Human Stem Cell Manual Suzanne Peterson,Jeanne F. Loring,Robin L. Wesselschmidt,Philip H. Schwartz,2011-10-10 Stem cells are self-replicating and undifferentiated, meaning their function is not yet cell, tissue, or organ-specific. Due to the unique nature of these cells, research into their biology and function holds great promise for therapeutic applications through replacement or repair of diseased and damaged cells. This reader-friendly manual provides a practical hands on guide to the culture of human embryonic and somatic stem cells. By presenting methods for embryonic and adult lines side-by-side, the authors lay out an elegant and unique path to understanding the science of stem cell practice. The authors begin with a broad-based introduction to the field, and also review legal and regulatory issues and patents. Each experimental strategy is presented with an historical introduction, detailed method, discussion of alternative methods, and common pitfalls. This lab guide for researchers also serves as a textbook for undergraduate and graduate students in laboratory courses.

Attracting Songbirds to Your Backyard Sally Roth,2012-05-08 The best ways to attract melodic birds, with insight into their rapidly changing habits The American robin and northern cardinal are two of the best-loved songbirds, but newer backyard arrivals, like rose-breasted grosbeaks and scarlet tanagers, quickly captivate with their vivid colors and unique songs. Bird lovers will learn to attract new visitors by offering treats that songbirds like best, such as soft, easy-to-peck foods that closely mimic caterpillars, their top food preference. And planting just a few carefree perennials and shrubs can provide opportunities for cover and nesting. Sally Roth's Attracting Songbirds to Your Backyard draws on the latest science and 50 years of observation to reveal these fascinating details: • In the wee hours, it's the robins that sing first, followed by the babble of house wrens and the whistle of cardinals • Some birds learn birdsongs throughout their lives, while others stop learning once they can mimic their parents' song • It's Dad, not Mom, who teaches the young birds to sing Simple tips, ideas, and recipes, as well as an understanding of why songbirds are coming from the treetops into the backyard, will help any bird enthusiast create a songbird sanctuary.
