The War for All the Oceans Roy Adkins, Lesley Adkins, 2008-07-29 A brutal, action-packed account of the sea battles of the Napoleonic War by the author of the bestselling *Nelson's Trafalgar* and co-author of the forthcoming *Gibraltar: The Greatest Siege in British History* (March 2018) As he did with his much lauded *Nelson's Trafalgar*, Roy Adkins (now writing with wife Lesley) again thrusts readers into the perils and thrills of early-nineteenth-century warfare. From its very first page, this is an adventure story--a superb account of the naval war that lasted from Napoleon's seizure of power in 1798 to the War of 1812 with the United States. Providing a ringside seat to the decisive battles, as well as detailed and vivid portraits of sailors and commanders, press-gangs, prostitutes, and spies, *The War for All the Oceans* is "a rollicking, patriotic account of the Napoleonic wars that will go down well with Master and Commander fans" (The Telegraph).

Kant: Natural Science Immanuel Kant, 2012-10-04 Though Kant is best known for his strictly philosophical works in the 1780s, many of his early publications in particular were devoted to what we would call 'natural science'. Kant's *Universal Natural History and Theory of the Heavens* (1755) made a significant advance in cosmology, and he was also instrumental in establishing the newly emerging discipline of physical geography, lecturing on it for almost his entire career. In this volume Eric Watkins brings together new English translations of Kant's first publication, *Thoughts on*

the True Estimation of Living Forces (1746–9), the entirety of Physical Geography (1802), a series of shorter essays, along with many of Kant's most important publications in natural science. The volume is rich in material for the student and the scholar, with extensive linguistic and explanatory notes, editorial introductions and a glossary of key terms.
