Adaption-Innovation M.J. Kirton, 2004-06-02 Adaption-Innovation is a timely and comprehensive text written for anyone who wants to know more about dealing with problem solving, thinking style, creativity and team dynamics. In an age when teams have become critical to successful problem solving, Adaption-Innovation (A-I) theory is a model in this field, which aims to increase collaboration and reduce conflict within groups. A-I Theory and associated inventory (KAI) have been extensively researched and are increasingly used to assist teambuilding and personnel management. In the context of the management of diversity and change, Dr Kirton outlines the central concepts of the theory, including the processes of problem solving, decision making and creativity as well as explanatory concepts such as the paradox of structure; coping behaviour; the distinction between how teams

collaborate on the common task and how teams manage their own diversity. In addition, Dr Kirton focuses on the positive side of managing a wide diversity within teams that has the potential to lead to the highest levels of problem solving, creativity and effective management of change. The book offers practical information for those helping diverse teams succeed in today's demanding climate. In this fresh context, leadership theory is explored, suggesting a new and interesting approach in use of different styles. For those working with diverse, problem solving teams managing complex change, this is a must have book. It will appeal to a broad range of people, from practitioners such as human resource managers, psychologists, business consultants, and group trainers, to academics studying and doing research in disciplines such as psychology, business, management, sociology, education and politics and the practical use of the hard sciences. *This reprint contains some new insights by Dr. Kirton into the theory. A small number of critical key changes have been made: a new diagram showing the difference between decision making and problem solving; some tightening of some sentences to show that leadership style should be treated as roles; the addition of the Glossary of Terms.

CSR 2.0 Wayne Visser,2013-10-15 The book examines the evolution and current state of corporate social responsibility (CSR), using a five-stage maturity model: defensive, charitable, promotional, strategic and transformative CSR. The first four stages are dubbed CSR 1.0 and characterise most current CSR practice, while the fifth stage is named CSR 2.0 (also transformative or systemic CSR) and describes emergent and future CSR practices. Reasons are given why CSR 1.0 approaches have failed to have any significant impact on the most serious global social, environmental and ethical challenges. The emergent CSR 2.0 will then be explored in detail by elaborating on five principles underlying the new approach, including: creativity, scalability, responsiveness, glocality and circularity. A four-part DNA Model is also introduced, covering value creation, good governance, societal contribution and ecological integrity, which provides the basis for defining and measuring CSR 2.0. Finally, a 70-question CSR 2.0 self-assessment diagnostic tool developed by the author is presented, with sample data to show how the tool can be used for future research and practitioner application.
