The Challenge of Crime in a Free Society United States. President's Commission on Law Enforcement and Administration of Justice,1967 This report of the President's Commission on Law Enforcement and Administration of Justice -- established by President Lyndon Johnson on July 23, 1965 -- addresses the causes of crime and delinquency and recommends how to prevent crime and delinquency and improve law enforcement and the administration of criminal justice. In developing its findings and recommendations, the Commission held three national conferences, conducted five national surveys, held hundreds of meetings, and interviewed tens of thousands of individuals. Separate chapters of this report discuss crime in America, juvenile delinquency, the police, the courts, corrections, organized crime, narcotics and drug abuse, drunkenness offenses, gun control, science and technology, and research as an instrument for reform. Significant data were generated by the Commission's National Survey of Criminal Victims, the first of its kind conducted on such a scope. The survey found that not only do Americans experience far more crime than they report to the police, but they talk about crime and the reports of crime engender such fear among citizens that the basic quality of life of many Americans has eroded. The core conclusion of the Commission, however, is that a significant reduction in crime can be achieved if the Commission's recommendations (some 200) are implemented. The recommendations call for a cooperative attack on crime by the Federal Government, the States, the counties, the cities, civic organizations, religious institutions, business groups, and individual citizens. They propose basic changes in the operations of police, schools, prosecutors, employment agencies, defenders, social workers, prisons, housing authorities, and probation and parole officers.

Zone One Colson Whitehead,2011-10-18 NATIONAL BESTSELLER • From the two-time Pulitzer Prize-winning author of *The Underground Railroad* and *The Nickel Boys*: A pandemic has devastated the planet, sorting humanity into two types: the uninfected and the infected, the living and the living dead. • One of the best books of the year. —*Esquire* After the worst of the plague is over, armed forces stationed in Chinatown's Fort Wonton have successfully reclaimed the island south of Canal Street—aka Zone One. Mark Spitz is a member of one of the three-person civilian sweeper units tasked with clearing lower Manhattan of the remaining feral zombies. Zone One unfolds over three surreal days in which Spitz is occupied with the mundane mission of straggler removal, the rigors of Post-Apocalyptic Stress Disorder (PASD), and the impossible task of coming to terms with a fallen world. And then things start to go terribly wrong... At once a chilling horror story and a literary novel by a contemporary master, *Zone One* is a dazzling portrait of modern civilization in all its wretched, shambling glory. Look for Colson Whitehead's new novel, *Crook Manifesto*, coming soon!

An Assessment of Illness in U.S. Government Employees and Their Families at Overseas Embassies National Academies of Sciences, Engineering, and Medicine,Division on Engineering and Physical Sciences,Health and Medicine Division,Standing Committee to Advise the Department of State on Unexplained Health Effects on U.S. Government Employees and Their Families at Overseas Embassies,2021-01-05 In late 2016, U.S. Embassy personnel in Havana, Cuba, began to report the development of an unusual set of symptoms and clinical signs. For some of these patients, their case began with the sudden onset of a loud noise, perceived to have directional features, and accompanied by pain in one or both ears or across a broad region of the head, and in some cases, a sensation of head pressure or vibration, dizziness, followed in some cases by tinnitus, visual problems, vertigo, and cognitive difficulties. Other personnel attached to the U.S. Consulate in Guangzhou, China, reported similar symptoms and signs to varying degrees, beginning in the following year. As of June 2020, many of these personnel continue to suffer from these and/or other health problems. Multiple hypotheses and mechanisms have been proposed to explain these clinical cases, but evidence has been lacking, no hypothesis has been proven, and the circumstances remain unclear. The Department of State asked the National Academies to review the cases, their clinical features and management, epidemiologic investigations, and scientific evidence in support of possible causes, and advise on approaches for the investigation of potential future cases. In *An Assessment of Illness in U.S. Government Employees and Their Families at Overseas Embassies*, the committee identifies distinctive clinical features, considers possible causes, evaluates plausible mechanisms and rehabilitation efforts, and offers recommendations for future planning and responses.

