Drills and Exercises for Pool and Pocket Billiards Players Allan P. Sand, Do you seriously want to lose less and win more often? If so, then you need to understand the importance of practice. Time must be spent (daily or weekly) to learn how to force the balls to obey your intentions. Even 15-20 minutes a week of focused learning will improve your playing skills. This book is your shortcut opportunity to advance your skills and win more games. These exercises and drills are designed to improve all of your skills – physical and mental. Your practice sessions will be much more interesting and challenging. There are hundreds of exercises and drills. Every playing skill is included -- cue ball control (reverse spin, top spin), pocketing skills (straight and many different angles), and more – lots more. ++++++ These drills and exercises are based on the concept of progressive advancement. Start with an easy setup. When you comfortable, increase the difficulty factor. Use these problems in two ways. At home, review an exercise. Consider how you must play the shot. Then, imagine the ball positions on the table in your head. Carefully and thoughtfully play the shot. Consider variations on the problem. Can you do this at different speeds? What are the consequences? Make notes as you think about different ideas - assumptions, possibilities, and variations. Then, at the practice table, select the problem you want to fix. Put down the paper reinforcement rings. Set up the ball configuration. Practice the configuration until it is easy, then try the exercise with left and right side spin on the ball – and at different speeds. Observe the results, and make adjustments. ++++++ How to become the intelligent shooter!! You must decide to become a competitive player. Integrate a simple dedication to intentionally improve your skills. Start with 15 minute sessions, no more than 2 or 3 per day. Keep to a regular weekly schedule. Concentrate on one single improvement at each session. You will quickly observe improved table skills – and enjoy the experience of winning more games.

Carom Billiards Allan P. Sand,2016-12-10 One of the interesting shot patterns is known as full table circle. These shots follow a clockwise or counter-clockwise path around the table rails. This book contains a large assortment of these types of shots. For each shot, there are two table layouts. The first is the ball positions on the table. The second is how the pro player made the point. There are two ways you can use these examples. First - as a mental exercise. Study the ball layout and the ball paths to determine how the shot was played. Second - as a table exercise. Set the balls up in the positions. Try to duplicate the shot. It may take only a few attempts, or a lot before you learn how to consistently score the point. You will do a lot of experimentation with different speeds and spins. The result will be a better understanding on how to play similar shots during your competitions. Enjoy the learning process and good luck!!

Carom Billiards Allan P. Sand,2016-12-10 There are a lot of times when the two object balls are located in a half-table area. One of the more common shots is to play the cue ball in a half table circle. It comes off the first object ball, into the long rail, short rail, and opposite long rail and then connect with the second object ball. This is a large selection of these types of shots. For each shot, there are two table layouts. The first is the ball positions on the table. The second is how the pro player made the point. There are two ways you can use these examples. First - as a mental exercise. Study the ball layout and the ball paths to determine how the shot was played. Second - as a table exercise. Set the balls up in the positions. Try to duplicate the shot. It may take only a few attempts, or a lot before you learn how to consistently score the point. You will do a lot of experimentation with different speeds and spins. Carom Billiards Allan P. Sand,2016-12-10 This is one of a series of Carom Billiards books that show how professional players select shots, based on the table layout. All of these shots have been mapped out based on shots played at international competitions.This book contains a wide variety of examples of the CB paths that travel in a circle at one end of the table. These shots put you inside the head of the player beginning with the ball positions (shown in the first table layout). The second table layout shows the shooting decision and the results of the player's choice.
