Jane's Battleships of the 20th Century Bernard Ireland, 1996 All the greatest battleships from World War I to the 1991 Gulf War.

The Somerville Papers Michael Simpson, 2020-11-25 Sir James Somerville (1882-1949) was one of the great influences on the 20th-century navy, both as a commander of fleets and a pioneer of radio and radar. The Admiral's extensive correspondence, diaries and reports are deposited in the Churchill Archives Centre at Cambridge. These edited selections reveal much of the background about major naval operations in the Second World War. The loneliness of high command is clearly revealed in these highly personal documents, almost 500 of which are reproduced in the book. In particular they show Somerville's frequent disagreements with Churchill - a feature common to all senior British commanders during the war.

Italian Battleships Erminio Bagnasco, Augusto de Toro, 2021-06-30 With the publication of their previous book on the battleships of the Littorio class, the authors set new standards for the detailed coverage and sophisticated analysis of Italian warship design. Inspired by its success, both critically and commercially, the authors were inspired to follow up with a similar study of the earlier Italian battleships that were built in the First World War but survived to fight in the Second. Given the level of new research required, this has taken a decade to achieve but the result is a similarly comprehensive coverage. Originally comprising five ships in two related classes, they entered service at the beginning of the Great War.

As designed, they were powerful examples of the second generation of dreadnoughts, with a combination of twin and triple turrets producing a unique main armament of thirteen 12-inch guns. One ship, Leonardo da Vinci, was sunk by an internal explosion at Taranto in 1916, and although the hull was raised post-war, the plan to rebuild the ship was abandoned as it was not deemed cost-effective. However, the remaining four ships were to undergo one of the most radical reconstructions of any battleship class during the 1930s, emerging with an entirely new profile, more powerful machinery and all the characteristics of a modern fast battleship. In this form they became an important element in the Italian fleet that opposed the British after 1940\.. This book covers all the technical details of the ships, both as built and as rebuilt, but also provides an extended history of their active service, including battle plans and track charts. Thoroughly illustrated with photographs, ship and armament plans, detail drawings and colour camouflage schemes, the book is a fitting companion to The Littorio Class.

British Warship Losses in the Age of Sail David Hepper, 2023-12-30 This significant new reference book provides a complete list of the ships of the

Royal Navy which were lost at sea in the age of sail. Arranged in chronological order, it includes outline details of each vessel lost and the circumstances of her loss. 1649 is the start date, which coincides with the execution of Charles I and that time when the Royal Navy entered a new phase as an instrument of state: the launch of the steam-powered and iron-hulled Warrior in 1860 effectively marks the end of the great era of the wooden-hulled sailing warship. Life at sea in the age of sail was a hazardous pursuit, and there were many reasons for a ship being lost. A correspondent to the Nautical Magazine in 1841 detailed some fifty reasons and causes, from being short of crew, abandonment without sufficient cause, the poor condition of a ship, incorrectness of charts, poor dead-reckoning as well as less obvious reasons such as "the presence of captains' wives and other women." Navigational error, particularly before the chronometer allowed for the accurate calculation of longitude, was a common reason, while poor weather in the form of fog or gales was an obvious peril. So many ships suffered the melancholy fate of lonely disappearance "overwhelmed by storm and sea, and witnessed by none. Collisions and fire feature regularly as does, of course, loss to the enemy. Each entry includes details of the ship, its name and type, tonnage and dimensions, origin and place of build, the circumstances of the loss, the date and a list of the main references used. All this material is presented here in a single and highly accessible volume, and represents a major milestone both in naval research and publishing;

it offers too a fund of fascinating and compelling stories of maritime misadventure. Praise for the author's previous work: "This volume is an amazing encyclopaedic, catalogue of British warships lost between 1920 and 1982 It is strongly recommended to historians, authors, researchers and all those with an interest in the history of the Royal Navy and the Second World War." -Scuttlebut Magazine

