Reforming the Postal Sector in the Face of Electronic Competition Anheuser-

Busch,2013-01-01 'Professors Crew and Kleindorfer have once again assembled a valuable collection of essays that address timely and important issues in postal sectors throughout the world. The essays employ diverse methodologies to provide useful insights about recent and likely future developments in the postal industry. This book will be a valuable resource for researchers, industry practitioners, and policymakers alike.' – David E.M. Sappington, University of Florida, US In our increasingly technology-focused world, demand for traditional postal services is steadily shrinking. This timely volume examines the many challenges that the worldwide postal sector is facing as a result of growing electronic competition, and offers expert recommendations for reshaping postal structures to strengthen their competitiveness in an electronic age. Drawn from a selection of papers presented at the 20th Conference on Postal and Delivery Economics in Brighton, UK, this book showcases expert contributions on the rapidly changing postal sectors in both the United States and Europe. Topics discussed include the various financial challenges posed by decreasing demand for postal services, recent changes in how postal services are provided, and new structures and modes of operation, such as privatization, that are currently affecting the industry. Contributors offer a thorough breakdown of the issues as well as ideas for keeping the postal sector alive in a world that is growing ever more reliant on purely electronic means of communication. Economists with an interest in regulatory economics, innovation and public sector economics will find this volume useful and informative, as will institutional libraries and industry professionals.

Ghana International Monetary Fund,2012-02-08 Ghana's macroeconomic outlook is positive, and the medium-term policy stance is appropriate. On the fiscal side, the government plans to scale

up infrastructure investment and further boost revenues. A revised debt sustainability analysis suggests scope for higher nonconcessional borrowing, provided fiscal targets are achieved. The banking sector remains adequately capitalized and liquid, and reform priorities include reducing nonperforming loans and strengthening banks' risk management practices. Program risks arise from external and domestic sources.

Greece International Monetary Fund, 2010-12-17 A very ambitious fiscal adjustment effort is under way. Fiscal institutional and sectoral reforms have been elaborated for a more durable adjustment. Greece's determination toward a comprehensive modernization of the health sector, beginning with a far-reaching reform of state enterprises and redoubling efforts to improve tax administration, is commended. An acceleration of reforms is essential to restore robust economic growth. Liquidity remains precariously tight. Pressure points are evident in the public sector, and still generally unfavorable investor sentiments suggest that the program is still at crossroads.

Twin Peaks for Europe: State-of-the-Art Financial Supervisory Consolidation Olivia Johanna Erdélyi,2016-06-14 The book addresses the truly interdisciplinary and highly controversial subject of international financial regulation and supervision, which has been at the center of academic, political, and public attention since the start of the current economic and financial crisis. Drawing on international financial regulatory and supervisory experience and in line with the European Monetary Union's gradual transformation into a Genuine Economic and Monetary Union, it proposes the transformation of the European financial supervisory framework into a hybrid twin-peaks model to create the previously missing necessary legal foundation for the adoption of the so-called Group Support Regime (GSR). The latter is a relatively simple and transparent capital management tool for (re)insurance groups operating in a parent-subsidiary structure proposed by the European Commission under the new Solvency II insurance supervisory framework, which despite lengthy consideration was eventually rejected by Member States.

Model Rules of Professional Conduct American Bar Association. House of Delegates,Center for Professional Responsibility (American Bar Association),2007 The Model Rules of Professional Conduct provides an up-to-date resource for information on legal ethics. Federal, state and local courts in all jurisdictions look to the Rules for guidance in solving lawyer malpractice cases, disciplinary actions, disqualification issues, sanctions questions and much more. In this volume,

black-letter Rules of Professional Conduct are followed by numbered Comments that explain each Rule's purpose and provide suggestions for its practical application. The Rules will help you identify proper conduct in a variety of given situations, review those instances where discretionary action is possible, and define the nature of the relationship between you and your clients, colleagues and the courts.

Women and Austerity Maria Karamessini, Jill Rubery, 2013-09-11 Austerity has become the new principle for public policy in Europe and the US as the financial crisis of 2008 has been converted into a public debt crisis. However, current austerity measures risk losing past progress towards gender equality by undermining important employment and social welfare protections and putting gender equality policy onto the back burner. This volume constitutes the first attempt to identify how the economic crisis and the subsequent austerity policies are affecting women in Europe and the US, tracing the consequences for gender equality in employment and welfare systems in nine case studies from countries facing the most severe adjustment problems. The contributions adopt a common framework to analyse women in recession, which takes into account changes in women's position and current austerity conditions. The findings demonstrate that in the immediate aftermath of the financial crisis, employment gaps between women and men declined — but due only to a deterioration in men's employment position rather than any improvements for women. Tables are set to be turned by the austerity policies which are already having a more negative impact on demand for female labour and on access to services which support working mothers. Women are nevertheless reinforcing their commitment to paid work, even at this time of increasing demands on their unpaid domestic labour. Future prospects are bleak. Current policy is reinforcing the same failed mechanisms that caused the crisis in the first place and is stalling or even reversing the long

term growth in social investment in support for care. This book makes the case for gender equality to be placed at the centre of any progressive plan for a route out of the crisis.

The Oxford Handbook of Philosophy of Science Paul Humphreys, 2016-08-04 This handbook provides both an overview of state-of-the-art scholarship in philosophy of science, as well as a guide to new directions in the discipline. Section I contains broad overviews of the main lines of research and the state of established knowledge in six principal areas of the discipline, including computational, physical, biological, psychological and social sciences, as well as general philosophy of science. Section II covers what are considered to be the traditional topics in the philosophy of science, such as causation, probability, models, ethics and values, and explanation. Section III identifies new areas of investigation that show promise of becoming important areas of research, including the philosophy of astronomy and astrophysics, data, complexity theory, neuroscience, simulations, post-Kuhnian philosophy, post-empiricist epistemology, and emergence. Most chapters are accessible to scientifically educated non-philosophers as well as to professional philosophers, and the contributors - all leading researchers in their field -- bring diverse perspectives from the North American, European, and Australasian research communities. This volume is an essential resource for scholars and students.
