Techwise Infant and Toddler Teachers Patricia A. Cantor, Mary M. Cornish, 2016-10-01 Infants and toddlers—the so-called “touchscreen generation” — are living in a screen media-saturated world. They are the target market for ever-growing numbers of apps, TV shows, electronic toys, and e-books. Making sense of the complex issues associated with screen media in the lives of children under 3 can be challenging for the adults who care for them. There is a strong need among teachers (and parents) of infants and toddlers for guidance related to the appropriate role of screen media in early care and education. Unlike most other books about technology in early childhood, this book focuses specifically on infants and toddlers. It explores why and how infant and toddler teachers need to be techwise in order to understand the implications of screen media for children’s learning and development. The book serves as a single, accessible resource to relevant research findings from the fields of pediatric medicine, child development, developmental psychology, social and behavioral sciences, and brain science. It provides infant/toddler teachers with a comprehensive approach and strategies to guide their decisionmaking and promote practices that are evidence-based, family-centered, culturally responsive, and collaborative. It is a call for teachers to think carefully and act wisely when making decisions about screen media—both the technology that they are encountering now and the technology they will encounter in the future—in order to optimize the learning and healthy development of infants and toddlers.

Great Books for Babies and Toddlers Kathleen Odean, 2008-12-18 “The ideal time to begin sharing books with children is during babyhood, even with children as young as six weeks.” —Starting Out Right National Research Council All parents hope to give their children the best possible start in life. Many of them know it’s a good idea to read to their children at a very young age, not with the goal of teaching their kids to read, but with the joy of having special time together looking at pictures and playing with words. Carefully chosen books that introduce children to the pleasures of language, simple story structure, and wonderful artwork are the foundation for a future love of books. *Great Books for Babies and Toddlers* is the first book of its kind—a guide to the best age appropriate children’s books available. Compiled by Kathleen Odean, former Chair of the Newbery Award Committee, *Great Books for Babies and Toddlers* provides lively annotations for more than five hundred books, divided into two helpful categories: Nursery Rhymes, Fingerplays, and Songs; and Picture-Story Books for the Very Young. With story selections ranging from such classics of children’s literature as *Goodnight Moon* and *Where’s Spot?* to excellent new books like *How Does a Dinosaur Say Good Night?* and *Buzz!*, *Great Books for Babies and Toddlers* will be more than a cherished guide for parents—it will also be a child’s first step in the lifelong adventure of reading.

Children’s Internet Search Elizabeth Foss, Allison Druin, 2014-10-01 Searching the Internet and the ability to competently use search engines are increasingly becoming an important part of children’s daily lives. Whether mobile or at home, children use search interfaces to explore personal interests, complete academic assignments, and have social interaction. However, engaging with search also means engaging with an ever-changing and evolving search landscape. There are continual software updates, multiple devices used to search (e.g., phones, tablets), an increasing use of social media, and constantly updated Internet content. For young searchers, this can require infinite adaptability or mean being hopelessly confused. This book offers a perspective centered on children’s search experiences as a whole instead of thinking of search as a process with separate and potentially problematic steps. Reading the prior literature with a child-centered view of search reveals that children have been remarkably consistent over time as searchers, displaying the same search strategies regardless of the landscape of search. However, no research has synthesized these consistent patterns in

children's search across the literature, and only recently have these patterns been uncovered as distinct search roles, or searcher types. Based on a four-year longitudinal study on children's search experiences, this book weaves together the disparate evidence in the literature through the use of 9 search roles for children ages 7-15. The search role framework has a distinct advantage because it encourages adult stakeholders to design children's search tools to support and educate children at their existing levels of search strength and deficit, rather than expecting children to adapt to a transient search landscape.

Search Engines for Children Tatiana Gossen, 2016-01-14 The doctoral thesis of Tatiana Gossen formulates criteria and guidelines on how to design the user interfaces of search engines for children. In her work, the author identifies the conceptual challenges based on own and previous user studies and addresses the changing characteristics of the users by providing a means of adaptation. Additionally, a novel type of search result visualisation for children with cartoon style characters is developed taking children's preference for visual information into account.

Toddlers on Technology A. DeSollar, H Leathers, Patti Summers, 2013-04-08

TODDLERS ON TECHNOLOGY Does your toddler seem to know more about the iPad than you do? Welcome to the world of the Digitods: the young children born into the era of mobile technology. These kids are learning faster and better than any generation that has come before them. And they are loving it! Take a look at toddlers using an iPad. They are pictures of concentration. Their hands are moving and their eyes are constantly scanning the screen. They are in an active state of learning: their neurons are firing on all cylinders! It is not surprising that they find learning such an enjoyable activity, with the bright colors, interesting activities and cheery voices urging them on. Have you ever tried getting a Digitods attention when he is working with an iPad? It is not easy. Often, the child is so fixated on the work that he protests when he has to move on, even to something as interesting as a snack. It just underscores what teachers have always known. Good learning is addictive: the more you get, the more you want. Digitods are racing down the information superhighway and we have to be ready for them! But what does this entail? The answer to this ever-important question lies within. Patti Wollman Summers has written the first book on the subject by an early childhood educator. Ms. Summers collaborates with Heather Ibrahim-Leathers, a mom who provides many practical tips, and Ann DeSollar-Hale, PhD, a neuropsychologist who gives a full account of the research so far in our Science section. Learn why interacting with an app is so fascinating to a young child. Discover what constitutes a good app, and how to match an app to your child's temperament and learning style. Read a description of many excellent apps in our App Reviews section, and learn how to balance your child's digital work with real-life, see-saw activities. For parents of children under six who are concerned

about their childrens development in a surprisingly unfamiliar world, TODDLERS ON TECHNOLOGY is a must-read! Visit Digitod.com or ToddlersOnTechnology.com | Design & Photography by AndrewAyad.com
