Jörgen Schäfer, Peter Gendolla

**Beyond Media Borders, Volume 1** Lars Elleström,2020-10-14 This open access book promotes the idea that all media types are multimodal and that comparing media types, through an intermedial lens, necessarily involves analysing these multimodal traits. The collection includes a series of interconnected articles that illustrate and clarify how the concepts developed in Elleström's influential article The Modalities of Media: A Model for Understanding Intermedial Relations (Palgrave Macmillan, 2010) can be used for methodical investigation and interpretation of media traits and media interrelations. The authors work with a wide range of old and new media types that are traditionally investigated through limited, media-specific concepts. The publication is a significant contribution to interdisciplinary research, advancing the frontiers of conceptual as well as practical understanding of media interrelations. This is the first of two volumes. It contains Elleström's revised article and six other contributions focusing especially on media integration: how media products and media types are combined and merged in various ways.

**Beyond New Media** Art Herbig,Andrew F. Herrmann,Adam W. Tyma,2014-11-14 Bringing together rhetorical, media studies, organizational communication, ethnographic, pop culture, mass communication, gender studies, and educational technology backgrounds to bear on polymediation, the authors interrogate the language by which we talk about the contemporary media landscape and the impact of the media on people's lives.

**Beyond Media** Richard W. Budd,Brent D. Ruben,1988 This revised and enlarged edition provides a fresh look at mass communication theory and the institutions of mass communication. Beyond Media broadens and redefines the concept of mass communication to include all institutions which contribute to the mass production and distribution of information within society, including television, film, newspapers, books and magazines, as well as museums, libraries, popular art, politics, theater, religion and architecture. The book begins with a new preface examining the role of mass communication and related institutions in the Information Age. It is followed by an extensive chapter tracing the development of the traditional concept of mass communication, with a dialogue between Lee Thayer and Leslie Moeller, two prominent scholars in the field. A summary of important theories and research findings in the field completes this section. Eight chapters follow which examine other major mass media institutions. Key figures from each field, Victor Danilov on museums, David Davidson on libraries, Paola Soleri on architecture, Roberta Mueller on art, Richard Rudman on politics, James Hitchcock on the church, Vincent Sardi on restaurants, and Ken Weissman and Maxine Fox on theater, discuss the roles of their respective institutions in the mass production and distribution of information.

Beyond Media Literacy Colin Scheyen,2015-05 This handbook is for anyone interested in breaking away from the antiquated models of media literacy that are promoted in school curriculums everywhere. It attempts to flip the script by explaining that young people may have more to teach us about media literacy than we do them. Young people are hungry to explore, understand, and repurpose media to make it relevant to their lives and their understanding of the world. As parents, teachers, community workers, and allies, we need to change the way we approach media education by working with young people rather than talking at them. The first seven chapters lay out the need for a paradigm shift in media literacy and suggest an alternative approach. The next section provides twenty possible activities to facilitate students working together, where the development of student leadership and group cohesion are outcomes as important as the acquisition of key media skills. The final section suggests nine options for long-term culminating projects. Altogether, the handbook provides a complete orientation and practical program for anyone wishing to work with youth to achieve a more comprehensive, active, and socially responsible media literacy .

**Beyond Media Borders, Volume 2** Lars Elleström,2020-10-13 This open access book promotes the idea that all media types are multimodal and that comparing media types, through an intermedial lens, necessarily involves analysing these multimodal traits. The collection includes a series of interconnected articles that illustrate and clarify how the concepts developed in Elleström's influential article The Modalities of Media: A Model for Understanding Intermedial Relations (Palgrave Macmillan, 2010) can be used for methodical investigation and interpretation of media traits and media interrelations. The authors work with a wide range of old and new media types that are traditionally investigated through limited, media-specific concepts. The publication is a significant contribution to interdisciplinary research, advancing the frontiers of conceptual as well as practical understanding of media interrelations. This is the second of two volumes. It contains a concluding article by Elleström and seven contributions concentrated on the issue of media transformations: how media characteristics are transferred and transfigured among various media products and media types.

