Missing Persons in Australia Marianne Pinkerton James, Jessica Anderson, Judy Putt, 2008-01-01 Missing persons in Australia is a complex field, with no single service responsible for investigations and support for those affected. While the coordination shared by police and nongovernment agencies is crucial in responding to cases, limitations in collecting and recording data hamper a complete understanding of risk factors that can inform good practice. These limitations are evident at the national level, where knowledge of the characteristics and patterns of missing persons is scant. Certain groups in the community, and individual factors, contribute to the risk of people going missing. This information is necessary to develop strategies that focus on improving preventative measures, early intervention, support services and referral mechanisms. This report updates existing data on missing persons across Australia in 2005-06 to identify at-risk groups. It presents information on good practice from preventative to support measures and outlines policies, practice and research directions. A current snapshot of missing persons is shown by national estimates, demographic characteristics and reporting. Family dysfunction and psychological reasons for going missing are complemented by details on searching, support/counselling services and intervention/prevention practices. Improving data quality, risk assessment procedures, specialised training and education of all stakeholders, and inter-agency coordination are key priorities.

Code Quality Diomidis Spinellis, 2006-04-03 Page 26: How can I avoid off-by-one errors? Page 143: Are Trojan Horse attacks for real? Page 158: Where should I look when my application can't handle its workload? Page 256: How can I detect memory leaks? Page 309: How do I target my application to international markets? Page 394: How should I name my code's identifiers? Page 441: How can I find and improve the code coverage of my tests? Diomidis Spinellis' first book, Code Reading, showed programmers how to understand and modify key functional properties of software. Code Quality focuses on non-functional properties, demonstrating how to meet such critical requirements as reliability, security, portability, and maintainability, as well as efficiency in time and space. Spinellis draws on hundreds of examples from open source projects--such as the Apache web and application servers, the BSD Unix systems, and the HSQLDB Java database--to illustrate concepts and techniques that every professional software developer will be able to appreciate and apply immediately. Introduction to the New Mainframe Mike Ebbers, Wayne O'Brien, Bill Ogden, 2006 This IBM Redbook provides students of information systems technology with the background knowledge and skills necessary to begin using the basic facilities of a mainframe computer. It is the first in a planned series of textbooks designed to introduce

students to mainframe concepts and help prepare them for a career in large systems computing. For optimal learning, students are assumed to have successfully completed an introductory course in computer system concepts, such as computer organization and architecture, operating systems, data management, or data communications. They should also have successfully completed courses in one or more programming languages, and be PC literate. This textbook can also be used as a prerequisite for courses in advanced topics or for internships and special studies. It is not intended to be a complete text covering all aspects of mainframe operation, nor is it a reference book that discusses every feature and option of the mainframe facilities. Others who will benefit from this course include experienced data processing professionals who have worked with non-mainframe platforms, or who are familiar with some aspects of the mainframe but want to become knowledgeable with other facilities and benefits of the mainframe environment. As we go through this course, we suggest that the instructor alternate between text, lecture, discussions, and hands-on exercises. Many of the exercises are cumulative, and are designed to show the student how to design and implement the topic presented. The instructor-led discussions and hands-on exercises are an integral part of the course material, and can include topics not covered in this textbook. This book is also offered with a textbook cover instead of a redbook cover in PDF and hardcopy formats. Download PDF of book with textbook cover (6.0MB) Order hardcopy of book with textbook cover Note: The contents of the book are identical in both the textbook and redbook versions except for the covers.

Marketing Across Cultures Jean-Claude Usunier, Julie Anne Lee, Julie Lee, 2005 Back Cover Copy-Usunier This book is noteworthy in its content and approach as well as in generating class discussion on intercultural marketing relations, exchange, and communications. With the diversity in world markets and the importance of having locally-specific understanding of markets and consumers, it is a welcome resource for teaching students who can either relate it to their own intercultural experiences or who have never had intercultural experiences themselves. Guliz Ger, Professor of Marketing, Faculty of Business Administration, Bilkent University, Turkey International marketing relationships have to be built on solid foundations. Transaction costs in international trade are high--only a stable and firmly established link between business people can enable them to overcome disagreements and conflicts of interest. Marketing Across Cultures, 4e uses a successful two-stage cultural approach to explore International Marketing. - A cross-cultural approach which compares marketing systems and local commercial customs in various countries - An inter-cultural approach which studies the interaction between business peoples of different national cultures I used Marketing Across Cultures in courses in five different countries with students from more than 35 nations. The book provides a stimulating view on international marketing issues and at the same time allows in an excellent way to sensitize and train students for intercultural work, which has become the norm for most medium-sized and large companies. Prof. Dr. Hartmut H. Holzmüller., Chair of Marketing University of Dortmund, Germany Invaluable to all undergraduate, postgraduate and MBA students studying International Marketing and for marketing practitioners who wish to improve their cultural awareness, Marketing Across Cultures, 4e is essential reading. New to This Edition! Rewritten extensively in an effort to make the book as accessible as possible, co-author Julie Lee from Australia helps bring a Euro-Australasian perspective to the table.
