than 22 years after 1945. There were well more than 210,000 victims; not many photographs were made and survived. You can learn from this book a tiny fraction of the truth about what happens to people caught in nuclear war. (Although the truth from more than 210,000 will never be heard.) In a future war there would be hundreds of thousands, more likely hundreds of millions, of victims. The United States government has not revealed this kind of truth about its first nuclear war. As of early 2014 no sitting president has ever visited Hiroshima or Nagasaki. In Chapter 5 a solution is suggested to save us all from our nuclear madness. I hate war as only a soldier who has lived it can, only as one who has seen its brutality, its futility, its stupidity. -- Dwight D. Eisenhower, ...we also possess the seeds of goodness and justice that humankind was given by nature and has fostered over the ages. We have the ability to cultivate self-control and consideration for others and to strive to live together in a humane and harmonious manner with others. The revival of such true humanity--not only between individuals, but also between nations--is

an absolute necessity today, for the age has come when one nation's self-centered behavior could lead all humanity to annihilation. --Naomi Shohno, 1986 America can do whatever we set our mind to. —Barack Obama

Climate Change and Impacts in the Pacific Lalit Kumar, 2020-01-31 This edited volume addresses the impacts of climate change on Pacific islands, and presents databases and indexes for assessing and adapting to island vulnerabilities. By analyzing susceptibility variables, developing comprehensive vulnerability indexes, and applying GIS techniques, the book's authors demonstrate the particular issues presented by climate change in the islands of the Pacific region, and how these issues may be managed to preserve and improve biodiversity and human livelihoods. The book first introduces the issues specific to island communities, such as high emissions impacts, and discusses the importance of the lithological traits of Pacific islands and how these physical factors relate to climate change impacts. From here, the book aims to analyze the various vulnerabilities of different island sectors, and to formulate a susceptibility index from these variables to be used by government and planning agencies for relief prioritization. Such variables include tropical cyclones, built infrastructures, proximity to coastal areas, agriculture, fisheries and marine resources, groundwater availability, biodiversity, and economic impacts on industries such as tourism. Through the categorization and indexing of these variables, human and physical adaptation measures are proposed, and support solutions are offered to aid the inhabitants of affected island countries. This book is intended for policy makers, academics, and climate change researchers, particularly those dealing with climate change impacts on small islands.

Clang! Clang! Beep! Beep! Robert Burleigh, 2009-05-05 From morning until night, a city is filled with such sounds as the roars and snores of a subway ride, the flutters and coos of pigeons, and the shouts and beeps of drivers in traffic.

Photosensitisation Giuliana Moreno, Roy H. Pottier, Terence G. Truscott, 2013-06-29 Radiation induces a variety of chemical processes in biological tissues. This volume is a synthesis of up-to-the-minute reviews on such photochemical and photobiological sensitized reactions with particular relevance to photomedicine. The first part gives a description of experimental techniques for the study of the primary processes after radiation absorption by biological systems. It is followed by chapters on singlet oxygen and photomedicine, considering both phototherapy and photochemotherapy. These sections also discuss the next generation of potential photosensitizing drugs.

Procedures and Protocols in the Neurocritical Care Unit Niraj Arora, 2022-01-28 This practical book covers neuro-critical care procedures performed in medical or surgical ICU and different procedures dedicated to acute neurological care. The book's format allows for quick decisions about care and protocols while treating neurologically injured patients. Divided into two sections, the first focuses on procedures. The outlines of these chapters include indication, technique, types of kits available, and challenges. The second section covers the protocols; these chapters feature flowcharts, drugs/device, doses of drugs, description of device, indication, evidence, and future prospects. This succinct guide will serve as a go-to reference for residents, fellows, intensivists, or any healthcare personnel within neuro-critical care unit.

Velocity ,2007 This storyline addresses the only question mark on O'Malley's career -- the Lavelle raids of February 1972. Using appropriate Nixon White House audio recordings and top secret messages (sent by the Joint chiefs of Staff to Vietnam) that were acquired through the Freedom of Information Act, Aloysius and Patrick Casey rescued from character assassination the reputation not only of Jerry O'Malley but also the reputation of Gen John D. Lavelle. They reveal the real culprit in the matter -- the Nixon White House.--AU Press web site.

Before and After Superflat Adrian Favell,2011 This is a history of the Japanese art world from 1990 up to the tsunami of March 2011, and its struggle to find a voice amidst Japan's economic decline and China's economic ascent. It looks at how the pop-culture fantasies of Takashi Murakami, Yoshitomo Nara and the other artists of the Superflat movement came to dominate the art of Japan today. It also delves into what lies behind their imagery of a childish and decadent society unable to face reality.

Quantile Regression Roger Koenker,2005-05-05 Quantile regression is gradually emerging as a unified statistical methodology for estimating models of conditional quantile functions. By complementing the exclusive focus of classical least squares regression on the conditional mean, quantile regression offers a systematic strategy for examining how covariates influence the location, scale and shape of the entire response distribution. This monograph is the first comprehensive treatment of the subject, encompassing models that are linear and nonlinear, parametric and nonparametric. The author has devoted more than 25 years of research to this topic. The methods in the analysis are illustrated with a variety of applications from economics, biology, ecology and finance. The treatment will find its core audiences in econometrics, statistics, and applied mathematics in addition to the disciplines cited above.
