30 Over 40 Holly O. Brien,2011-05 Holly O'Brien began her fitness career in her early 20's in several fitness clubs, worked with pro ball players then gave it up for stunt work in film. She later migrated her entertainment career into behind the scenes technical operations in television broadcasting, post production and animation. That was until one day while managing a video-on-demand control room arguing or the picture quality of a movie she had an epiphany; why was she doing that which would only keep people on the couch? She wanted people to get off the couch and go exercise and she realized her own career certainly wasn't helping.After careful review of the challenges involved she gave up her 23 year entertainment career and re-certified her pedigrees with International Sports Sciences Association, teamed up as a coach for a Fitness Boot Camp and took on a roster of private clients only to discovery what seemed to be a unilateral problem. Folks were stuck, really stuck and she was more stunned by why.She decided to approach a fix from a very different angle; one that folks could do on their own. A Fitness Guide written with a light hearted spirit to assist folks who wish to train themselves. As a labor of love she hopes you'll drag this book around with you and use it often to assist with clearing up the confusion, inspire new activities where they may not be any, bury old frustrations forever and have some fun along the way.

The Secret Life of Bar Codes John Berry,2013-04-29 This book celebrates the 40th anniversary of the bar code and is written for those who over the years have asked the author what these bar codes are all about. It deals with why they were invented, who created them, how they are managed and used, whether they have been 'a good thing', how much longer they will last and what may replace them. It tells you how you can 'read between the lines' and 'what's in a number'. But it is not a detailed technical or historical account. It is an entertaining account full of stories and personalities designed to show that the term 'interesting bar codes' is not an oxymoron.
