Java Swing Marc Loy, Robert Eckstein, Dave Wood, James Elliott, Brian Cole, 2002-11-20 Swing is a fully-featured user interface development kit for Java applications. Building on the foundations of the Abstract Window Toolkit (AWT), Swing enables cross-platform applications to use any of several pluggable look-and-feels. Swing developers can take advantage of its rich, flexible features and modular components, building elegant user interfaces with very little code. This second edition of Java Swing thoroughly covers all the features available in Java 2 SDK 1.3 and 1.4. More than simply a reference, this new edition takes a practical approach. It is a book by developers for developers, with hundreds of useful examples, from beginning level to advanced, covering every component available in Swing. All these features mean that there's a lot to learn. Even setting aside its platform flexibility, Swing compares favorably with any widely available user interface toolkit--it has great depth. Swing makes it easy to do simple things but is powerful enough to create complex, intricate interfaces. Java Swing, 2nd edition includes :

- A new chapter on Drag and Drop Accessibility features for creating a user interface meeting the needs of all users
- Coverage of the improved key binding infrastructure introduced in SDK 1.3
- A new chapter on JFormattedTextField and input validation
- Mac OS X coverage and examples
- Coverage of the improved focus system introduced in SDK 1.4
- Pluggable Look-and-Feel coverage
- Coverage of the new layout manager, SpringLayout, from SDK 1.4
- Properties tables that summarize important features of each component
- Coverage of the 1.4 Spinner component
- Details about using HTML in components
- A new appendix listing bound actions for each component
- A supporting web site with utilities, examples, and supplemental materials

Whether you're a seasoned Java developer or just trying to find out what Java can do, you'll find Java Swing, 2nd edition an indispensable guide.

Electronic Textual Editing Lou Burnard, Katherine O'Brien O'Keefe, John Unsworth, 2006 The long history of textual editing and scholarship has been intimately involved with the physique of the book, which set limits on the presentation and study of text. Increasingly, since the 1980s, the written word has taken on a digital form, and the shift from codex to computer, from print to electronic media, creates new opportunities - and new difficulties. This volume offers an emerging consensus about the fundamental issues of electronic textual editing. It provides practical advice and faces theoretical questions. Its twenty-four essays deal with markup coding and procedures, electronic archive administration, use of standards (such as Unicode), rights and permissions, and the changing and challenging environment of the Internet. Some of the specific texts discussed are Greek and Latin inscriptions, the Gospel of John, the Canterbury Tales, William Blake's poems and art, Percy Bysshe Shelley's *The Devil's Walk*, Stijn Streuvels's *De teleurgang van den Waterhoek*, Ludwig Wittgenstein's *Nachlass*, and the papers of Thomas Edison. The guidelines of the MLA's Committee on Scholarly Editions, recently revised to address electronic editions, are included in full. The CD accompanying this volume contains the complete text of the Text Encoding Initiative guidelines (P4 edition) in both HTML and PDF formats.

Evaluation of Cross-Language Information Retrieval Systems Martin Braschler, Julio Gonzalo, Michael Kluck, 2003-08-02 The second evaluation campaign of the Cross Language Evaluation Forum (CLEF) for European languages was held from January to September 2001. This campaign proved a great success, and showed an increase in participation of around 70% compared with CLEF 2000. It culminated in a two day workshop in Darmstadt, Germany, 3-4 September, in conjunction with the 5th European Conference on Digital Libraries (ECDL 2001). On the first day of the workshop, the results of the CLEF 2001 evaluation campaign were reported and discussed in paper and poster sessions. The second day focused on the current needs of cross language systems and how evaluation campaigns in the future can best be designed to stimulate progress. The workshop was attended by nearly 50 researchers and system developers from both academia and industry. It provided an important opportunity for researchers working in the same area to get together and exchange ideas and experiences. Copies of all the presentations are available on the CLEF web site at <http://www.clef-campaign.org>. This volume contains thoroughly revised and expanded versions of the papers presented at the workshop and provides an exhaustive record of the CLEF 2001 campaign. CLEF 2001 was conducted as an activity of the DELOS Network of Excellence for Digital Libraries, funded by the EC Information Society Technologies program to further research in digital library technologies. The activity was organized in collaboration with the US National Institute of Standards and Technology (NIST).
