The Little Book of Business Cards David E. Carter,2005-04-26 The business card has taken on a new level of importance in recent years. In an age where the business letter has been replaced by email, the personal contact evoked by a business card is more crucial than ever. Your card is often the one item taken away from a meeting, defining how people view your business long after any face-to-face meeting has faded from memory. Whether you're a businessperson trying to develop your own letterhead set or a graphic designer trying to come up with that next great idea, your challenge is to communicate the look and feel of your company in the space your card and letterhead allows. The Little Book of Business Cards presents an unparalleled source of inspiration. In these pages, David E. Carter has gathered more than 260 representative examples of effective business cards and matching letterhead sets. Learn how to get the most from your choice of fonts, color, size, layouts, and logos -- and even what to do when you don't have a logo! As an extra bonus feature, David E. Carter provides informative and instructional annotations to the featured business cards -- valuable lessons for you to apply to your own designs. With The Little Book of Business Cards in your library, you'll be sure to have a business-building design in no time.

The Best of Business Card Design ,1994

Business Cards Mike Dorrian,Liz Farrelly,2004-11-23 Business Cards: The Art of Saying Hello is the ultimate business card book, bringing together the best examples of cards created by designers around the world. Business cards are a major design challenge; creating successful cards is all about the clever use of space; but just a little space. And that's not all. A design needs to make a splash, stand out from the crowd or announce you as part of a team; and how do you solve the problem of creating a universally understood message while catering to cultural differences and multiple languages? Materials are also important; not all cards are machine printed, and this book features cards on punched metal, stitched fabric, cards with heat-sealed cut-outs, or made from recycled subway tickets, plus clever examples of best-practice using “make-your-own” business-card machines. Over 300 cards are grouped into sections reflecting different design approaches: Typography, Photography, Materials, Illustration and Found Objects. Proving just how inventive you can be with a limited space, this book is a rich source of ideas and inspiration both for designers and anyone wishing to make a statement with their business card.
