The Second Twelve Months of Life Frank Caplan, Theresa Caplan, 1982-10 Your baby's second year is a wondrous and challenging experience for parents and child as your baby reaches out physically and emotionally for the world beyond mommy and daddy -- to friends, to toys, to sights, sounds, thoughts and words. In these twelve months you will see your baby communicating, identifying, differentiating, recognizing and remembering. Your baby will probably begin to walk alone, run and jump, play simple instructive games, imitate your actions, sing and dance to music, and increasingly demonstrate a desire to do it myself. By the end of this milestone year, your baby will show an expanding range of emotions and ability to express them, show off for an audience, probably talk several dozen words and be able to give as well as receive love.

The Art and Science of Making the New Man in Early 20th-Century Russia Yvonne

Howell,Nikolai Kremmentsov,2021-12-02 The idea that morally, mentally, and physically superior 'new men' might replace the currently existing mankind has periodically seized the imagination of intellectuals, leaders, and reformers throughout history. This volume offers a multidisciplinary investigation into how the 'new man' was made in Russia and the early Soviet Union in the first third of the 20th century. The traditional narrative of the Soviet 'new man' as a creature forged by propaganda is challenged by the strikingly new and varied case studies presented here. The book focuses on the interplay between the rapidly developing experimental life sciences, such as biology, medicine, and psychology, and countless cultural products, ranging from film and fiction, dolls and museum exhibits to pedagogical projects, sculptures, and exemplary agricultural fairs. With contributions from scholars based in the United States, Canada, the UK, Germany and Russia, the picture that emerges is emphatically more complex, contradictory, and suggestive of strong parallels with other 'new man' visions in Europe and elsewhere. In contrast to previous interpretations that focused largely on the apparent disconnect between utopian 'new man' rhetoric and the harsh realities of everyday life in the Soviet Union, this volume brings to light the surprising historical trajectories of 'new man' visions, their often obscure origins, acclaimed and forgotten champions, unexpected and complicated results, and mutual interrelations. In short, the volume is a timely examination of a recurring theme in modern history, when dramatic advancements in science and technology conjoin with anxieties about the future to fuel dreams of a new and improved mankind.
