Open Space New Media Documentary Patricia R. Zimmermann, Helen De Michiel, 2017-11-22 Open Space New Media Documentary examines an emerging and significant area of documentary practice in the twenty-first century: community-based new media documentary projects that move across platforms and utilize participatory modalities. The book offers an innovative theorization of these collaborative and collective new media practices, which the authors term open space, gesturing towards a more contextual critical nexus of technology, form, histories, community, convenings, collaborations, and mobilities. It looks at a variety of low cost, sustainable and scalable documentary projects from across the globe, where new technologies meet places and people in Argentina, Canada, India, Indonesia, Peru, South Africa, Ukraine, and the USA.

*A Source Book for Mediaeval History : Selected Documents illustrating the History of Europe in the Middle Age* Oliver J. Thatcher, Edgar Holmes McNeal, 1968 *A Source Book for Mediaeval History : Selected Documents illustrating the History of Europe in the Middle Age* It will be observed that we have made use chiefly of documents, quoting from chronicles only when it seemed absolutely necessary. An exception to this general principle is found in section I, where a larger use of chronicles was rendered necessary by the lack of documentary sources for much of the period covered; but it is perhaps unnecessary to apologize for presenting selections from the important histories of Tacitus, Gregory, Einhard, and Widukind. In the matter of form (translation, omissions, arrangements, notes, etc.), we were guided by considerations of the purpose of the book. The style of most of the documents in the original is involved, obscure, bombastic, and

repetitious. A faithful rendition into English would often be quite unintelligible. We have endeavored to make a clear and readable translation, but always to give the correct meaning. If we have failed in the latter it is not for want of constant effort. We have not hesitated to omit phrases and clauses, often of a parenthetical nature, the presence of which in the translation would only render the passage obscure and obstruct the thought. As a rule we have given the full text of the body of the document, but we have generally omitted the first and last paragraphs, the former containing usually titles and pious generalities, and the latter being composed of lists of witnesses, etc. We have given a sufficient number of the documents in full to illustrate these features of mediæval diplomatics. All but the most trivial omissions in the text (which are matters rather of form of translation) are indicated thus: ... Insertions in the text to explain the meaning of phrases are inclosed in brackets [ ]. Quotations from the Bible are regularly given in the words of the Authorized Version, but where the Latin (taken from the Vulgate) differs in any essential manner, we have sometimes translated the passage literally. Within each section the documents are arranged in chronological order, except in a few cases where the topical arrangement seemed necessary. We believe that the explanatory notes in the form of introductions and foot-notes will be found of service; they are by no means exhaustive, but are intended to explain the setting and importance of the document and the difficult or obscure passages it may contain. The reference to the work or the collection in which the original is found is given after the title of practically every document; the meaning of the references will be plain from the accompanying bibliography. The original of nearly all the documents is in Latin; some few are in Greek, Old French, or German, and in such cases the language of the original is indicated.

It is impossible, of course, to give explicit directions as to the use of the book, other than the very obvious methods of requiring the student to read and analyze the documents assigned in connection with the lesson in the text-book, and of making clear to him the relation of the document to the event. It may be possible also for the teacher to give the student some notion of the meaning of historical method; e.g., the necessity of making allowance for the ignorance or the bias of the author in chronicles, or the way in which a knowledge of institutions is deduced from incidental references in documents. Suggestions of both sorts will be found in the introduction and notes. The teacher should insist on the use of such helps as are found in the book: notes, cross-references, glossary, etc. Groups of documents can be used to advantage in topical work: assigned topics worked up from authorities can be illustrated by documents selected from the book; e.g., imperial elections, papal elections, the Normans in Sicily, history of the Austrian dominions, Germans and Slavs on the eastern frontier, relations of the emperors and the popes before the investiture strife, etc.

