Bad Credit Score? Improve Your Credit Score Into An Awesome One Nick Dubay, 2012-07-30 ABOUT THE BOOK Having a good credit score will save you thousands of dollars over your lifetime as well as give you the opportunity to finance many projects and purchases that you would otherwise not have access to. Your credit score also reflects your financial sense in that many employers and corporations use it to make judgments about you. Bearing these facts in mind, it is easy to see how improving your credit score immediately improves your access to money and better interest rates. Raising your credit score is often a daunting task, at least in theory, since many people do not fully understand how a credit score is scored or what affects it, whether positively or negatively. Relax, you've already taken the first step in fixing your own credit — you're reading this ebook! When it comes to your credit score, information and education are as crucial as establishing and maintaining positive financial habits. Your credit score is a snapshot of the potential risk you pose to those willing to lend you money, like a credit card company or bank. It is merely one part or factor that helps determine your eligibility for a credit card, and is not a personal judgment against you. Other factors that go into making a credit decision can include your total debt-to-income ratio, employment history, and income levels. Even looking at mortgages and home loans, the consumer has to realize just how important a factor their credit score is in getting a loan — it requires the same degree of consideration that the loan's interest rate and terms do. Here's a San Francisco Chronicle article that talks about just that topic. Because the world of credit scores is so murky, people often give up on even trying to understand it or trying to improve their financial positions and score. It is really quite simple to improve your score and the following pages will give you a better understanding of how to make positive changes while empowering you to build and

maintain an informed position on money and your finances. There are dozens of credit score websites and products available for purchase. Some of these products promise to help raise your credit score or help you monitor your score exclusively. Know that by law you are allowed to access your credit score for free at least once per year. Also, many of the products and services being offered to you are poor substitutes for a little education and research, just like you are doing here with this ebook. There is nothing that a credit score service can do for you that you cannot already accomplish yourself with a little bit of knowledge and perseverance. You do not need to spend a dime to effectively monitor and improve your credit score.

EXCERPT FROM THE BOOK The next step after requesting your credit report is to better understand what goes into your score. The accounts on your credit score can count negatively against you for seven years. This means that if you had one late payment on one card or account six years ago, your score can still be affected. But by understanding this time limit, you can also help dispute inaccurate or old information on your credit score. To learn more about disputing accounts or information, please read further. Accounts can be marked as 30, 60, 90, or 120 days late, depending on how far behind you may be in payments. The longer you are past due, the worse off your score. These accounts are past due or considered delinquent by the creditors. Accounts that are charged off are those that the creditor has decided you are unlikely to pay, and charge offs should be avoided at all costs as they can negatively affect your credit score more than being 120 days late on a payment. Here's an excellent Forbes article about paying your bills on time, and how it affects your credit score.

Secrets to Repairing Your Credit Score Henry Renner,2020-10-10 Would you like to know how to max your credit scores the right way? If, yes, then permit me to share this with you... There's absolutely nothing a credit repair service can do for you that you can't do for yourself, at little or no cost. Yes, nothing! And that includes deleting wrong information. And you will agree with me that hiring a credit repair company can be a bit expensive, ranging from hundreds to thousands of dollars. You see, on April 1, 1997, the Credit Repair Organizations Act came into effect in response to the proliferation of credit repair scams. In effect, the act ensures that companies offering credit repair services: Do not take consumers' money until they've fully delivered the service promised. Provide their clients with a written contract that outlines the services to be provided including the terms and conditions of payment. The act allows consumers three days to withdraw from the contract. Are not allowed to suggest or ask that the client misleads credit reporting companies about their accounts or change your identity in order to alter one's credit history. Cannot consciously make false or deceptive claims with regards to their services that they are offering or are capable of offering. Cannot demand that you append your signature to any document that states that you are forfeiting your rights under the Credit Repair Organization Act. The truth is, there is no quick fix for your credit. Negative, but accurate information will stay for 7-10 years on your credit report. But then, there are some steps that you can take to polish and set up a more positive credit history and boost your credit scores. It is also important to note that a bad credit affects you now, and in the years to come. A bad credit score has a negative impact on everything ranging from hire purchasing to obtaining a mortgage. And so, the importance

of a good credit cannot be overstated. Factors that contribute to bad credit ratings include; missed payments from mortgages, loans, credit card payments, etc. Basically, a bad credit rating may arise from an inability to make timely payments on any money that you've borrowed from building societies, banks, or creditors. But just consider for a moment, if you were in the prime ratings, you would do anything and everything to not drop any points, whatsoever. And then, there's practically no way to know how many points you would lose for missing out on payments, and you would totally be in the dark about what is happening. And that's why I've put this little guide together - to help you improve your credit scores. Would you like to get started? Then get a copy of this guide and you're good to go!

Credit Repair Secrets Luke Allen, 2020-05-17 Are you looking for a guide to fix your personal credit? Then keep reading... Having bad credit affects not just what you want now, but also what you can have in years to come. Your credit score will affect everything from hire purchasing to getting a mortgage. That is why it is vital you keep any good credit that you have and keep the bad credit ratings away. Bad credit ratings generally come from missed payments on things such as loans, mortgages, and credit card payments. To sum it all up, bad credit comes from any time that you do not pay back any money that you have borrowed from banks, building societies or other lenders. But just imagine, if you were in the prime sector of ratings you may not drop any points whatsoever. That might not sound fair, but it is true. Also, there is no way to know for sure how many points you will drop for missing payments. It is completely unpredictable, and you never know exactly what is happening. This book covers the following topics: Basics of credit repair Is credit repair ethical? Self-credit repair step The debt snowball What is section 609 General advice to see success with 609 How to proceed with the letters The templates you need (609 letter) How to boost your credit score 100+ points? How to find credit cards with guaranteed approval? What the credit bureaus and the lawyers do not want you to know How credit scores are calculated Right mindset for credit management And Much More! Credit company bosses are getting fat on the profits you give them in interest payments each month. Do not let that happen! That is why you should never have more debt than a quarter of what you earn per year. This way you can be sure you can make the payments on time. Other than a mortgage or maybe a business loan, you should never get yourself into any more debt for whatever reason. Remember: Any such debit will hang around your neck for months, maybe even years. If you need to build up credit because you do not have any or because you have extremely bad credit, then you need a plan to get back on the right track. Pretty much everything you do in your life affects your credit rating, even things that you would never imagine If you have no credit but you manage to get a credit card, do you think it is better to pay the balance all off at once every month, or pay it off in installments? Many people would say pay it off every month. After all, that way you have no debt, pay no interest, and establish yourself as a reliable person, right? But think about it: If you pay it off in full every month you are effectively not borrowing any money; therefore, you do not have any score on your credit rating. If you pay the debt off in installments you are building up your good credit rating-provided you make the minimum payment on time. Ready to get started? Click Buy Now!