Blankets Craig Thompson,2023-07-03 *Blankets* is the story of a young man coming of age and finding the confidence to express his creative voice. Craig Thompson's poignant graphic memoir plays out against the backdrop of a Midwestern winterscape: finely-hewn linework draws together a portrait of small town life, a rigorously fundamentalist Christian childhood, and a lonely, emotionally mixed-up adolescence. Under an engulfing blanket of snow, Craig and Raina fall in love at winter church camp, revealing to one another their struggles with faith and their dreams of escape. Over time though, their personal demons resurface and their relationship falls apart. It's a universal story, and Thompson's vibrant brushstrokes and unique page designs make the familiar heartbreaking all over again. This groundbreaking graphic novel, winner of two Eisner and three Harvey Awards, is an eloquent portrait of adolescent yearning; first love (and first heartache); faith in crisis; and the process of moving beyond all of that. Beautifully rendered in pen and ink, Thompson has created a love story that lasts.

Whole T. Colin Campbell,Howard Jacobson,2013-05-07 NEW YORK TIMES BESTSELLER What happens when you eat an apple? The answer is vastly more complex than you imagine. Every apple contains thousands of antioxidants whose names, beyond a few like vitamin C, are unfamiliar to us, and each of these powerful chemicals has the potential to play an important role in supporting our health. They impact thousands upon thousands of metabolic reactions inside the human body. But calculating the specific influence of each of these chemicals isn't nearly sufficient to explain the

effect of the apple as a whole. Because almost every chemical can affect every other chemical, there is an almost infinite number of possible biological consequences. And that's just from an apple. Nutritional science, long stuck in a reductionist mindset, is at the cusp of a revolution. The traditional “gold standard of nutrition research has been to study one chemical at a time in an attempt to determine its particular impact on the human body. These sorts of studies are helpful to food companies trying to prove there is a chemical in milk or pre-packaged dinners that is “good for us, but they provide little insight into the complexity of what actually happens in our bodies or how those chemicals contribute to our health. In *The China Study*, T. Colin Campbell (alongside his son, Thomas M. Campbell) revolutionized the way we think about our food with the evidence that a whole food, plant-based diet is the healthiest way to eat. Now, in *Whole*, he explains the science behind that evidence, the ways our current scientific paradigm ignores the fascinating complexity of the human body, and why, if we have such overwhelming evidence that everything we think we know about nutrition is wrong, our eating habits haven't changed. *Whole* is an eye-opening, paradigm-changing journey through cutting-edge thinking on nutrition, a scientific tour de force with powerful implications for our health and for our world.

Fate is the Hunter Ernest K. Gann,1986-07-02 An episodic log of some of the author's more memorable hours aloft in peace and as a member of the Air Transport Command in war.

Gifford Pinchot and the Making of Modern Environmentalism Char Miller,2013-06-17 Gifford Pinchot is known primarily for his work as first chief of the U. S. Forest Service and for his argument that resources should be used to provide the greatest good for the greatest number of people. But Pinchot was a more complicated figure than has generally been recognized, and more than half a century after his death, he continues to provoke controversy. *Gifford Pinchot and the Making of Modern Environmentalism*, the first new biography in more than three decades, offers a fresh interpretation of the life and work of the famed conservationist and Progressive politician. In addition to considering Gifford Pinchot's role in the environmental movement, historian Char Miller sets forth an engaging description and analysis of the man -- his character, passions, and personality -- and the larger world through which he moved. Char Miller begins by describing Pinchot's early years and the often overlooked influence of his family and their aspirations for him. He examines Gifford Pinchot's post-graduate education in France and his ensuing efforts in promoting the profession of forestry in the United States and in establishing and running the Forest Service. While Pinchot's twelve years as chief forester (1898-1910) are the ones most historians and biographers focus on, Char Miller also offers an extensive examination of Pinchot's post-federal career as head of The National Conservation Association and as two-term governor of Pennsylvania. In addition, he looks at Pinchot's marriage to feminist Cornelia Bryce and discusses her role in Pinchot's political radicalization throughout the 1920s and 1930s. An epilogue explores Gifford Pinchot's final years and writings. Char Miller offers a provocative reconsideration of key events in Pinchot's life, including his relationship with friend and mentor John Muir and their famous disagreement over damming Hetch Hetchy Valley. The author brings together insights from cultural and social history and recently discovered primary sources to support a new interpretation of Pinchot -- whose activism not only helped define environmental politics in early twentieth century America but remains strikingly relevant today.

