Clinical Environmental Medicine - E-BOOK Walter J. Crinnion, Joseph E. Pizzorno, 2018-04-26 Did you know that high levels of toxins in the human body can be linked to common conditions such as infertility, obesity, rheumatoid arthritis, heart disease, and diabetes? With therapeutic guidance designed for clinicians, Clinical Environmental Medicine focuses on how toxins such as arsenic, lead, mercury and organophosphates have become one of the leading causes of chronic disease in the industrial world. The first edition of this text describes how to treat these undesirable elements and molecules that can poison enzyme systems, damage DNA, increase inflammation and oxidative stress, and damage cell membranes. Expert authors Walter Crinnion and Joseph E. Pizzorno offer practical guidance for assessing both total body load as well as specific toxins. In addition, evidence-based treatment procedures provide recommendations for decreasing toxin exposure and supporting the body's biotransformation and excretion processes. NEW! Unique! Practical diagnostic and therapeutic guidance designed for clinicians. NEW! Unique! Coverage of the most common diseases for which toxins are a primary cause. NEW! Description of how each toxin causes damage provides insights into sources, body load, and interventions for each toxin. NEW! Unique! Entirely evidence-based content focuses on the most common conditions from which patients suffer. NEW! Unique! Coverage of environmental toxicants, endogenous toxicants, and toxins of choice focuses on non-industrially-exposed

populations.

Air Purifier Zhonglin Xu, 2018-09-03 This book discusses the development, types and application principles of portable air purifiers in China. It analyzes the theoretical characteristics of air purifiers under various operational conditions, and points out that the term "Clean Air Delivery Rate" cannot be used to precisely reflect the problems that occur under various operational conditions. By comparing theoretical and measured data, it highlights the main features of air purifiers and key points in the design process for different applications. Calculation methods for the indoor particle concentration and the self-purification time are also provided. The book describes the conditions for window opening in smog and for selecting air purifiers, and proposes a new method for improving their measurement. In closing, it includes a new assessment index.

Supercities On, Under, and Beyond the Earth Jeff Dondero, 2020-02-08 As more and more people inhabit the Earth and live longer on it, Super Cities, will explode with populations of 20, 30, even 100 millions or more. But how will these cities accommodate such masses? Who will build them and where? How can they be sustained and their inhabitants provided for? Here, Jeff Dondero imagines the super cities of the future and explores the ways in which they can be sustainably built, how transportation will move masses of people without cars, how people will be fed and where waste will go, and how we will move to cities underground, under the sea, in the atmosphere, into space and on to other planets. It describes some of the smart systems for buildings and homes and some of the new ways food and materials enough for such masses will be supplied. Will super cities be the answer to our bursting population? And if they will, how can we best sustain and supply them? Dondero offers suggestions and a blueprint for the future.

Low Tox Life Alexx Stuart, 2018-06-27 Ever stopped to read the list of ingredients in the products you use every day? In *Low Tox Life*, activist and educator Alexx Stuart gently clears a path through the maze of mass-market ingredient cocktails, focusing on four key areas: Body, Home, Food and Mind. Sharing the latest science and advice from experts in each area, Alexx tackles everything from endocrine-disruptors in beauty products to the challenge of going low plastic in a high-plastic world, and how to clean without a hit of harmful toxins. You don't need to be a fulltime homesteader with a cupboard full of organic linens to go low tox. Start small, switching or ditching one nasty at a time, and enjoy the process as a positive one for you and the planet.

Solutions to Environmental Problems Involving Nanotechnology and Enzyme Technology Alka Dwevedi, 2018-12-06

Nanotechnology and Enzyme Technology Combined to Address Environmental Problems discusses how nanotechnology and enzyme technology work independently and together to help researchers and environmental professionals learn about this revolutionary and cross-disciplinary field. Nanotechnology has provided a range of nanomaterials, some of which are helpful in the protection of the environment and climate. They can be used to improve durability against mechanical stress, help in cleaning, enhance energy efficiency as insulation, save energy consumption during

transportation due to catalytic properties, and more. This book highlights this technology as it continues to provide solutions for various environmental problems. Covers air and water pollution remediation in the developing field of combining nanotechnology with enzyme technology Reviews the sustainability potentials of combining nanotechnology and enzyme technology, including energy production Applies current research and utilization to a variety of environmental issues, including pollution and energy production

