Southern Seen Larry T. McGehee, 2005 While working at the University of Tennessee in the early 1980s, Larry T. McGehee was looking for a way to share the wealth of history, politics, art, and culture with the residents of the South's small towns. He hit upon the idea of a newspaper column that would run in the region's weekly papers. Through his stories, McGehee encouraged people to look at the people, places, and things around them with a fresh set of eyes. *Southern Seen* collects McGehee's numerous columns exploring the South's history, inhabitants, mannerisms, food, and foibles. The book is divided into eight categories: outdoors, place, education, people, conflict, food, play, and religion. His subjects range from the outdoors and the creatures that inhabit it to the Civil War and its battle sites to unique southern symbols and the South's particular culinary delicacies. The author celebrates the traditions and work of the harvest season and extols the beauty of migrating hummingbirds and the rare delight of a southern snowstorm. McGehee meditates on the drastic changes machines and inventions, such as air conditioning, have brought to the region, and he looks for lessons in the mighty floods that occur in the contemporary South. The columns, by turns funny and poignant, biting and sweet, celebrate the past and look to the future. The wild turkey, once common in the backcountry brush, is now an example of a vanishing forest population, and local farmers' markets strive to sustain the livelihood of embattled small family farmers. McGehee applies the legacy of the Hatfield-McCoy feuds to the regional and international strife of modern times and examines the sacrifice and contributions of the South's young men who served in the wars of the last century. He revels in the pride of each part of the region for its own unique barbecue and delights in the memories of the small-town drugstore, which offered everything from health advice to a cream soda. Through the stories of famous figures, local residents, and the folk traditions that shape everyday life, McGehee celebrates the diversity of life in the South

and offers irreplaceable insights into what continues to make the region unique.

Being Alive Tim Ingold,2011-04-19 Anthropology is a disciplined inquiry into the conditions and potentials of human life.

Generations of theorists, however, have expunged life from their accounts, treating it as the mere output of patterns, codes, structures or systems variously defined as genetic or cultural, natural or social. Building on his classic work *The Perception of the Environment*, Tim Ingold sets out to restore life to where it should belong, at the heart of anthropological concern. *Being Alive* ranges over such themes as the vitality of materials, what it means to make things, the perception and formation of the ground, the mingling of earth and sky in the weather-world, the experiences of light, sound and feeling, the role of storytelling in the integration of knowledge, and the potential of drawing to unite observation and description. Our humanity, Ingold argues, does not come ready-made but is continually fashioned in our movements along ways of life. Starting from the idea of life as a process of wayfaring, Ingold presents a radically new understanding of movement, knowledge and description as dimensions not just of being in the world, but of being alive to what is going on there.

English Spelling and the Computer Roger Mitton,1996 English

Spelling and the Computer provides a thorough examination of spelling focusing in particular on the difficulties faced by present day spellers. Most people make spelling mistakes and while word processors with spellcheckers do offer some help, they do not catch all the errors and often make inappropriate suggestions. This book looks at common errors and explains why they are made. A knowledge of the history and development is useful for understanding the problems of spelling and the difficulties spellcheckers are trying to address. The book therefore begins by examining the history of spelling and goes on to consider the arguments for and against reform. This is followed by an analysis of a large corpus of spelling errors including both the errors that people make when they do not know how to spell a word and the errors they make when they know how to spell the word but for some reason write something different.

The Eurasian Beaver Handbook Roisin Campbell-Palmer, Derek Gow, Gerhard Schwab, Duncan Halley, John Gurnell, Simon Girling, Skip Lisle, Ruairidh Campbell, Helen Dickinson, Simon Jones, Howard Parker, Frank Rosell, 2016-08-15
Beavers are widely recognised as a keystone species which play a pivotal role in riparian ecology. Their tree felling and dam building behaviours coupled with a suite of other activities create a wealth of living opportunities that are exploited by a range of other species. Numerous scientific studies demonstrate that beaver-generated living environments that are much richer in terms of both biodiversity and biomass than wetland environments from which they are absent. Emerging contemporary studies indicate clearly that the landscapes they create can afford sustainable, cost-effective remedies for water retention, flood alleviation, silt and chemical capture. Beaver activities, especially in highly modified environments, may be challenging to certain land use activities and landowners. Many trialled and tested methods to mitigate against these impacts, including a wide range of non-lethal management techniques, are regularly implemented across

Europe and North America. Many of these techniques will be new to people, especially in areas where beavers are newly re-establishing. This handbook serves to discuss both the benefits and challenges in living with this species, and collates the wide range of techniques that can be implemented to mitigate any negative impacts. The authors of this handbook are all beaver experts and together they have a broad range of scientific knowledge and practical experience regarding the ecology, captive husbandry, veterinary science, pathology, reintroduction and management of beavers in both continental Europe and Britain.

Pests and Their Management Omkar,2018-08-01 This book comprehensively compiles information on some of the major pests that afflict agricultural, horticultural and medicinal crops in particular as well as many polyphagous pests. Not only does this book deal with the pests of common globally produced crops it also addresses those of rarely dealt with crops such as seed spices, medicinal and aromatic plants. While the perspective of insect pests is largely Indian and South East Asian in context, the book does deal with globally problematic pests, particularly polyphagous ones. Not only will the readers be acquainted with the pests, their damaging potential and their life cycle but also with the latest methods of managements including ecofriendly measures being employed to keep pest populations at manageable levels. The 27 chapters in the book, are grouped into four sections primarily based on crop types, viz. pest of agricultural, horticultural and medicinal crops, and polyphagous pests, making the book easy to navigate. Each of the chapters is comprehensive and well illustrated and written by academicians who have dedicated their entire lives to the study of a particular crop-pest complex. The final chapter of this book provides an overview on the principles and processes of pest management.

Zarafa Michael Allin,1999-08-10 In October 1826, a ship arrived at Marseille carrying the first giraffe ever seen in France. A

royal offering from Muhammad Ali, Ottoman Viceroy of Egypt, to King Charles X, she had already traveled 2,000 miles down the Nile to Alexandria, from where she had sailed across the Mediterranean standing in the hold, her long neck and head protruding through a hole cut in the deck. In the spring of 1827, after wintering in Marseille, she was carefully walked 550 miles to Paris to the delight of thousands of onlookers. The viceroy's tribute was politically motivated: He commanded the Turkish forces then fighting the Greeks in their war of independence, and hoped his gift would persuade the French not to intervene against him. But the viceroy and his intentions were quickly forgotten as France fell in love with its beautiful stranger. Zarafa chronicles the full story of this remarkable animal, revealing a kaleidoscope of history, science, and culture that opens an exotic window on the early nineteenth century. From the Enlightenment's blossoming fascination with science to Napoleon's ill-fated invasion of Egypt in 1798—from the eminent French naturalist Étienne Geoffroy Saint-Hilaire to Bernardino Drovetti, French consul general in Egypt and tomb robber extraordinaire—the era was full of memorable events and characters. Michael Allin deftly weaves them into the story with an appreciation for detail and an uncommon affection. The giraffe's strange and wonderful journey linked Africa and Europe in mutual discovery. Although her arrival did not keep the French out of Ali's war, she became an instant celebrity in Paris and over the next eighteen years she fascinated all of Europe. Through Michael Allin's narrative skill, Zarafa stirs the imagination as it provides a new context for the history of a distant age.
