Emerge! Elza S. Maalouf,2014-10 In the Middle East, turmoil has spread quickly. Oppression, inequality, and violence have been keyed in to the very makeup of its society. But what causes a culture to emerge and prosper or stagnate and fail? How can the people take charge of their own inalienable rights to growth, freedom, and life—to keep from backsliding into the grasp of old, unhealthy ideologies and meet their need for ascendance? In Elza Maalouf’s groundbreaking new book *Emerge! The Rise of Functional Democracy in the Middle East*, we are introduced to a new paradigm for governance based on Clare Graves’ theory of Spiral Dynamics. Maalouf, the founder of the Center for Human Emergence and the Build Palestine Initiative, is an expert on the application of Spiral Dynamics in the Middle East. By placing democracy in an evolutionary, values-system context that is specific to unique, Middle Eastern characteristics, *Emerge* pioneers the foundations for necessary change. Where the West’s approach to conflict resolution has failed due to lack of memetic understanding, Maalouf’s framework for decoding the complexities of the Middle East succeeds. By weaving together the threads that make up the pattern of each culture, *Emerge* shows the crucial role memes play in creating a system of governance that truly fits. Not only does *Emerge* ask us to seek understanding before we structure and create, it shows us the necessity of teaching our youth to build their own sustainable, indigenous constructs.

Library Automation Dania Bilal,2014-03-26 Recent advances in technology such as cloud computing, recent industry standards such as RFID, bibliographic standards like RDA and BIBFRAME, the increased adoption of open source integrated library systems (ILS), and continued shift in users' expectations have increased the complexity of the decision regarding ILS for all types of libraries. Recent advances in technology such as cloud computing, recent industry standards such as RFID, bibliographic standards like RDA and BIBFRAME, the increased adoption of open source integrated library systems (ILS), and continued shift in users' expectations have increased the complexity of the decision regarding ILS for all types of libraries. In a complete re-envisioning of the previous edition, Automating Media Centers and Small Libraries: A Microcomputer-Based Approach, Dania Bilal conceptualizes library automation in the Library Automation Life Cycle (LALC) that is informed by the systems development lifecycle (SDLC). She explains how the next-generation discovery services supported in the library services platforms (LSPs) provide a single point of access to library content in all types and formats, thereby offering a unified solution to managing library operations. The book covers methods of analyzing user requirements, describes how to structure these requirements in RFPs, and details proprietary and open-source integrated library systems (ILSs) and LSPs for school, public, special, and academic libraries. Up-to-date information is provided about ILS software installation and testing, software and hardware architecture such as single- and multi-tenant SaaS and PaaS and IaaS, and usability assessment strategies for evaluating the ILS or LSP. The author concludes by describing what is likely coming next in the library automation arena.
