Model Rules of Professional Conduct American Bar Association. House of Delegates, Center for Professional Responsibility (American Bar Association), 2007 The Model Rules of Professional Conduct provides an up-to-date resource for information on legal ethics. Federal, state and local courts in all

jurisdictions look to the Rules for guidance in solving lawyer malpractice cases, disciplinary actions, disqualification issues, sanctions questions and much more. In this volume, black-letter Rules of Professional Conduct are followed by numbered Comments that explain each Rule's purpose and provide suggestions for its practical application. The Rules will help you identify proper conduct in a variety of given situations, review those instances where discretionary action is possible, and define the nature of the relationship between you and your clients, colleagues and the courts.

Moonport Charles D. Benson, William Barnaby Faherty, 1978

Moon Launch! Charles D. Benson, William B. Faherty, 2020-10-15 The one thing for which this century will be remembered 500 years from now was: This was the century when we began the exploration of space.--Arthur M. Schlesinger Tributes to Moonport: A History of Apollo Launch Facilities and Operations A thorough account of the complex scientific, engineering, and managerial efforts that undergirded the astounding events that the National Aeronautics and Space Administration carried out.--Journal of American History Another simply superb NASA official history. . . . Construction, administration, and technology are carefully interwoven in an unusually candid and frank treatment of the history of America's first lunar launching facility.--Aerospace Historian Moon Launch! re-creates the exciting story of the astronauts and engineers, scientists and technicians, politicians and public citizens who expanded the world's understanding of humanity's potential, the people responsible for the Project Apollo flights to the moon. Through their teamwork at the Kennedy Space Center, Cape Canaveral became the spaceport for

the nation and, in the mind of many, the gateway to the universe. A companion to Gateway to the Moon and also part of the 1978 NASA History Series Moonport volume, this illustrated book describes the seven missions to the moon launched between 1969 and 1972. With the exception of the abortive Apollo 13 flight, all landed successfully. As the story progresses, astronauts explore the moon's surface in the lunar rover (complete with bucket seats and power steering), set up experiments, and bring back hundreds of pounds of lunar geological samples. The book concludes with a description of the last and most spectacular liftoff, Apollo 17, launched on a dark December night before a crowd of nearly 500,000 visitors. Charles D. Benson, a retired colonel of the U.S. Army, is the coauthor of the official history of the Skylab orbital workshop. William B. Faherty, director of the Museum of the Western Jesuit Missions in Hazelwood, Missouri, retired professor of history at St. Louis University, and archivist emeritus of the Midwest Jesuit Archives, is the author of 25 books, including the historical novel The Call of Pope Octavian.

When Men Behave Badly David Buss, 2021-04-27 A leading evolutionary psychologist and sex researcher provides a unified new theory of sexual conflict and shows how its battles play out in the bar room, the bedroom, and the boardroom. Sexual conflict permeates ancient religions, from injunctions about thy neighbor's wife to the permissible rape of infidels. It is etched in written laws that dictate who can and cannot have sex with whom. Its manifestations shape our sexual morality, evoking approving accolades or contemptuous condemnation. It produces sexual double standards that flourish even in the most sexually egalitarian cultures on earth. And although every person alive struggles with sexual conflict, most of us see only the tip of the iceberg: dating deception, a politician's unsavory sexual grab, the slow crumbling of a

once-happy marriage, a romantic breakup that turns nasty. When *Men Behave Badly* shows that this battle of the sexes is deeper and far more pervasive than anyone has recognized, revealing the hidden roots of sexual conflict—roots that originated over deep evolutionary time—which define the sexual psychology we currently carry around in our 3.5-pound brains. Providing novel insights into our minds and behaviors, *When Men Behave Badly* presents a unifying new theory of sexual conflict, and offers practical advice for men and women seeking to avoid it.

Encyclopedia of Evolutionary Psychological Science Todd K. Shackelford, Viviana A. Weekes-Shackelford, 2021-03-20 This comprehensive, twelve volume reference work reflects the interdisciplinary influences on evolutionary psychology and serves as a major resource for its history, scientific contributors and theories. It draws on biology, cognitive science, anthropology, psychology, economics, computer science and paleoarchaeology to provide a multifaceted picture of behavioral adaptation in humans and how it adds to our academic and clinical understanding. Edited by a noted figure in evolutionary psychology, with many seminal and renowned contributors, this encyclopedia offers the full breadth of an area that is the forefront of behavioral thinking and investigation.

Sperm Competition and the Evolution of Animal Mating systems Robert L. Smith,2012-12-02 Sperm Competition and the Evolution of Animal Mating Systems describes the role of sperm competition in selection on a range of attributes from gamete morphology to species mating systems. This book is organized into 19 chapters and begins with the conceptualization of sperm competition as a subset of sexual selection and its implications for the insects. The following chapter describes the relationship between multiple mating and female fitness, with an emphasis on determining the conditions under which selection on females is likely to counteract selection on males for avoiding sperm competition. Other chapters consider the female perspective on sperm competition; the evolutionary causation at the level of the individual male gamete; and the correlation of high paternal investment and sperm precedence in the

insects. The remaining chapters are arranged phylogenetically and explore the sperm competition in diverse animal taxa, such as the *Drosophila*, *Lepidoptera*, spiders, amphibians, and reptiles. These chapters also cover the evolution of direct versus indirect sperm transfer among the arachnids or the problem for kinship theory presented by multiple mating and sperm competition in the Hymenoptera. This book further discusses the remarkable potential for sperm competition among certain temperate bat species whose females store sperm through winter hibernation and the mixed strategies and male-caused female genital trauma as possible sperm competition adaptations in poeciliid fishes. The concluding chapter examines the predictions concerning testes size and mating systems in the primates and the possible role of sperm competition in human selection. This book is of great value to reproductive biologists and researchers.
