Freedom in the World 2004 Aili Piano, Arch Puddington, 2004 Freedom in the World contains both comparative ratings and written narratives and is now the standard reference work for measuring the progress and decline in political rights and civil liberties on a global basis.

Global Trends 2040 National Intelligence Council, 2021-03 The ongoing COVID-19 pandemic marks the most significant, singular global disruption since World War II, with health, economic, political, and security implications that will ripple for years to come. - *Global Trends 2040* (2021) *Global Trends 2040-A More Contested World* (2021), released by the US National Intelligence Council, is the latest report in its series of reports starting in 1997 about megatrends and the world's future. This report, strongly influenced by the COVID-19 pandemic, paints a bleak picture of the future and describes a contested, fragmented and turbulent world. It specifically discusses the four main trends that will shape tomorrow's world: - Demographics-by 2040, 1.4 billion people will be added mostly in Africa and South Asia. - Economics-increased government debt and concentrated economic power will escalate problems for the poor and middleclass. - Climate-a hotter world will increase water, food, and health insecurity. - Technology-the emergence of new technologies could both solve and cause problems for human life. Students of trends, policymakers, entrepreneurs, academics, journalists and anyone eager for a glimpse into the next decades, will find this report, with colored graphs, essential reading.

Freedom in the World 2006 Freedom House, 2006 Freedom in the World, the Freedom House flagship survey whose findings have been published annually since 1972, is the standard-setting comparative assessment of global political rights and civil liberties. The survey ratings and narrative reports on 192 countries and a group of select territories are used by policy makers, the media, international corporations, and civic activists and human rights defenders to monitor trends in democracy and track improvements and setbacks in freedom worldwide. Press accounts of the survey findings appear in hundreds of influential newspapers in the United States and abroad and form the basis of numerous radio and television reports. The Freedom in the World political rights and civil liberties ratings are determined through a multi-layered process of research and evaluation by a team of regional analysts and eminent scholars. The analysts used a broad range of sources of information, including foreign and domestic news reports, academic studies, nongovernmental organizations, think tanks, individual professional contacts, and visits to the region, in conducting their research. The methodology of the survey is derived in large measure from the Universal Declaration of Human Rights, and these standards are applied to all countries and territories, irrespective of geographical location, ethnic or religious composition, or level of economic development.

Mathematicians in Love Rudy Rucker, 2008-07-08 A riveting new science fiction novel from the writer who twice won the Philip K. Dick Award for best SF novel. Bela and Paul, two wild young mathematicians, are friends and roommates, and in love with the same woman, who happens to be Alma, Bela's girlfriend. They fight it out by changing reality using cutting edge math, to

change who gets the girl. The contemporary world they live in is not quite this one, but much like Berkeley, California, and the two graduate students are trying to finish their degrees and get jobs. It doesn't help that their unpredictable advisor Roland is a mad mathematical genius who has figured out a way to predict isolated and specific bits of the future that can cause a lot of trouble. . .and he's starting to see monsters in mirrors. Bela and Paul start to mess around with reality, and when that happens, all heaven and hell break loose. Those monsters of Roland's were really there, but who are they? This novel is a romantic comedy with a whole corkscrew of SF twists. At the publisher's request, this title is being sold without Digital Rights Management software (DRM) applied.

Resisting Brazil's Military Regime John W. F. Dulles,2010-01-01 Praised by his many admirers as a courageous and fearless defender of human rights, Heráclito Fontoura Sobral Pinto (1893-1991) was the most consistently forceful opponent of the regime of Brazilian dictator Getúlio Vargas. John W. F. Dulles chronicled Sobral's battles with the Vargas government in Sobral Pinto, *The Conscience of Brazil: Leading the Attack against Vargas* (1930-1945), which *History: Reviews of New Books* called a must-read for anyone wanting to understand twentieth-century Brazil. In this second and final volume of his biography of Sobral Pinto, Professor Dulles completes the story of the fiery crusader's fight for democracy, morality, and justice, particularly for the downtrodden. Drawing on Sobral's vast correspondence, Dulles offers an extensive account of Sobral's opposition to the military regime that ruled Brazil from 1964 to 1985. He describes how Sobral Pinto defended those who had been politically influential before April, 1964, as well as other victims of the regime, including Communists, once-powerful labor leaders, priests, militant journalists, and students. Because Sobral Pinto participated in so many of the struggles against the military regime, his experiences provide vivid new insights into this important period in recent Brazilian history. They also shed light on developments in the Catholic Church (Sobral, a devout Catholic, vigorously opposed liberation theology), as well as on Sobral's key role in preserving Brazil's commission for defending human rights.

Social Policy Expansion in Latin America Candelaria Garay,2016-12-29

Throughout the twentieth century, much of the population in Latin America lacked access to social protection. Since the 1990s, however, social policy for millions of outsiders - rural, informal, and unemployed workers and dependents - has been expanded dramatically. *Social Policy Expansion in Latin America* shows that the critical factors driving expansion are electoral competition for the vote of outsiders and social mobilization for policy change. The balance of partisan power and the involvement of social movements in policy design explain cross-national variation in policy models, in terms of benefit levels, coverage, and civil society participation in implementation. The book draws on in-depth case studies of policy making in

Argentina, Brazil, Chile, and Mexico over several administrations and across three policy areas: health care, pensions, and income support. Secondary case studies illustrate how the theory applies to other developing countries.

Freedom in the World 2003 Freedom House (U.S.), 2003 Freedom in the World contains both comparative ratings and written narratives and is now the standard reference work for measuring the progress and decline in political rights and civil liberties on a global basis.

