No specimen left behind: mass digitization of natural history collections Vincent Smith,2012-07-20 Centuries of exploration and discovery have documented the diversity of life on Earth. Records of this biodiversity are, for the most part, distributed across varied and distinct natural history collections worldwide. This makes the task of extracting and mobilising the information within these collections an immense challenge. In this special issue of ZooKeys, 18 papers by 81 authors examine progress and prospects for mass digitising entire natural history collections. These papers provide a snapshot of activity, in what is a fast moving field that is seeing ever-increasing degrees of collaboration across disciplines and between collection-based institutions. Examples of research covered by these articles include a description to efforts digitise 30 million plant, invertebrate and vertebrate specimens at NCB Naturalis in the Netherlands; new scanning and telemicroscopy solutions to digitise the millions of pinned insect specimens held in the Australian National Insect Collection and its European and North American counterparts; citizen science projects being used to crowdsource the transcription of thousands of specimen labels and field notebooks; and new data portals providing central access to millions of biological specimens across Europe. Many of these projects deal with the unique challenges associated with major collections that have built up over several centuries, with different communities of practices and different user communities. Despite many differences, standards for collection acquisition, preservation and documentation are broadly consistent, meaning that there is sufficient common ground to bring together the enormous amounts of data that are being exposed through mass digitisation efforts. These data will become the new frontier for natural history collection management and research in the next decade.

Ridge: Day One Shawn P. B. Robinson,2021-06-07 The darkest hour is just before dawn. But with bloodthirsty Beasts cutting brief lives shorter, can one man beat the ticking clock? Rezin Hamel will protect his people until his dying breath. Resolving to carry on past every dearly departed loved one, the forty-four-year-old General has no idea how he's lived over a decade beyond the average life expectancy. But when he's shamed and cast out for an out-of-character act, he sets out to end the constant attacks from creatures staining the walls with death. Searching for answers in society's seedy underbelly, Hamel is shocked by the conditions ravaging the lower rungs of the city. But the strategic genius's quest takes a staggering turn when he's blindsided by a secret that could tear his tight-knit community to shreds. Can Hamel restore his honor and stop the carnage before he's the next one taken by the Dusk? Ridge: Day One is the action-packed first book in the Ridge dystopian thriller series. If you like fantastic worlds, heart-trembling suspense, and twisted surprises, then you'll love Shawn P. B. Robinson's peek behind the Ridge veil. Description Kate Theimer,2014-05-22 Description: Innovative Practices for Archives and Special Collections explores how archives of different sizes and types can enhance the accessibility of their holdings. The book uses eleven case studies to demonstrate innovative ideas that could be transferred into many other settings. Readers can use these as models, sources of inspiration, or starting points for new discussions. The volume will be useful to those working in archives and special collections as well as other cultural heritage organizations, and provides ideas ranging from those that require long-term planning and coordination to ones that could be immediately implemented. It also provides students and educators in archives, library, and public history graduate programs a resource for understanding the variety of ways materials are being described in the field today and the kinds of strategies archivists are using to ensure collections can be found by the people who want to use them.

Quick Guideline to Prepare Paperback Book Interior and Cover Files Using Different Applications Dr. Hidaia Mahmood Alassouli, 2021-12-31 In order to publish and sell a Book on any publishing website, you need a ready-to-print PDF layout that supports all the requirements of the publisher system. You can create the PDF independently or use other production software like InDesign, or you can buy a paid professional production service. Book cover creation is the very last creative step when publishing a book. That's because almost everything about the anatomy of a book cover is controlled by the final, edited version of the book: the trim size, paper color and number of pages all determine your covers dimensions. You need to design the cover after the final draft is finished. Book cover design is comprised of text and images. You must note: the front cover, back cover, spine, layout, picture, fonts, and other elements of the cover. The book consists of manuscript and cover. On the publishing website, you can upload your manuscript. The publishing website will automatically convert the manuscript to proofed PDF prior to publishing/printing. Depending on the publishing website, you can create your book cover using Cover Creator tool or submit your book cover in a PDF. Publishing Print books at KDP amazon kdp.amazon.com, Lulu.com and notionpress.com is straightforward, as you can just upload your manuscript as a PDF, DOC, DOCX, RTF, HTML, or TXT file. Kdp.amazon.com, notionpress.com and Lulu.com will automatically convert these file types to PDF prior to publishing/printing. You can create your book cover using Cover Creator tool within the websites. The free Cover Creator helps you to create and customize your eBook, paperback, or hardcover cover with a variety of layouts and fonts. Cover Creator uses the book details you enter during title setup and adds your book's ISBN to the barcode area on the back cover. But other publishing websites such as streetlib.com, ingramspark.com, blurb.com, press.barnesandnoble.com and feiyr.com requires from the authors to prepare the Paperback book manuscript in PDF format, and to design and submit the book cover in a PDF format according to their specifications. So, the author must have good knowledge on the formatting requirements for the book interior, and needs to create a paperback cover, using design software to be able to publish in such websites. So, when you create a paperback book, you need to format and upload two files: a manuscript file, which is the interior of your book, and a cover file, which is the outside of your book including the front, back, and spine. Here I will provide the steps on how to format both files, plus tools and resources to help you get started. The report consists from the following sections: 1. Book spine width calculator. 2. Online cover calculators. 3. Creating Barcode for the book ISBN. 4. Interior and cover files specifications for publishing at KDP amazon and using the online cover creator at KDP amazon. 5. Interior and cover files specifications for publishing at Lulu.com and using the online cover creator at Lulu.com. 6. Quick guideline for creating a bleed for your publication on Microsoft Word. 7. Creating paperback cover using Paint.net Application. 14. Creating paperback cover using Adobe Photoshop Application. 15. Creating paperback cover using Adobe InDesign Application. 16. Creating paperback interior document using Adobe InDesign Application. 17. Creating paperback interior and cover using Adobe InDesign blurb book creator. 18. References.

World without history? Digital information is volatile: with it our culture can disappear but its preservation can save us Stefano Cariolato, 2019-07-03 In the mid-twentieth century the digital revolution began with the introduction of the first electronic computers, which were first introduced into companies and in the state bodies then they spread strongly in the private houses as personal computers; later all these computers were connected to each other by a global telecommunication network called Internet, which had a massive development at the end of the century becoming the backbone of the worldwide information circulation. At the beginning of the 21st century the digital revolution was completed and the information of any kind (texts, images, video clips and TV broadcasts, music and songs, WEB pages) started to be recorded and disseminated in digital form rather than with a traditional media (paper, film, magnetic tape), with a displacement that engaged all human activities of any type, both collective and individual. While the development of digital technology continue at an accelerated pace the problem of information retention begin to arise, what was previously mainly entrusted to printing on paper and now is in abandonment phase: printed records are increasingly transformed into digital format and the new information is generated directly in electronic form. But while a book or a letter could be read directly even centuries after their writing, digital information has a short life because of the same technological development, that makes quickly obsolete any recording by irreversibly mutating both its hardware and reading software; other recordings are then volatile by their very nature, such as e-mails or WEB pages, even if they could host information that could be of value in the future. Moreover digital recordings are carried out in a great variety of different formats, sometimes incompatible with each other or subject themselves to obsolescence, thus unnecessarily complicating the task of preserving their content. Most part of human culture, gradually poured into electronic form, is now jeopardized, and we risk of delivering to posterity a world without history: this book describes the current situation and what is sought to do to remedy the danger.
