Ian Flynn, SEGA

Battle Abbey J N Hare, 2013-01-15 This volume provides an account of the historical and architectural development of this great monastery, and a report on the recent excavations there. The latter saw the complete excavation of the chapter house and reredorter, and established a sequence of development from the hillside of the battle of Hastings, through the Norman abbey and its additions, to the great thirteenth-century rebuilding, continued late medieval activity and the post-dissolution periods of decay and revival. The excavations produced a wide range of finds. These included important sequences of pottery and roof tile; material that throws light on the design, glazing and flooring of the monastic buildings; and an extensive collection of objects of bone, lead, copper alloy, iron and glass. Many of these finds came from a rich Dissolution rubbish dump.

The Battle for Australia John Ifield, 2014-10-27 Born in the Middle East, Gregorian's desire for acceptance in Australia is thwarted by the old boys' network, epitomised by John Sinclair. Determined to succeed, Gregorian is bribed into undertaking a political career backed by a terrorist organisation. Australia is seen as a soft target for take-over by this organisation. Initial acts of destabilisation occur in Sydney and Melbourne, leaving the authorities jittery. Finally, Parliament House is stormed; all Parliamentarians are taken hostage and imprisoned; they will be killed if any rescue is mounted. Gregorian becomes Prime Minister. The new government is able to control the south-east corner of the continent and becomes accepted through its nationalisation of the banks and the abolition of income tax. A rescue attempt led by John Sinclair fails and Sinclair's wife, formerly Gregorian's lover, is taken hostage. A second rescue attempt led by Sinclair is mounted under the direction of a foreign power but all the hostages are slaughtered.

Lost Battles Philip Sabin, 2015-02-05 From the author's introduction: Ancient battles seize the modern imagination. Far from being forgotten, they have become a significant aspect of popular culture, prompting a continuing stream of books, feature films, television programs and board and computer games... there is a certain escapist satisfaction in looking back to an era when conflicts between entire states turned on clear-cut pitched battles between formed armies, lasting just a few hours and spanning just a few miles of ground. These battles were still unspeakably traumatic and grisly affairs for those involved - at Cannae, Hannibal's men butchered around two and a half times as many Romans (out of a much smaller overall population) as there were British soldiers killed on the notorious first day of the Somme. However, as with the great clashes of the Napoleonic era, time has dulled our preoccupation with such awful human consequences, and we tend to focus instead on the inspired

generalship of commanders like Alexander and Caesar and on the intriguing tactical interactions of units such as massed pikemen and war elephants within the very different military context of pre-gunpowder warfare. *Lost Battles* takes a new and innovative approach to the battles of antiquity. Using his experience with conflict simulation, Philip Sabin draws together ancient evidence and modern scholarship to construct a generic, grand tactical model of the battles as a whole. This model unites a mathematical framework, to capture the movement and combat of the opposing armies, with human decisions to shape the tactics of the antagonists. Sabin then develops detailed scenarios for 36 individual battles such as Marathon and Cannae, and uses the comparative structure offered by the generic model to help cast light on which particular interpretations of the ancient sources on issues such as army size fit in best with the general patterns observed elsewhere. Readers can use the model to experiment for themselves by re-fighting engagements of their choice, tweaking the scenarios to accord with their own judgment of the evidence, trying out different tactics from those used historically, and seeing how the battle then plays out. *Lost Battles* thus offers a unique dynamic insight into ancient warfare, combining academic rigor with the interest and accessibility of simulation gaming. This book includes access to a downloadable computer simulation where the reader can view the author's simulations as well create their own.

The China-US Trade War and South Asian Economies Rahul Nath Choudhury, 2021-03-07 The USA and China, the world's largest economic powers, have been engaging in trade war since January 2018. The impact of this trade war is felt not only by US and China but also by other economies who have economic ties with them. This book provides insights into damages caused by this trade war. The first section of the book looks at the impact of the trade war on the global economy. It goes deeper to examine the trade war impact on the South Asian region. It is well-known that any imposition of new tariffs or an increase in existing tariffs would make imports more costly and render the exported goods less competitive. Yet, the book posits that the trade war has provided a window of opportunity to other countries not caught in it. The South Asian region, with countries like Bangladesh, India and Sri Lanka, has actually reaped benefits from the widening trade dispute between the world's two biggest economies. This book will be a useful reference to help policymakers to undertake informed decisions and initiate programs to minimise the trade war impact.

Civilians Under Siege from Sarajevo to Troy Alex Dowdall, John Horne, 2017-12-12 This edited volume analyses siege warfare as a discrete type of military engagement, in the face of which civilians are particularly vulnerable.

Siege warfare is a form of combat that has usually had devastating effects on civilian populations. From the near-contemporary Siege of Sarajevo to the real and mythical sieges of the ancient Mediterranean, this has been a recurring type of military engagement which, through bombardment, starvation, disease and massacre, places non-combatants at the heart of battle. To date, however, there has been little recognition of the effects of siege warfare on civilians. This edited volume addresses this gap. Using a distinctive regressive method, it begins with the present and works backwards, avoiding teleological interpretations that suggest the targeting of civilians in war is a modern phenomenon. Its contributors interrogate civilians' roles during sieges, both as victims and active participants; the laws and customs of siege warfare; its place in historical memory, and the ways civilian survivors have dealt with trauma. Its scope and content ensure that the collection is essential reading for all those interested in the place of civilians in war. Chapter 2 of this book is available open access under a CC BY 4.0 license at link.springer.com

A Dyslexic's Battle Adrian John Caro,2024-03-28 I am now over 80 and a working silversmith. I tell the story of my early life at the end of the Second World War and its aftermath of shortages and rationing. I continue with the great difficulty I had with reading and writing leading to my disastrous failures at school and my first

employment as a scientific assistant in the nuclear industry. During my first job my life changed in two major ways while working for the Atomic Energy Research Establishment. Their very forward-looking attitude to further education allowed me to add more 'O' levels, including the very important English, but as importantly, during that time I got married and before long had a daughter as well. I then decided to make the leap and try to obtain a medical degree but with only very basic 'O' levels I would first have to gain higher qualifications. I left full time employment for a Technical College in an attempt to add the three 'A' levels required for admission to Medical School but this was of course complicated by having wife and young daughter. To support us during this time I worked as a toolmaker, chauffeur, gardener and eventually trained as a London Ambulance driver. This very tortuous journey eventually gained me a place at Guy's Hospital Medical School. I continue the tale with a number of vignettes of life at Guy's Hospital as a medical student and the many unusual ways I increased my income during my studentship. I cover the time spent after qualification as a houseman in other hospitals. I finish with life as a General Practitioner and in Medical Research where I gained a PhD. I found that the higher up the academic tree I climbed the less my dyslexia, which I discovered I had when a medical student, impinged on my work and life. As an aside I hope that any youngsters with dyslexia reading this account will take heart that being dyslexic is not the end of the world.