Younger You Kara N. Fitzgerald,2022-01-18 Based on the groundbreaking study that shaved three years off a subjects' age in just eight weeks, discover a proven, accessible plan to prevent diseases and reduce your biological age. It's true: getting older is inevitable and your chronological age can only move in one direction. But you also have a biological age, which scientists can measure by assessing how your genes are expressed through epigenetics. Exciting new research shows that your bio age can actually move in reverse—and Dr. Kara Fitzgerald's groundbreaking, rigorous clinical trial proved it's possible. By eating delicious foods and establishing common-sense lifestyle practices that positively influence genetic expression, study participants reduced their bio age by just over three years in only eight weeks! Now Dr. Fitzgerald shares the diet and lifestyle plan that shows you how to influence your epigenetics for a younger you. In Younger You you'll learn: It's not your genetics that determines your age and level of health, it's your epigenetics How DNA methylation powerfully influences your epigenetic expression The foods and lifestyle choices that most affect DNA methylation Simple swaps to your daily routines that will add years to your life The full eating and lifestyle program, with recipes and meal plans, to reduce your bio age and increase vitality How to take care of your epigenetic expression at every life stage, from infancy through midlife and your later decades We don't have to accept a descent into disease and unwellness as we age as inevitable: when you reduce bio age you reduce your odds of developing all the major diseases, including diabetes, cancer, and dementia. With assessment tools for determining your bio age, recipes, and plans for putting it all into practice,Younger You helps you repair years of damage, ward off chronic disease, and optimize your health—for years to come.

Big Podcast – Grow Your Podcast Audience, Build Listener Loyalty, and Get Everybody Talking About Your Show David Hooper, 2019-03-12 Is it worth doing a podcast if nobody listens? You started your podcast because you want to: - Spread an important message - Share your passion - Make money But your podcast hasn't quite taken off like you thought it would. What happened? This book is for podcasters who can't quite figure out what they're doing wrong (and are ready to do things right). You'll learn: - Why your "natural personality" may be repelling to people and how to make it attract listeners to your podcast like a magnet (See p198) - What to do when a company tries to "lowball" you on advertising fees (do nothing, except send them the email on p424) - It's easy to screw up an interview. To be sure you don't run into any problems, use my "guest contract" on p311. - A six-word "trick" (learned from a 20-year radio veteran) that will instantly make you a better host (it's on p210) - 9 reasons to kill an interview before it happens – ignore these "red flags" and you'll be sorry (p299) - What Victoria's Secret models know about podcasting (even though you never hear them talk) – this lesson starts on p208! - Nervous on the mic? You have lots of company – 75% of podcasters to be exact. I give you a 5-step way to cure your "stage fright" on p229. - If you're scared of getting bad reviews, don't worry – I have three simple ways to handle critics on p236 (two of which can turn critics into fans) - Why copying top podcasters may be killing your podcast (I share the story on p116) and how to develop a podcasting style that works for you (and will attract more listeners) - My 3-step "episode teaser" formula – it's boring, but it works (get it on p110) - Thinking of doing a "daily" podcast? You must read p103 before you start. - Want to impress a guest? See the chapter starting on p321 for my 3-step followup "ritual" that will make being on your podcast unforgettable (and encourage guests to promote your episodes) And that's just the start ... This book contains my complete system on how to attract listeners, deliver your message effectively, and build a big podcast. You can't build a big podcast on hope. But you can build a big podcast. And if you're ready to do just that, read this book.

Nanofiber Air Filter Materials for Efficient Particulate Matter Removal Agasthiyaraj L, 2024-02-13 Human health is harmed by both brief and prolonged period exposure to PM2.5 pollution. Particulate Matter (PM) is commonly divided into two groups, PM2.5 is particles with an aerodynamic diameter lower than 2.5 μm , and if the particles' aerodynamic diameter is between 2.5 to 10 μm then it is PM10. PM2.5 particles are generated by different man-made and natural sources such as vehicular emissions, industrial emissions, power generation emissions, cooking, house cleaning, forest fire, volcano eruption etc. Especially, PM2.5 particles are critically dangerous particles which is capable to interpenetrate into human lungs and bronchi; which causes respiratory diseases like cardiovascular disease, stroke, chronic bronchitis, asthma etc., to human beings. Thus one-third of the effects of PM2.5 pollution is associated with lung cancer, stroke, and chronic vascular disease. Majority of the particulate pollutants consist of organic compounds, such as carbon-derived compounds and also nitrogen and sulfur-based inorganic compounds. Some other sort of primary pollutant is bio-aerosols, which include bacteria, viruses, and fungi. Because they are easily spread by contaminated air, this significantly enhances the risk to human health. These biological pollutants will induce toxigenic, allergic, infectious, and other disorders in both chronic and acute forms. To protect humans from PM2.5 pollution filtration of the air is the best preservation. Resultantly, interest in high-proficiency air filtration technologies which could collect dangerous particles, toxic gases and biological contaminants all at the same time is growing. Also, these high-efficiency air filter media with different multi functionalities that can work in various temperature and humidity conditions for real-time applications is gathering a lot of attention in the past few years.
