*Empathic Design* Elgin Cleckley, 2024-01-16 How do you experience a public space? Do you feel safe? Seen? Represented? The response to these questions may differ based on factors including your race, age, ethnicity, or gender identity. In *Empathic Design*, designer and architecture professor Elgin Cleckley brings together leaders and visionaries in architecture, urban design, planning, and design activism to explore what it means to design with empathy. Empathic designers work with and in the communities affected. They acknowledge the full history of a place and approach the lived experience and memories of those in the community with respect. Contributors explore broader conceptual approaches and highlight design projects including the Harriet Tubman Memorial in Newark, which replaced a long-standing statue of Christopher Columbus; and restoration of the Freedom Center in Oklahoma City, first built by civil activist Clara Luper to provide a safe place for gathering and youth education; and The Camp Barker Memorial in Washington, D.C., which commemorates a contraband camp used to house former slaves who had been captured by the Union Army. *Empathic Design* provides essential approaches and methods from multiple perspectives, meeting the needs of our time and holding space for readers to find themselves.

*Design Through Verilog HDL* T. R. Padmanabhan, B. Bala Tripura Sundari, 2003-11-05 A comprehensive resource on Verilog HDL for beginners and experts Large and complicated digital circuits can be incorporated into hardware by using Verilog, a hardware description language (HDL). A designer aspiring to master this versatile language must first become familiar with its constructs, practice their use in real applications, and apply them in combinations in order to be successful. *Design Through Verilog HDL* affords novices the opportunity to perform all of these tasks, while also offering seasoned professionals a comprehensive resource on this dynamic tool. Describing a design using Verilog is only half the story: writing test-benches, testing a design for all its desired functions, and how identifying and removing the faults remain significant challenges. *Design Through Verilog HDL* addresses each of these issues concisely and effectively. The authors discuss constructs through illustrative examples that are tested with popular simulation packages, ensuring the subject matter remains practically relevant. Other important topics covered include: Primitives Gate and Net delays Buffers CMOS switches State machine design Further, the authors focus on illuminating the differences between gate level, data flow, and behavioral styles of Verilog, a critical distinction for designers. The book's final chapters deal with advanced topics such as timescales, parameters and related constructs, queues, and switch level design. Each chapter concludes with exercises that both ensure readers have mastered the present material and stimulate readers to explore avenues of their own choosing. Written and assembled in a paced, logical manner, *Design Through Verilog HDL* provides professionals, graduate students, and advanced undergraduates with a one-of-a-kind resource.

**ARTPOOL - The Experimental Art Archive of East-Central Europe** György Galántai, Julia Klaniczay, 2013-10-03 This volume is a collection of texts and documents selected from and illustrating the history of Artpool, a non-profit artist run institution in Budapest, established in 1979 by György Galántai and Júlia Klaniczay and operating since 1992 under the name of Artpool Art Research Center. The book focuses on Artpool's direct antecedents (among them the events at György Galántai's Chapel Studio in Balatonboglár, 1970-1973), on the foundation, development, art projects and events, as well as the preferences and issues pertaining to art research (not independent of the historical and social environment they were conceived in) that had formed throughout the course of many years and decades. The occasion of the publication of ARTPOOL The Experimental Art Archive of East-Central Europe is a milestone in the history of art for its documentation of a remarkable period in the chronicles of conceptual, performance, installation, and video art, as well ephemeral mediums such as mail art and artists' stamp sheets, postcards, rubber stamp imprints, artists' writings and samizdat publications. The work represented in the Artpool archive is astonishing in its scope and quantity, quality of imagination, intellectual force, and the courage of the artists who created it. This volume presents an opportunity to reflect on the events that brought Artpool into being, to acknowledge that while originating in the context of East-Central Europe, Artpool's community has always been international, and to evaluate its broad contributions to world culture and society. *The Way to Go* Partners for Livable Places,1983 This publication examines a variety of cases that demonstrate the aesthetic quality of transportation projects. These range from the relatively inexpensive painted Gus Bus in Grand Rapids to the large-scale project of designing the Montreal Metro. The purpose is to develop a fresh perspective on ways the visual appeal of transportation can be identified as a distinct element for consideration, and on the degree to which quality design contributes to the economics and function of transportation systems. A second purpose is to develop guidance and examples to assist transportation planners and citizens in dealing with these issues. The projects presented represent a wide range of costs and circumstances encountered in transportation planning. The study shows that the aesthetic benefits provided by quality materials, sensitive design, careful maintenance, and appropriate inclusion of works of art translate directly into increased patronage, cost efficiencies, and a better public environment.

**Hope in Hard Times** Mary Murphy,2003 Arthur Rothstein, Russell Lee, John Vachon, and Marion Post Wolcott became some of the United States' best-known photographers through their pictures of Depression-era America. Their assignment, as one of their associates described it, was to have a long look at the whole vast, complicated rural U.S. landscape with all that was built on it and all those who built and wrecked and worked in it and bore kids and dragged them up and played games and paraded and picnicked and suffered and died and were buried in it. In Montana the four photographers traveled to forty of the state's fifty-six counties, creating a rich record of the many facets of the Depression and recovery: rural and urban, agricultural and industrial, work and play, hard times and the promise of a brighter future. The photographers captured the dignity of Montanans as they struggled to scratch out livings from dried-up fields, nurture families in the shadows of Butte head frames, and foster communities on the vast expanses of the northern plains. *Hope in Hard Times*, features over 140 Farm Security Administration photographs to illustrate the story of the Great Depression in Montana and the experiences of the photographers who documented it. Today these striking images, from cities like Butte to small towns like Terry, present an unforgettable portrait of a little-studied period in the history of Montana. Selected from the Farm Security Administration Collection at the Library of Congress in Washington, D.C., the photographs in *Hope in Hard Times* offer viewers an unparalleled look at life in Montana in the years preceding the United States' entry into World War II.
