The Wonder Weeks Frans X. Plooij,Hetty van de Rijt,Xaviera Plas,2017-09-05 This is not a book about how to make your child into a genius, however. We firmly believe that every child is unique and intelligent in his own way. It is a book on how to understand and cope with your baby when he is difficult and how to enjoy him most as he grows. It is about the joys and sorrows of growing with your baby.--Publisher's website.

Econometric Analysis of Cross Section and Panel Data, second edition Jeffrey M. Wooldridge,2010-10-01 The second edition of a comprehensive state-of-the-art graduate level text on microeconomic methods, substantially revised and updated. The second edition of this acclaimed graduate text provides a unified treatment of two methods used in contemporary econometric research, cross section and data panel methods. By focusing on assumptions that can be given behavioral content, the book maintains an appropriate level of rigor while emphasizing intuitive thinking. The analysis covers both linear and nonlinear models, including models with dynamics and/or individual heterogeneity. In addition to general estimation frameworks (particular methods of moments and maximum likelihood), specific linear and nonlinear methods are covered in detail, including probit and logit models and their multivariate, Tobit models, models for count data, censored and missing data schemes, causal (or treatment) effects, and duration analysis. Econometric Analysis of Cross Section and Panel Data was the first graduate econometrics text to focus on microeconomic data structures, allowing assumptions to be separated into population and sampling assumptions. This second edition has been substantially updated and revised. Improvements include a broader class of models for missing data problems; more detailed treatment of cluster problems, an important topic for empirical researchers; expanded discussion of generalized instrumental variables (GIV) estimation; new coverage (based on the author's own recent research) of inverse probability weighting; a more complete framework for estimating treatment effects with panel data, and a firmly established link between econometric approaches to nonlinear panel data and the generalized estimating equation literature popular in statistics and other fields. New attention is given to explaining when particular econometric methods can be applied; the goal is not only to tell readers what does work, but why certain obvious procedures do not. The numerous included exercises, both theoretical and computer-based, allow the reader to extend methods covered in the text and discover new insights.

Getting Your Baby to Sleep the Baby Sleep Trainer Way Natalie Willes,2017-05-22 Certified sleep consultant Natalie Willes, known also as The Baby Sleep Trainer, shares her effective and efficient sleep training method in her new book, Getting Your Baby to Sleep the Baby Sleep Trainer Way. Thousands of families throughout the world have used the Baby Sleep Trainer method to help their infants and toddlers learn to sleep through the night and take healthy naps, all with the fewest tears possible. Backed by thorough scientific data and years of professional experience, the Baby Sleep Trainer Method offers parents a tried and true solution for children aged 16 weeks through 3.5 years. Step-by-step, comprehensive contents include: The science of baby sleep habits How to prepare your child's room for optimal sleep Discussions on cortisol and crying in babies Creating healthy sleep habits with newborns Exactly when and how to start sleep training for nighttime sleep and naps Tips and tricks for multiples Troubleshooting common sleep training issues and pitfalls Detailed eat-wake-sleep schedules for children on 3, 2, and 1 nap Sleep training toddlers and children in beds Praise for the Baby Sleep Trainer method: My 5 month old was waking up every 2-3 hours at night and I was seriously sleep deprived. My sleep deprivation was affecting every aspect of my life. I read several books on sleep training, as well as blogs and websites. I was at my wits end. After following the program for two weeks, my child was consistently sleeping 11-12 hours a night and was on a consistent schedule during the day! This program has literally given me my life back. - McKel Neilsen Two months ago I was at the end of my sleep rope with our 6-month-old, boy/girl twins. Exhausted doesn't begin to explain it, I felt desperate. After using the Baby Sleep Trainer Method we feel like we have our lives back. The babies are happy and well rested, and so are we! We have our evenings back to cook dinner, spend time with our 4-year-old daughter, hang out together, and actually do things we enjoy. The process took commitment but has been absolutely worth every bit of it. - Beth Oller, MD Using the Baby Sleep Trainer Method, my daughter quickly went to a routine nap schedule during the day and sleeping through the night from 6:30pm to 6:30am! Also, rather than the exhausting and often unsuccessful rocking or soothing or feeding to sleep, we were able to put her down awake in her crib and she would fall asleep on her own in just a few minutes. It was just incredible. - Online Review

TIP 35: Enhancing Motivation for Change in Substance Use Disorder Treatment (Updated 2019) U.S. Department of Health and Human Services,2019-11-19 Motivation is key to substance use behavior change. Counselors can support clients' movement toward positive changes in their substance use by identifying and enhancing motivation that already exists. Motivational approaches are based on the principles of person-centered counseling. Counselors' use of empathy, not authority and power, is key to enhancing clients' motivation to change. Clients are experts in their own recovery from SUDs. Counselors should engage them in collaborative partnerships. Ambivalence about change is normal. Resistance to change is an expression of ambivalence about change, not a client trait or characteristic. Confrontational approaches increase client resistance and discord in the counseling relationship. Motivational approaches explore ambivalence in a nonjudgmental and compassionate way.