**Flash Flaherty** Scott MacDonald, Patricia R. Zimmermann, 2021-03-02 Flash Flaherty, the much-anticipated follow-up volume to *The Flaherty: Decades in the Cause of Independent Cinema*, offers a people's history of the world-renowned Robert Flaherty Film Seminar, an annual event where participants confront and reimagine the creative process surrounding multiple document/documentary forms and modes of the moving image. This collection, which includes a mosaic of personal recollections from attendees of the Flaherty Seminar over a span of more than 60 years, highlights many facets of the Flaherty experience. The memories of the seminarians reveal how this independent film and media seminar has created a lively and sometimes cantankerous community within and beyond the

institutionalized realm of American media culture. Editors Scott MacDonald and Patricia R. Zimmermann have curated a collective polyphonic account that moves freely between funny anecdotes, poetic impressions, critical considerations, poignant recollections, scholarly observations, and artistic insights. Together, the contributors to Flash Flaherty exemplify how the Flaherty Seminar propels shared insights, challenging debates, and actual change in the world of independent media.

*The First Dynasty of the Sealand in Mesopotamia* Odette Boivin, 2018-03-19 The Sealand kingdom arose from the rebellion against Babylonian hegemony in the latter half of the 18th century BCE., forcing it to share power over Sumer and Akkad. Although its kings maintained themselves throughout the turmoil leading to the demise of the Amorite dynasty at Babylon, it remains one of the most poorly documented

Mesopotamian polities. Until recently, it was known to us mainly through its inclusion into later king lists and chronicles, but the recent publication of well over 400 archival texts from a Sealand palace, soon followed by literary and divinatory tablets, finally makes it possible to study this polity from primary sources. This book proposes a history of the Sealand kingdom based on the new evidence and a reevaluation of previously known sources. The aspects examined are: the economy — mainly the palatial administration and transformation of agricultural and animal resources; the pantheon and the palace-sponsored cult, which show that Sealand I kings may have positioned their rule in a Larsen tradition; the political history, including a discussion of the geography and the relative chronology; the recording and transmission of knowledge on the Sealand I dynasty in Mesopotamian historiography.

**Cities** Monica L. Smith, 2019-04-16 A revelation of the drive and creative flux of the metropolis over time.--Nature This is a must-read book for any city dweller with a voracious appetite for understanding the wonders of cities and why we're so attracted to them.--Zahi Hawass, author of Hidden Treasures of Ancient Egypt A sweeping history of cities through the millennia--from Mesopotamia to Manhattan--and how they have propelled Homo sapiens to dominance. Six thousand years ago, there were no cities on the planet. Today, more than half of the world's population lives in urban areas, and that number is growing. Weaving together archeology, history, and contemporary observations, Monica Smith explains the rise of the first urban developments and their connection to our own. She takes readers on a journey through the ancient world of Tell Brak in modern-day Syria; Teotihuacan and Tenochtitlan in Mexico; her own digs in India; as well as the more well-known Pompeii, Rome, and Athens. Along the way, she presents the unique

properties that made cities singularly responsible for the flowering of humankind: the development of networked infrastructure, the rise of an entrepreneurial middle class, and the culture of consumption that results in everything from take-out food to the tell-tale secrets of trash. *Cities* is an impassioned and learned account full of fascinating details of daily life in ancient urban centers, using archaeological perspectives to show that the aspects of cities we find most irresistible (and the most annoying) have been with us since the very beginnings of urbanism itself. She also proves the rise of cities was hardly inevitable, yet it was crucial to the eventual global dominance of our species--and that cities are here to stay.

The Flaherty Patricia R. Zimmermann, Scott MacDonald, 2017-05-15 This is the inspiring story of The Flaherty, one of the oldest continuously running nonprofit media arts institutions in the world, which has shaped the development of independent film, video, and emerging forms in the United States over the past 60 years. Combining the words of legendary independent filmmakers with a detailed history of The Flaherty, Patricia R. Zimmermann and Scott MacDonald showcase its history and legacy, amply demonstrating how the relationships created at the annual Flaherty seminar have been instrumental in transforming American media history. Moving through the decades, each chapter opens with a detailed history of the organization by Zimmermann, who traces the evolution of The Flaherty from a private gathering of filmmakers to a small annual convening, to today's ever-growing nexus of filmmakers, scholars, librarians, producers, funders, distributors, and others associated with international independent cinema. MacDonald expands each chapter by giving voice to the major figures in the evolution of independent media through transcriptions of key discussions galvanized by films shown at The Flaherty.

