**Phineas Finn** Anthony Trollope,2011-11-10 'To become a member of the British Parliament!...He almost thought that he could die happy' Phineas

Finn, the handsome Irishman, is equally successful at scaling the political ladder and gaining the affection of influential women. As he makes his precarious way in parliament he discovers how far principles must be sacrificed to the common cause, and how essential money is to political progress. Set during the turbulent passage of the second Reform Act of 1867, the novel paints a vivid picture of the compromises and tactics of daily political life. Loss of independence is felt just as keenly by Lady Laura and Violet Effingham, whose choice of marriage partner will determine their future freedom as much as their happiness. With politics and the personal so closely entwined, Phineas faces an act of conscience that will have a profound effect on his life. The second novel in Trollope's Palliser series, Phineas Finn's engaging plot embraces matters as diverse as reform, the position of women, the Irish question, and the conflict between integrity and ambition. ABOUT THE SERIES: For over 100 years Oxford World's Classics has made available the widest range of literature from around the globe. Each affordable volume reflects Oxford's commitment to scholarship, providing the most accurate text plus a wealth of other valuable features, including expert introductions by leading authorities, helpful notes to clarify the text, up-to-date bibliographies for further study, and much more.

An Effective Sunday School in the Midst of 21St Century Stephene Timothée Loremy,2022-06-28 The purpose of the Sunday school is to teach the word of God; its power brings about the spread of justice and equality in society. It aims at developing a society that believes in living with peace and harmony. Sunday schools aim at helping people from all age groups to adopt the principles of God. Sunday school education intends to educate people the ways to adhere to ideals in life. At times, this involves the teaching of scriptures from the Bible. Learning what the Bible has to say helps the people meet with God. Enabling the connection of a common man with God is a primary purpose of Sunday schools. They aim at bringing about a spiritual development for their students. The purpose of Sunday schools is indeed worthy. One must not ignore the fact that Sunday schools offer the group an opportunity to be a part of the mission of Christianity to establish equality, peace and harmony in society. They aim at the creation of a society based on the principles of Christ and serve as excellent platforms to move closer to God.

**The Neoliberalization of Creativity Education** Nadine M. Kalin,2018-01-11 This book contemplates creativity education within the context of the neoliberal capitalist economy. In the current crisis of creativity, where we are required to be creative in an environment of entrepreneurialisation, the author analyses what creativity has become and what has been lost in various recent transitional periods. Calling for recommitment towards the politics of critical creativity for the public good, the author argues for an education that resists the ideologies of neoliberalism so that creativity may still be harnessed to rethink society. Inciting readers to conceive of alternate forms of creativity and associated education, this innovative book will appeal to educators, practitioners, creators and learners searching for inspiration beyond creative destruction.

The Processing of Events Oliver Bott,2010-09-29 Synthesizing ideas from event semantics and psycholinguistics, this monograph provides a new perspective on the processing of linguistic aspect and aspectual coercion. Confronting alternative semantic accounts with experimental evidence, the author develops a comprehensive model of online aspectual interpretation. The first part of the book critically reviews competing theoretical accounts of aspectual coercion. As an analytical tool the author introduces a computational model based on the event calculus by Hamm & van Lambalgen (2005) which makes use of planning formalisms from artificial intelligence. Detailed predictions from this framework are then tested in the experimental work reported in the second part. The focus here is on such questions as: Is aspectual coercion a uniform phenomenon or must we distinguish different types? Is aspect processed incrementally or is it computed only at the clause boundary? And finally, what insights can event related potentials yield about how the brain resolves local aspectual mismatch?