Conditional Cash Transfers Ariel Fiszbein, Norbert R. Schady, 2009-02-09 Conditional Cash Transfer (CCT) programs aim to reduce poverty by making welfare programs conditional upon the receivers' actions. That is, the government only transfers the money to persons who meet certain criteria. These criteria may include enrolling children into public schools, getting regular check-ups at the doctor's office, receiving vaccinations, or the like. They have been hailed as a way of reducing inequality and helping households break out of a vicious cycle whereby poverty is transmitted from one generation to another. Do these and other claims make sense? Are they supported by the available empirical evidence? This volume seeks to answer these and other related questions. Specifically, it lays out a conceptual framework for thinking about the economic rationale for CCTs; it reviews the very rich evidence that has accumulated on CCTs; it discusses how the conceptual framework and the evidence on impacts should inform the design of CCT programs in practice; and it discusses how CCTs fit in the context of broader social policies. The authors show that there is considerable evidence that CCTs have improved the lives of poor people and argue that conditional cash transfers have been an effective way of redistributing income to the poor. They also recognize that even the best-designed and managed CCT cannot fulfill all of the needs of a comprehensive social protection system. They therefore need to be complemented with other interventions, such as workfare or employment programs, and social pensions.

First-year Maternal Employment and Child Development in the First 7 Years Jeanne Brooks-Gunn, 2010 Using data from the first two phases of the NICHD Study of Early Child Care, the links between maternal employment in the first 12 months of life and cognitive, social, and emotional outcomes for children at age 3, age 4.5, and first grade are examined. Families in which mothers worked full time (55%), part time (23%) or did not work in the first year (22%) are compared. Most families involved non-Hispanic White children although some analyses did involve African-American children. Structural equation modeling results indicated that, on average, the associations between first-year maternal employment and later cognitive, social, and emotional outcomes are neutral because negative effects, where present, are offset by positive effects. The results confirmed that maternal employment in the first year of life may confer both advantages and disadvantages and that for the average non-Hispanic White child those effects balance each other.

Fair Play Eve Rodsky, 2019-10-01 A REESE'S BOOK CLUB PICK A hands-on, real talk guide for navigating the hot-button issues that so many families struggle with.-- Reese Witherspoon Tired, stressed, and in need of more help from your partner? Imagine running your household (and life!) in a new way... It started with the Sh*t I Do List. Tired of being the shefault parent responsible for all aspects of her busy household, Eve Rodsky counted up all the unpaid, invisible work she was doing for her family -- and then sent that list to her husband, asking for things to change. His response was... underwhelming. Rodsky realized that simply identifying the issue of unequal labor on the home front wasn't enough: She needed a solution to this universal problem. Her sanity, identity, career, and marriage depended on it. The result is Fair Play: a time- and anxiety-saving system that offers couples a completely new way to divvy up chores and responsibilities. Rodsky interviewed more than five hundred men and women from all walks of life to figure out what the invisible work in a family actually entails and how to get it all done efficiently. With four easy-to-follow rules, 100 household tasks, and a series of conversation starters for you and your partner, Fair Play helps you prioritize what's important to your family and who should take the lead on every chore from laundry to homework to dinner. Winning this game means rebalancing your home life, reigniting your relationship with your significant other, and reclaiming your Unicorn Space -- as in, the time to develop the skills and passions that keep you interested and interesting. Stop drowning in to-dos and lose some of that invisible workload that's pulling you down. Are you ready to try Fair Play? Let's deal you in.

