Mobile Tagging im Marketing Niklaus Stadler,2010-05-21 Über klassische Medien wie TV, Radio und Internet wird es immer schwieriger, noch von der Zielgruppe wahrgenommen zu werden. Erstaunlicherweise gibt es ein weit verbreitetes Medium, das kaum genutzt wird um mit Interessenten zu interagieren: Das Mobiltelefon. Es hat sich zu einem Allzweckcomputer gewandelt, über den man jederzeit auf das Internet zugreifen kann. Die umständliche Interaktion zwischen Handy und Umwelt erschwert jedoch den Einsatz des Mobile Marketing. Mobile Tagging bietet eine Lösung: Es ist wie eine gemeinsame Sprache für Handys und Objekte. Dieses Buch gibt einen Überblick über das Mobile Tagging im Marketing - über Begriff, Infrastruktur, Anwendungsmöglichkeiten und Problembereiche. Der Schwerpunkt liegt auf zwei Ausprägungen: Near Field Communication (NFC), eine Nahfunktechnik, die bereits in den kommenden Monaten Verbreitung finden könnte. Und QR-Codes, zweidimensionale Barcodes, die schon jetzt von zahlreichen Kamerahandys ausgelesen werden können.

Proceedings of the 4th International Conference on Informatics, Technology and Engineering 2023 (InCITE 2023) Markus Hartono,Hudiyo Firmanto,Connie Susilawati,2023-11-18 This is an open access book.Adaptive, Resilient & Collaborative EngineeringTowards Faster Recovery & Impactful Solutions The world in the last decade has been facing global issues such as accelerated global warming, depleting natural resources, food waste and scarcity, water contamination and shortage, energy conservation, etc. Enter the COVID-19 pandemic in 2020 and we face what people term as double disruption. Not only solutions to the above problems are becoming more critical, but they are also needed fast. Timely and effective solutions are called for so that we can recover from the pandemic while at the same time carry our efforts to better our world. It is no longer sufficient to find solutions that can only delay the negative impacts from the above problems, but it is imperative to tip the balance and reverse the impacts to our advantage. Engineers and engineering have a vital role in inventing mechanisms, systems, and/or products that can address the solutions. Digital technologies and artificial intelligence have been at the forefront of such exploration and we can expect some hints for a better future, if we continue being adaptive, resilient, and collaborative. Given the above background, Faculty of Engineering - Universitas Surabaya, will host the fourth bi-annual international conference "The 4th International Conference on Informatics, Technology and Engineering 2023 (InCITE 2023)" in Yogyakarta, Indonesia, September 14th–15th, 2023. This event is a continuation of the past events successfully held in 2017, 2019, and 2021. We invite academia and business practitioners all around the globe to share ideas and best practices relevant to the above conference topic. We hope that this event can also serve as a platform of gathering for anyone interested in exploring potential solutions of our common problems today. Accepted and presented paper will be submitted for publication in reputable International Proceeding (Atlantis Press). See you in Yogyakarta!

Make: Three Modes of Making Matt Zigler,2023-11-15 The Maker movement has been an excellent opportunity for people to become producers rather than just consumers, and schools are recognizing the value of offering students the tools, materials, and skills necessary to design sophisticated and meaningful projects. But teaching technical skills should not be the end goal: At its best, a Maker education teaches students to think and act in creative ways that can be applied to difficult challenges in all areas of life. Three Modes of Making provides a framework for Maker courses in upper grades that teach students creative-process skills through three key Maker modes: Imitation, Modification, and Innovation. Educators will learn the differences between the three Maker modes, their associated skill sets, and gain concrete methods to teach, document, and assess these skills. Through this approach, teachers will enable students to apply them to different creative needs. By focusing on how to teach skill development rather than merely how to build specific objects, Three Modes of Making enables students to improve and enhance their creative skills, and learn ways to apply them to a wide variety of challenges. This book is a road map to developing the creative problem solvers that the world needs for the future.