Loring, 2012-10-22 This manual is a comprehensive compilation of methods that work for deriving, characterizing, and differentiating hPSCs, written by the researchers who developed and tested the methods and use them every day in their laboratories. The second edition of the Human Stem Cell Manual is an extraordinary laboratory guide for both experienced stem cell researchers and those just beginning to use stem cells in their work. Offers a comprehensive guide for medical and biology researchers who want to use stem cells for basic research, disease modeling, drug development, and cell therapy applications. Provides a cohesive global view of the current state of stem cell research, with chapters written by pioneering stem cell researchers in Asia, Europe, and North America. Includes new chapters devoted to recently developed methods, such as iPSC technology, written by the scientists who made these breakthroughs.

Amazonian Dark Earths: Explorations in Space and Time Bruno Glaser, William I. Woods, 2013-12-14

Visual Propaganda and Extremism in the Online Environment U. S. Army U.S. Army War College Press, Strategic Studies Institute, 2015-01-01 Most of the papers included in this volume, except for the editor's introduction, come from the conference on Visual Propaganda and Online Radicalization hosted in 2012 by Georgia State University in conjunction with the U.S. Army War College. They all speak to the power of visual images, particularly in the online environment, and the sophistication with which a variety of extremist and terrorist groups have adapted to the online environment, particularly through the use of powerful visual images. The strategic point made in these essays, and which serves as a unifying theme throughout the collection, is that weaker forces use these materials to great effect, and to even greater effect when we either underestimate the power of visual images or fail to develop effective counters. The unique value offered by these essays is to lay out clearly the ways in which images work for extremist groups, and to begin the process of developing effective strategies for responding. As the editors make clear, there is an extensive literature available establishing that when compared to text (or words heard over an audio track), images are remembered better, over a longer period of time, and with greater emotional power, having commanded more attention initially. This is true for moving and still images.

Corporate Restructuring Michael Pomerleano, William Shaw, 2005 In light of

the periodic financial crises of the late 1990s, there has been a growing recognition of the need for a strategy to avoid and mitigate the severity of crises in the corporate sector, requiring the complementary efforts of policymakers, regulators, lawyers, insolvency experts and financiers. This publication examines the issue of corporate restructuring, drawing on case studies of corporate crises in Indonesia, Korea, Malaysia and Thailand among others; and discusses a range of topics including the key role of governments in securing an enabling legal system, effective out-of-court workouts, supportive tax regimes, policy and regulatory initiatives to address systemic corporate problems.

Neural Stem Cell Assays Navjot Kaur, Mohan C. Vemuri, 2015-02-16 Neural stem cells offer a valuable model system for delineating the cellular and developmental processes in normal and diseased states of the central nervous system. In particular, neural stem cells have huge potential in regenerative medicine, owing to their expansion capability in culture and the ability to differentiate into multiple sub-neural lineages. *Neural Stem Cell Assays* provides a detailed and comprehensive review of the basic methods for neural stem cell cultures. Including an overview of progress in the field over the past decade, *Neural Stem Cell Assays* is a one-stop reference for consistent methods and reliable tools that span the entire assay work flow, from isolation or generation of neural stem cells to characterization, manipulation and final application of neural stem cells in disease paradigms such as Parkinson's disease, multiple sclerosis and amyotrophic lateral sclerosis. An excellent source of information for academic, pharmaceutical and biotechnology researchers who are new to the neural stem cell field, *Neural Stem Cell Assays* is an invaluable to experienced users who wish to integrate newly developed tools and technologies into their workflow. The book also covers important course material for students at the undergraduate and graduate level who are learning the basics of neural stem cell cultures, and differentiation to sub-neural lineages.

A Horizon of (im)possibilities Katerina Hatzikidi, Eduardo Dullo, 2021 The 2018 presidential election result in Brazil surprised and shocked many. Since then, numerous debates and a growing body of texts have attempted to understand the country's so-called 'conservative turn'. A gripping in-depth account of politics and society in Brazil today, this new volume brings together a myriad of different perspectives to help us better understand the political events that shook the country in recent years. Combining ethnographic insights with political science, history, sociology, and anthropology, the interdisciplinary analyses included offer a panoramic view on social and political change in Brazil, spanning temporal and spatial dimensions. Starting with the 2018 presidential election, the contributors discuss the country's recent -or more distant- past in relation to the present. Pointing to the continuities and disruptions in the course of those years, the analyses offered are an invaluable guide to unpacking and understanding the limits of Brazilian democracy, including what has already come to pass, but also what is yet to come.

Food Colour and Appearance Hutchings, 2012-12-06 Much of man's behaviour is controlled by appearance, but the appearance of his food is of paramount

importance to his health and well-being. In day-to-day survival and marketing situations, we can or not most foods are fit to eat from their optical tell whether properties. Although vision and colour perception are the means by which we appreciate our surroundings, visual acceptance depends on more than just colour. It depends on total appearance. In the recent past the food technologist has been under pressure to increase his/her understanding of first, the behaviour of raw materials under processing, and second, the behaviour and motivation of his/her customers in a growing, more discriminating, and worldwide market. The chapters which follow describe the philosophy of total appearance, the factors comprising it, and its application to the food industry. Included are: considerations of the evolutionary, historical, and cultural aspects of food appearance; the physics and food chemistry of colour and appearance; the principles of sensory appearance assessment and appearance profile analysis, as well as instrumental measurement; the interaction of product appearance, control, and acceptance in the varied environments of the laboratory, production line, supermarket, home and restaurant. A broad examination has been made in an attempt to get into perspective the importance of appearance to all sectors of the industry.
