Transforming the Workforce for Children Birth Through Age 8 National Research

Council, Institute of Medicine, Board on Children, Youth, and Families, Committee on the Science of Children Birth to Age 8: Deepening and Broadening the Foundation for Success, 2015-07-23 Children are already learning at birth, and they develop and learn at a rapid pace in their early years. This provides a critical foundation for lifelong progress, and the adults who provide for the care and the education of young children bear a great responsibility for their health, development, and learning. Despite the fact that they share the same objective - to nurture young children and secure their future success - the various practitioners who contribute to the care and the education of children from birth through age 8 are not acknowledged as a workforce unified by the common knowledge and competencies needed to do their jobs well. Transforming the Workforce for Children Birth Through Age 8 explores the science of child development, particularly looking at implications for the professionals who work with children. This report examines the current capacities and practices of the workforce, the settings in which they work, the policies and infrastructure that set qualifications and provide professional learning, and the government agencies and other funders who support and oversee these systems. This book then makes recommendations to improve the quality of professional practice and the practice environment for care and education professionals. These detailed recommendations create a blueprint for action that builds on a unifying foundation of child development and early learning, shared knowledge and competencies for care and education professionals, and principles for effective professional learning. Young children thrive and learn best when they have secure, positive relationships with adults who are knowledgeable about how to support their development and learning and are responsive to their individual progress. Transforming the Workforce for Children Birth Through Age 8 offers guidance on system changes to improve the quality of professional practice, specific actions to improve professional learning systems and workforce development, and research to continue to build the knowledge base in ways that will directly advance and inform future actions. The recommendations of this book provide an opportunity to improve the quality of the care and the education that children receive, and ultimately improve outcomes for children.

Black Diamond Queens Maureen Mahon,2020-10-09 African American women have played a pivotal part in rock and roll—from laying its foundations and singing chart-topping hits to influencing some of the genre's most iconic acts. Despite this, black women's importance to the music's history has been diminished by narratives of rock as a mostly white male enterprise. In *Black Diamond Queens*, Maureen Mahon draws on recordings, press coverage, archival materials, and interviews to document the history of African American women in rock and roll between the 1950s and the 1980s. Mahon details the musical contributions and cultural impact of Big Mama Thornton, LaVern Baker, Betty Davis, Tina Turner, Merry Clayton, Labelle, the Shirelles, and others, demonstrating how dominant views of gender, race, sexuality, and genre affected their careers. By uncovering this hidden history of black women in rock and roll, Mahon reveals a powerful sonic legacy that continues to reverberate into the twenty-first century.

Solarversia MR Toby Downton,2015-08-18 It's the 29th February 2020 and Nova Negrahnu cannot wait to start playing Solarversia, a year-long game based in a virtual world that's modelled on the real world solar system. Given three lives, three vehicles, and told to master the Science of Solarversia to stand a chance of winning, players compete against 100 million people for the 10m grand prize, and a place in the history books. Solarversia starts three months before Nova's A-levels, the life-changing exams that could see her win a place at Nottingham, the university that Charlie attends, the second-year student she falls for on an open-day visit. As she strains to balance her addiction to the game with her mounting schoolwork, Nova's world is unexpectedly turned upside down when the Holy Order, a mysterious cult-like organisation sets its sights on the game and Spiralwerks, its creator. Told from three different perspectives - Nova the gamer, Artica Kronkite, the CEO of Spiralwerks, and Casey Brown, a newly-initiated member of the Holy Order - Solarversia is a game that author Toby Downton hopes to make for real, to launch in 2020, so that people can actually play it. From the initial press release: The world of virtual reality is about to fundamentally reshape the way in which we live, work and play. The Oculus Rift - the much-lauded and potentially transformational VR headset, which broke crowdfunding records in 2012, and was recently acquired by Facebook for \$2 billion - is scheduled to launch in early 2016. While its most obvious impact will hit the world's 700 million plus gamers, Facebook CEO Mark Zuckerberg believes the potential VR impact to be far more profound: Imagine enjoying a court side seat at a game, studying in a classroom of students and teachers all over the world or consulting with a doctor face-to-face - just by putting on goggles in your home. The relatively new genre of litRPG, or virtual reality inspired science fiction centred around the gaming industry, is booming, with Ernest Cline's bestseller Ready Player One already in production for a major movie adaptation with Spielberg directing. Downton is emerging as a driving force in the VR revolution. His novel Solaversia is just the first step in his thrillingly ambitious multi-platform story-telling experience that will explore the relationships between artificial intelligence, technology and the human spirit. Downton has incorporated his tech-company - Spiralwerks - in the real world, developing Solarversia as a commercially available game, ready to storm the games market in 2020. Accompanying the publication of Solarversia is the Golden Ticket promotion, which will enable readers to win one of a hundred specially reserved places within the Player's Grid, through a series of innovative competitions.