**Beyond Consumer Capitalism** Justin Lewis,2014-01-24 Consumer capitalism dominates our economy, our politics and our culture. Yet there is a growing body of research from a range of disciplines that suggests that consumer capitalism may be past its sell-by date. Beyond Consumer Capitalism begins by showing how, for people in the developed world, consumer capitalism has become economically and environmentally unsustainable and is no longer able to deliver its abiding promise of enhancing quality of life . This cutting-edge book then asks why we devote so little time and effort to imagining other forms of human progress. The answer, Lewis suggests, is that our cultural and information industries limit rather than stimulate critical thinking, keeping us on the treadmill of consumption and narrowing our vision of what constitutes progress. If we are to find a way out of this cul de sac, Lewis argues, we must begin by analysing the role of media in consumer capitalism and changing the way we organize media and communications. We need a cultural environment that encourages rather than stifles new ideas about what guides our economy and our society. Timely and compelling, Beyond Consumer Capitalism will have strong appeal to students and scholars of media studies, cultural studies and consumer culture.

**Beyond the Echo Chamber** Jessica Clark,Tracy Van Slyke,2010 In less than a decade, a new breed of progressive media projects have captured huge, non-traditional audiences and shaped political campaigns, public debates and policy in ways that could never have been imagined in a previous era. Drawing on years of research, media experts Jessica Clark and Tracy Van Slyke now lay out a clear, hard-hitting theory of media impact. Their study showcases influential projects such as TPM Caf , FireDogLake and Feministing, suggesting ways in which media makers can exploit changes in journalism, technology, and politics.

Beyond Media Literacy Lars C. Grabbe,Andrew McLuhan,Tobias Held,2023-07-26 The interplay of physical reality and media environments is getting enhanced by new technological innovations. We are living in the age of digital aesthetics and there is a need for individual, cultural or social forms and variations of media literacy. This book seeks the limits of media literacies, and to go beyond them. »Beyond Media Literacy« contributes to the wide range of the media literacy discourse with approaches in modern media theory, philosophy, art and film theory, computer graphics as well as the complex range of modern aesthetics. This volume monitors and discusses the relation of media and literacy in the context of media as environments with effects on psyche and society.

Beyond Brand: Master Your Power, Joy, and Media To Live Your Legacy Joy Donnell,2019-10-24 Becoming a brand sounds like a big idea for people, but it's actually a small, limiting concept. Humans are creators, changemakers, disruptors, and innovators. We're the forces that shift behaviors, environments, and norms. To limit our abilities to finite public images is a disservice to human advancement as well as personal growth.For those seeking a different

direction, *Beyond Brand* explores tapping your power, inner joy and media outreach to build cultural legacy - a legacy you can live in real-time as well as leave behind. Through stories, self examination, best practices and strategy, Donnell explores how to keep what you create aligned with who you are becoming. You're human. You deserve to be more than a brand. Look beyond brand and live your legacy.

Media Effects and Beyond Karl Erik Rosengren, 2005-09-27 Addressing a multitude of questions and issues surrounding how we use the media, *Media Effects and Beyond* represents the results of an international research programme into the use and effects of television, video and music. Seeing the viewer not simply as passive object but as a very active subject, the contributors engage with every aspect of children's, adolescents' and families' use of the media - its character, causes and consequences. Topics explored include media and social mobility; family communication, and consumer lifestyles. Confronting the two traditions of lifestyle research and effects research, *Media Effects and Beyond* offers a much-needed reconceptualization of both. Written at a time when traditional European public service media systems struggle against a tidal wave of commercial electronic media, this book will be important reading for students of contemporary culture and communications, as well as media policy for decision makers.

**Beyond Representational Correctness** Edward Schiappa, 2008-03-27 Argues that representational correctness can cause critics to miss the positive work that films and television shows can perform in reducing prejudice.

**Beyond Media Borders** Lars Elleström, 2021 This open access book promotes the idea that all media types are multimodal and that comparing media types, through an intermedial lens, necessarily involves analysing these multimodal traits. The collection includes a series of interconnected articles that illustrate and clarify how the concepts developed in Elleström's influential article *The Modalities of Media: A Model for Understanding Intermedial Relations* (Palgrave Macmillan, 2010) can be used for methodical investigation and interpretation of media traits and media interrelations. The authors work with a wide range of old and new media types that are traditionally investigated through limited, media-specific concepts. The publication is a significant contribution to interdisciplinary research, advancing the frontiers of conceptual as well as practical understanding of media interrelations. The first volume contains Elleström's revised article and six other contributions focusing especially on media integration: how media products and media types are combined and merged in various ways. The second volume contains concluding article by Elleström and seven contributions concentrated on the issue of media transformations: how media characteristics are transferred and transfigured among various media products and media types.

