Belarus--independence as National Idea S. G. Musienko, 2015

Historical Dictionary of Belarus Vitali Silitski, Jan Zaprudnik, 2007 The political map of Eastern Europe changed dramatically in December 1991 when the leaders of Belarus, Russia, and Ukraine huddled together in a Bielavie'a Forest retreat and decided to dissolve the 15 union republics, which composed the Union of Soviet Socialist Republics (USSR). One of those republics was the Belorussian Soviet Socialist Republic (BSSR). A United Nations member since 1945, Belarus has a rich cultural heritage that is seen as a promising base for the development of a solid national identity and for real independence. It is this cultural heritage and sense of history that nourish the ongoing efforts of the nationalist minority, as well as the larger democratic opposition, to resist the regime of President Alaksandr Luka'enka who is bent on restoring ties to Russia. Thus Belarus, with its burdens of the past and potential for the future, finds itself in a struggle that will affect not only its own destiny, but also the international structure of Eastern Europe. The second edition of the Historical Dictionary of Belarus--through its chronology, introductory essays, appendixes, map, bibliography, and hundreds of cross-referenced dictionary entries on important persons, places, events, and institutions and significant political, economic, social, and cultural aspects--traces Belarus' history and provides a compass for the direction the country is heading.

Which Winegrape Varieties are Grown Where? Kym Anderson, Nanda R. Aryal, 2013-12-13 In an increasingly interconnected world wine market, evolving consumer demands, technologies, and climate have all contributed to large shifts in global patterns of production and consumption of wine. These shifting patterns of wine production and consumption have entailed changes in the vineyard in terms of total area planted, production practices, and the mix of grape varieties grown. In this book, for the first time, we have a detailed empirical picture, country by country and region by region within countries, of which varieties of grapes have been grown where, and how those varietal choices have changed over time. This statistical compendium will be directly useful for anyone interested in knowing about and understanding the changing patterns of production of wine and wine grapes around the world. It also will serve as an invaluable resource for economists and others who seek to analyze those patterns and their causes.