The Fleet Air Arm in the Second World War Ben Jones, 2016-03-16 This is the first of three volumes detailing the history of the Fleet Air Arm, the Royal Navy's aircraft carriers and naval air squadrons, during the Second World War. It deals with the formative period between 1939 and 1941 when the Fleet Air Arm tried to recover from the impact of dual control and economic stringencies during the inter-war period while conducting a wide range of operations. There is in depth coverage of significant operations including the Norwegian campaign, Mediterranean actions such as the attack on the Italian Fleet at Taranto and the Battle of Cape Matapan, and the torpedo attacks on the German battleship Bismarck. Incidents involving the loss of and damage to aircraft carriers, including the sinking of Ark Royal, one of the most famous ships in the early years of World War Two, are also reported. Of major importance are key planning and policy issues. These include the requirements for aircraft carriers, the evolving debate regarding the necessary types of aircraft and attempts to provide sufficient facilities ashore for naval air squadrons. A wide range of official documents are used to enable the reader to appreciate the

complexity of the operations and other issues which faced the Fleet Air Arm. This volume will appeal to everyone interested in how the Royal Navy adapted to the use of air power in the Second World War. Its reports bring actions vividly to life. Its correspondence demonstrates the fundamental foundation of planning, policy and logistics. In common with succeeding volumes on the Fleet Air Arm, this volume provides a new and vital perspective on how Britain fought the Second World War.

Battleship Leviathan Craig Martelle, 2021-09-30 A derelict warship, ancient but still alive. A small team of humans fighting for all humanity. Built for a time when the races were just finding their way to the stars, finding that they could dominate others. The galactic conquests created the arms race and the ancients, the Progenitors had to protect their own. They built a ship to drive the others away. It worked. And it didn't. The Progenitors abandoned the galaxy to the newcomers, leaving relics behind as monuments to their failure. Humanity spread to the stars and ran headlong into the established races. A new war begins, and no one conducts war better than humanity except for the Blaze Collective. The two go head-to-head while humanity frantically searches for something to give them an advantage. Ancient technology. The derelicts scattered across the galaxy. Gutted and useless. Except for one, hidden in plain sight, close to Earth. Major Declan Payne takes his team aboard to find that the ship is no derelict, and it needs him as much as humanity needs it. Battleship: Leviathan. A

The Battle of Jutland Geoffrey

Bennett,2015-06-10 The Battle of Jutland: At the end of May 1916, a chance encounter with Admiral Hipper's battlecruisers has enabled Beatty to lead

the German Battle Fleet into the jaws of Jellicoe's greatly superior force, but darkness had allowed Admiral Scheer to extricate his ships from a potentially disastrous situation. Though inconclusive, at the Battle of Jutland the German Fleet suffered so much damage that it made no further attempt to challenge the Grand Fleet, and the British blockade remained unbroken. Captain Bennett has used sources previously unavailable to historians in his reconstruction of this controversial battle, including the papers of Vice-Admiral Harper explaining why his official record of the battle was not published until 1927, and the secret Naval Staff Appreciation of 1922 whose criticism were so scathing that it was never issued to the Fleet. Also included are numerous battle plans, photographs and an introduction by Bennett's son. 2006 is the 90th anniversary of the battle.

No Room for Mistakes Geirr H Haarr, 2015-09-02
A new book from this bestselling author covering the events at sea in the early years of World War II, in which he has compiled comprehensive research and insight into a highly readable and detailed account of British and Allied submarine warfare in north European waters at the beginning of the war.

The early chapters describe prewar submarine development, including technical advances and limitations, weapons, tactical use and life onboard, and examine the men who crewed them and explore their understanding of the warfare that they would become involved in. The core of the book is an account of the events as they unfolded in 'home waters' from the outset of war to the end of 1940, by which time the majority of the Allied submarines were operating in the Mediterranean. It is a story of success, triumph, failure and tragedy, and it tells of the tremendous courage and endurance shown by a small group of men learning how to fight a new kind of war in claustrophobic, sub-sea vessels with limited information about the enemy, or what they would meet off the alien coasts to which they were heading. Extensive primary sources are used to document the many aspects of this war, some of which remain controversial to this day. Max Horton, Vice Admiral Submarines 1940, said: 'There is no room for mistakes in submarines. You are either alive or dead.' This book makes plain how right he was.--Publisher's description.