**Beyond Media**, 1979

The Good Drone Austin Choi-Fitzpatrick, 2020-07-28 How small-scale drones, satellites, kites, and balloons are used by social movements for the greater good. Drones are famous for doing bad things: weaponized, they implement remote-control war; used for surveillance, they threaten civil liberties and violate privacy. In *The Good Drone*, Austin Choi-Fitzpatrick examines a different range of uses: the deployment of drones for the greater good. Choi-Fitzpatrick analyzes the way small-scale drones--as well as satellites, kites, and balloons--are used for a great many things, including documenting human rights abuses, estimating demonstration crowd size, supporting anti-poaching advocacy, and advancing climate change research. In fact, he finds, small drones are used disproportionately for good; nonviolent prosocial uses predominate.

*Global Media Literacy in a Digital Age* Belinha S. De Abreu, Melda N. Yildiz, 2016 How do we connect with one another? How do the media portray different cultures and beliefs? What messages are often omitted from media? How do we connect what we see in the worldwide media to the classroom? This book, divided into four parts, serves to answer many of these questions. In Part 1, readers are provided with a historical look at media literacy education while glimpsing the future of this educational movement. Part 2 curates voices from around the globe, from practitioners to researchers, who provide a look at issues that are of consequence in our worldwide society. Part 3 focuses on education through cases studies that give educational perspectives and assessment opportunities. The final section, «Take Action, » offers the reader resources for growing global media literacy around the world. This timely resource provides a look at how media literacy education has become a global and interconnected dialogue brought about by the evolution of technology.

**Beyond Monopoly** Michela Ardizzoni, Chiara Ferrari, 2009-12-28 While Italian media industries are booming, changing, and challenging audiences, the existing Anglophone literature on the subject is scarce. *Beyond Monopoly* fills this gap by engaging with the most recent changes and trends in Italian media.

Beyond Hashtags Sarah Florini, 2019-12-03 How black Americans use digital networks to organize and cultivate solidarity Unrest gripped Ferguson, Missouri, after Mike Brown, an unarmed black teenager, was shot and killed by Officer Darren Wilson in August 2014. Many black Americans turned to their digital and social media networks to circulate information, cultivate solidarity, and organize during that tumultuous moment. While Ferguson and the subsequent protests made black digital networks visible to mainstream media, these networks did not coalesce overnight. They were built and maintained over years through common, everyday use. *Beyond Hashtags* explores these everyday practices and their relationship to larger social issues through an in-depth analysis of a trans-platform network of black American digital and social media users and content creators. In the crucial years leading up to the emergence of the Movement for Black Lives, black Americans used digital networks not only to cope with day-to-day experiences of racism, but also as an incubator for the debates that have since exploded onto the national stage. *Beyond Hashtags* tells the story of an influential subsection of these networks, an assemblage of podcasting, independent media, Instagram, Vine, Facebook, and the network of Twitter users that has come to be known as “Black Twitter.” Florini looks at how black Americans use these technologies often simultaneously to create a space to reassert their racial identities, forge community, organize politically, and create alternative media representations and news sources. *Beyond Hashtags* demonstrates how much insight marginalized users have into technology.

*Beyond Blurred Lines* Nickie D. Phillips, 2016-10-19 From its origins in academic discourse in the 1970s to our collective imagination today, the concept of “rape culture” has resonated in a variety of spheres, including television, gaming, comic book culture, and college campuses. *Beyond Blurred Lines* traces ways that sexual violence is collectively processed, mediated, negotiated, and contested by exploring public reactions to high-profile incidents and rape narratives in popular culture. The concept of rape culture was initially embraced in popular media – mass media, social media, and popular culture – and contributed to a social understanding of sexual violence that mirrored feminist concerns about the persistence of rape myths and victim-blaming. However, it was later challenged by skeptics who framed the concept as a moral panic. Nickie D. Phillips documents how the conversation shifted from substantiating claims of a rape culture toward growing scrutiny of the prevalence of sexual assault on college campuses. This, in turn, renewed attention toward false allegations, and away from how college enforcement policies fail victims to how they endanger accused young men. Ultimately, she successfully lends insight into how the debates around rape culture, including microaggressions, gendered harassment and so-called political correctness, inform our collective

imaginations and shape our attitudes toward criminal justice and policy responses to sexual violence.

*Beyond the Screen* Jörgen Schäfer,Peter Gendolla,2015-07-31 While literature in computer-based and networked media has so far been experienced by looking at the computer screen and by using keyboard and mouse, nowadays human-machine interactions are organized by considerably more complex interfaces. Consequently, this book focuses on literary processes in interactive installations, locative narratives and immersive environments, in which active engagement and bodily interaction is required from the reader to perceive the literary text. The contributions from internationally renowned scholars analyze how literary structures, interfaces and genres change, and how transitory aesthetic experiences can be documented, archived and edited.