SIDS Sudden Infant and Early Childhood Death Roger W. Byard, Jhodie R Duncan, 2018-04 This volume covers aspects of sudden infant and early childhood death, ranging from issues with parental grief, to the most recent theories of brainstem neurotransmitters. It also deals with the changes that have occurred over time with the definitions of SIDS (sudden infant death syndrome), SUDI (sudden unexpected death in infancy) and SUDIC (sudden unexpected death in childhood). The text will be indispensable for SIDS researchers, SIDS organisations, paediatric pathologists, forensic pathologists, paediatricians and families, in addition to residents in training programs that involve paediatrics. It will also be of use to other physicians, lawyers and law enforcement officials who deal with these cases, and should be a useful addition to all medical examiner/forensic, paediatric and pathology departments, hospital and university libraries on a global scale. Given the marked changes that have occurred in the epidemiology and understanding of SIDS and sudden death in the very young over the past decade, a text such as this is very timely and is also urgently needed.

She-ology, The She-quel Sherry A. Ross MD, 2020-02-04 With She-ology—Dr. Sherry Ross’s bestselling book about the questions, answers, and misunderstandings that women have about their vaginas—the proverbial floodgates were opened. After hearing from countless women across the country—from all ages and stages of life—Dr. Sherry realized the necessity to address the topics not covered in her first book. With the same compassion, expertise, and humor she used to answer some of the most probing questions about the care and maintenance of the vagina, Dr. Sherry continues her dialogue to further her vagina revolution...a revolution that’s essential for women in embracing their sexuality, identity, and sense of selves.

Ultimate Price Howard Steven Friedman, 2021-05-05 How much is a human life worth? Individuals, families, companies, and governments routinely place a price on human life. The calculations that underlie these price tags are often buried in technical language, yet they influence our economy, laws, behaviors, policies, health, and safety. These price tags are often unfair, infused as they are with gender, racial, national, and cultural biases that often result in valuing the lives of the young more than the old, the rich more than the poor, whites more than blacks, Americans more than foreigners, and relatives more than strangers. This is critical since undervalued lives are left less-protected and more exposed to risk. Howard Steven Friedman explains in simple terms how economists and data scientists at corporations, regulatory agencies, and insurance companies develop and use these price tags and points a spotlight at their logical flaws and limitations. He then forcefully argues against the rampant unfairness in the system. Readers will be enlightened, shocked, and, ultimately, empowered to confront the price tags we assign

to human lives and understand why such calculations matter.

Sensitivity Analysis: Matrix Methods in Demography and Ecology Hal Caswell,2019-04-02 This open access book shows how to use sensitivity analysis in demography. It presents new methods for individuals, cohorts, and populations, with applications to humans, other animals, and plants. The analyses are based on matrix formulations of age-classified, stage-classified, and multistate population models. Methods are presented for linear and nonlinear, deterministic and stochastic, and time-invariant and time-varying cases. Readers will discover results on the sensitivity of statistics of longevity, life disparity, occupancy times, the net reproductive rate, and statistics of Markov chain models in demography. They will also see applications of sensitivity analysis to population growth rates, stable population structures, reproductive value, equilibria under immigration and nonlinearity, and population cycles. Individual stochasticity is a theme throughout, with a focus that goes beyond expected values to include variances in demographic outcomes. The calculations are easily and accurately implemented in matrix-oriented programming languages such as Matlab or R. Sensitivity analysis will help readers create models to predict the effect of future changes, to evaluate policy effects, and to identify possible evolutionary responses to the environment. Complete with many examples of the application, the book will be of interest to researchers and graduate students in human demography and population biology. The material will also appeal to those in mathematical biology and applied mathematics.

Texas School Finance Reform José Angel Cárdenas,1997 A master story-teller, Dr. Jose A. Cardenas, offers us an insider's view of the 28-year history of school finance in Texas. Dr. Cardenas is the founder & director emeritus of IDRA & is the only person who has been actively involved in the entire school finance reform effort since the early days of the RODRIGUEZ VS. SAN ANTONIO ISD litigation when he was superintendent of the Edgewood Independent School District. More than a history, this book provides a blueprint for persons interested in bringing about future reform in schools & other social institutions. Beginning with a description of the Texas system in 1950, the account covers court cases, legislation, & advocacy efforts & concludes with the status & future of school finance reform. Personal vignettes sprinkled throughout offer glimpses of those special untold moments that impacted history. Much of this volume - including the myths of school finance & lessons learned - relate to reform efforts in other states as well. Dr. James A. Kelly, president of the National Board of Professional Teaching Standards, provides a foreword, Fighting the Good Fight, describing Dr. Cardenas as a trailblazer & pioneer. (ISBN 1-878550-63-2; 1997; 387 pages; hardback) Distributed exclusively by the Intercultural Development Research Association (IDRA); 210-684-8180; FAX: 210-684-5389; E-mail: idra@idra.org; URL: www.idra.org.
