<u>Printing and Misprinting</u> Geri Della Rocca de Candal,Anthony. Grafton,Henry Putnam University Professor of History Anthony Grafton,Ambizione Postdoctoral Fellow Paolo Sachet,Paolo Sachet,2023-03-15 'To err is human'. As a material and mechanical process, early printing made no exception to this general rule. Against the conventional wisdom of a technological triumph spreading freedom and knowledge, the history of the book is largely a story of errors and adjustments. Various mistakes normally crept in while texts were transferred from manuscript to printing formes and different emendation strategies were adopted when errors were spotted. In this regard, the 'Gutenberg galaxy' provides an unrivalled example of how scholars, publishers, authors and readers reacted to failure: they increasingly aimed at impeccability in both style and content, developed time and money-efficient ways to cope with mistakes, and ultimately came to link formal accuracy with authoritative and reliable information. Most of these features shaped the publishing industry until the present day, in spite of mounting issues related to false news and approximation in the digital age. Early modern misprinting, however, has so far received only passing mentions in scholarship and has never been treated together with proofreading in a complementary fashion. Correction benefited from a somewhat higher degree of attention, though check procedures in print shops have often been idealised as smooth and consistent. Furthermore, the emphasis has fallen on the people involved and their intervention in the linguistic and stylistic domains, rather than on their methodologies for dealing with typographical and textual mistakes. This book seeks to fill this gap in literature, providing the first comprehensive and interdisciplinary guide into the complex relationship between textual production in print, technical and human faults and more or less successful attempts at emendation. The 24 carefully selected contributors present new evidence on what we can learn from misprints in relation to publishers' practices, printing and pre-publication procedures, and editorial strategies between 1450 and 1650. They focus on texts, images and the layout of incunabula, sixteenth- and early seventeenth-century books issued throughout Europe, stretching from the output of humanist printers to wide-ranging vernacular publications.

Platinotype Pradip Malde,Mike Ware,2020-12-30 Platinotype: Making Photographs in Platinum and Palladium with the Contemporary Printing-out Process describes the mechanisms and chemistry of platinum/palladium printing in safe and practical ways. Clearly presented formulae allow the printer to work with platinum, palladium, or varying combinations of both. The printed-out image appears fully during exposure, and only requires simple and safe steps for clearing to a stable, archival state. The authors explain what makes the image, how all necessary components are prepared and used, and the kind of paper and negative needed to make prints. More than just a technical manual, the book underscores the authors' belief that printing is a creative, scientific, and philosophic way of working. The book presents an outstanding collection of prints by over 40 artists, all made with this printing-out process. The artists' notes and comments offer insights into their methods and thinking, and a large number of full-page reproductions serve as a valuable reference for the aspiring printer. The book includes: A list of supplies and equipment A detailed chemical glossary A Quick-start section in the Preface Summary sheets and workflows for each step of the process Instructions for making traditional negatives with Pyro PMK and digital negatives Explanation of the chemistry and dynamics of paper, and how to use buffered papers Instructions for controlling hydration processes and humidity Instructions for preparing each chemical solution needed for the process Discussion about the aesthetics of the platinum/palladium print Explanation of the relationships between light, image, and expression A detailed troubleshooting list Recommendations from conservators about processing,

handling, and conservation Contemporary artists using the printing-out platinum/palladium process. Learning how to make platinum/palladium prints has been cloaked in a mystique of difficulty. Platinotype presents the process as a set of clearly explained and defined steps. Like other books in the series, Platinotype is a detailed and inspiring manual, accessible to both novices and experts, and illustrative of the contemporary arts.