The discussions feature Frances Flaherty, Robert Gardner, Fred Wiseman, Willard Van Dyke, Jim McBride, Michael Snow, Hollis Frampton, Erik Barnouw, Barbara Kopple, Ed Pincus, Trinh T. Minh-ha, Bruce Conner, Peter Watkins, Su Friedrich, Marlon Riggs, William Greaves, Ken Jacobs, Kazuo Hara, Mani Kaul, Craig Baldwin, Bahman Ghobadi, Eyal Sivan, and many others.

**The Code of Hammurabi** Hammurabi, 2019-12-03 The Code of Hammurabi is a well-preserved Babylonian law code of ancient Mesopotamia, dating back to about 1754 BC. It is one of the oldest

deciphered writings of significant length in the world. The sixth Babylonian king, Hammurabi, enacted the code, and partial copies exist on a man-sized stone stele and various clay tablets. The Code consists of 282 laws, with scaled punishments, adjusting an eye for an eye, a tooth for a tooth (*lex talionis*) as graded depending on social status, of slave versus free man. Nearly one-half of the Code deals with matters of contract, establishing, for example, the wages to be paid to an ox driver or a surgeon. Other provisions set the terms of a transaction, establishing the liability of a builder for a house that collapses, for example, or property that is damaged while left in the care of another. A third of the code addresses issues concerning household and family relationships such as inheritance, divorce, paternity, and sexual behavior. Only one provision appears to impose obligations on an official; this provision establishes that a judge who reaches an incorrect decision is to be fined and removed from the bench permanently. A few provisions address issues related to military service. Hammurabi ruled for nearly 42 years, c. 1792 to 1750 BC according to the Middle chronology. In the preface to the law, he states, Anu and Bel called by name me, Hammurabi, the exalted prince, who feared Marduk, the patron god of Babylon (The Human Record, Andrea & Overfield 2005), to bring about the rule in the land. On the stone slab there are 44 columns and 28 paragraphs that contained 282 laws. The laws follow along the rules of 'an eye for an eye'.

The Dawn of Astronomy J. Norman Lockyer, 2006-04-28 A pioneer in the fields of astrophysics and astro-archeology, J. Norman Lockyer believed that ancient Egyptian monuments were constructed in strict relation to the stars. In this celebrated study, he explores the relationship between astronomy and architecture in the age of the pharaohs. Lockyer addresses one of the many points already extensively

investigated by Egyptologists: the chronology of the kings of Egypt. All experts are in accord regarding the identity of the first monarch, but they cannot agree upon the dates of his reign within a thousand years. The author contends that by applying a knowledge of astronomy to the actual site orientation of the region's pyramids and temples, accurate dating can be achieved. In order to accomplish this, Lockyer had to determine the level of the ancient Egyptian ideas of astronomy. Some of his inferences have been invalidated by subsequent scholarship, but many of his other conclusions stand firm and continue to provide sensational leads into contemporary understanding of archaic astronomy.

**Urban Space and Cityscapes** Christoph Lindner, 2006-04-18 From the verticals of New York, Hong Kong and Singapore to the sprawls of London, Paris and Jakarta, this interdisciplinary volume of new writing examines constructions, representations, imaginations and theorizations of 'cityscapes' in modern and contemporary culture. With specially-commissioned essays from the fields of cultural theory, architecture, film, literature, visual art and urban geography, it offers fresh insight into the increasingly complex relationship between urban space, cultural production and everyday life. This volume draws on critical urban studies and moves beyond familiar cultural representations of the city by considering urban planning and architecture. Organized under three inter-related themes - image, text and form - essay topics range from the examination of cyberpunk skylines, pagan urbanism and the cinema of urban disaster, to the analysis of iconic city landmarks such as the twin towers, the London Eye and the Judisches Museum

Berlin. Covering a diverse range of cities, including Berlin, Chicago, Jakarta, Johannesburg, Hong Kong, London, Los Angeles, Paris, and Venice, this fantastic resource for students, scholars and researchers alike, works expertly at the intersections of visual, material, and literary culture.