The Feeling of Falling in Love Mason Deaver,2022-08-16 From the bestselling author of *I Wish You All the Best*, comes a new kind of love story, about the bad decisions we sometimes make... and the people who help get us back on the right path. Perfect for fans of *Red, White, and Royal Blue* by Casey McQuiston and *What If It's Us* by Adam Silvera and Becky Albertalli. Just days before spring break, Neil Kearney is set to fly across the country with his childhood friend (and current friend-with-benefits) Josh, to attend his brother's wedding—until Josh tells Neil that he's in love with him and Neil doesn't return the sentiment. With Josh still attending the wedding, Neil needs to find a new date to bring along. And, almost against his will, roommate Wyatt is drafted. At first, Wyatt (correctly) thinks Neil is acting like a jerk. But when they get to LA, Wyatt sees a little more of where it's coming from. Slowly, Neil and Wyatt begin to understand one another... and maybe, just maybe, fall in love for the first time.

The End of October Lawrence Wright,2021-04-27 NEW YORK TIMES BESTSELLER • From the Pulitzer Prize-winning author of *The Looming Tower*—a riveting thriller and “all-too-convincing chronicle of science, espionage, action and speculation” (*The Wall Street Journal*). At an internment camp in Indonesia, forty-seven people are pronounced dead with acute hemorrhagic fever. When epidemiologist Henry Parsons travels there on behalf of the World Health Organization to investigate, what he finds will have staggering repercussions. Halfway across the globe, the deputy director of U.S. Homeland Security scrambles to mount a response to the rapidly spreading pandemic leapfrogging around the world, which she believes may be the result of an act of biowarfare. And a rogue experimenter in man-made diseases is preparing his own terrifying solution. As already-fraying global relations begin to snap, the virus slashes across the United States, dismantling institutions and decimating the population. With his own wife and children facing diminishing odds of survival, Henry travels from Indonesia to Saudi Arabia to his home base at the CDC in Atlanta, searching for a cure and for the origins of this seemingly unknowable disease. *The End of October* is a one-of-a-kind thriller steeped in real-life political and scientific implications, filled with the insight that has been the hallmark of Wright’s acclaimed nonfiction and the full-tilt narrative suspense that only the best fiction can offer.

Dancing Through Life Candace Cameron Bure,Erin Davis,2015-08 The television actress recounts her experiences as a contestant on *Dancing with the Stars*, a program in which she participated in part as a way to showcase her Christian faith, and describes the lessons she learned facing its challenges.

With the launch of Jo’s film project fast approaching, the two women begin to spend even more time together, getting along famously. Emma seems to have a sixth sense for knowing what Jo needs. The Story of Psychology Morton Hunt,2009-09-16 Socrates, Plato, Descartes, Spinoza, Mesmer, William James, Pavlov, Freud, Piaget, Erikson, and Skinner. Each of these thinkers recognized that human beings could examine, comprehend, and eventually guide or influence their own thought processes, emotions, and resulting behavior. The lives and accomplishments of these pillars of psychology, expertly assembled by Morton Hunt, are set against the times in which the subjects lived. Hunt skillfully presents dramatic and lucid accounts of the techniques and validity of centuries of psychological research, and of the methods and effectiveness of major forms of psychotherapy. Fully revised, and incorporating the dramatic developments of the last fifteen years, *The Story of Psychology* is a graceful and absorbing chronicle of one of the great human inquiries—the search for the true causes of our behavior.
