🔍 DEVELOPING NORMS FOR THE PROVISION OF BIOLOGICAL LABORATORIES IN LOW-RESOURCE CONTEXTS NATIONAL ACADEMIES OF SCIENCES, ENGINEERING, AND MEDICINE, DIVISION ON EARTH AND LIFE STUDIES, BOARD ON LIFE SCIENCES, POLICY AND GLOBAL AFFAIRS, 2019-05-01 On June 27-28, 2018, the U.S. National Academies of Sciences, Engineering, and Medicine (the National Academies) convened an international workshop in Amsterdam, the Netherlands, on developing norms for the provision of laboratories in low-resource contexts. The U.S. Department of State's Biosecurity Engagement Program requested that the National Academies organize this workshop to engage an international group of organizations that provide funding for construction, upgrades, and maintenance of biological laboratories in countries without the means to build such labs themselves. Twenty-one people from 19 organizations participated. The intent was to advance the conversation about the identification and application of guiding principles and common norms for use by these organizations in their grants, partnerships, and aid. This publication summarizes the presentations and discussions from the workshop.

🔍 THE HOT ZONE Richard Preston, 1995 The virus kills nine out of ten of its victims. Its effects are so quick and so gruesome that even biohazard experts are terrified. It is airborne, it is extremely contagious, and it is about to burn through the suburbs of Washington, D.C. Is there any way to stop it? This doomsday scenario confronted a biohazard SWAT team struggling in secret to stop the outbreak of an exotic hot virus at an Army research facility outside Washington. The Hot Zone tells the dramatic story of their dangerous race against time, along with an alarming account of how previously unknown viruses that have lived undetected in the rain forest for eons are now entering human populations. From the airlocked confines of a biosafety level 4 military lab, to an airliner over Kenya carrying a passenger dissolving into a human virus bomb, to a deserted jungle cave alive with deadly virus, *The Hot Zone* is a non-fiction thriller like no other. The Andromeda Strain--- this is real!

🔍 SMART BIOLABS OF THE FUTURE Sascha Beutel, Felix Lenk, 2022-09-06 This book reviews the advances in data gathering and processing in the biotech laboratory environment, and it sheds new lights on the various aspects that are necessary for the implementation of intelligent laboratory architecture and infrastructure. Smart technologies are increasingly dominating our everyday lives and have become an indispensable part of the industrial environment. The laboratory environment, which has long been rather conservative, has also set out to adapt smart technologies with regards to Industry 4.0 and the Internet of Things (IoT) for the laboratory. Due to the heterogeneity of the existing infrastructure and the often complex work processes, standardization is slow, e.g. to implement device interfaces or standardized driver protocols, which are urgently needed to generate standardized data streams that would be immanent for post-processing of data. Divided into 9 chapters, this book offers an authoritative overview of the diverse aspects in the generation and recording of uniform data sets in the laboratory, and in the processing of the data and enabling seamless processing towards machine learning and artificial intelligence. In the first part of the book, readers will find more about high throughput systems, automation, robotics, and the evolution of technology in the laboratory. The second part of the book is devoted to standardization in lab automation, in which readers will learn more about some regulatory aspects, the SiLA2 standards, the OPC LADS (Laboratory and Analytical Device Standard), and FAIR data infrastructure

🔍 THE CHEMICAL AND BIOLOGICAL NONPROLIFERATION REGIME AFTER THE COVID-19 PANDEMIC Malcolm Dando, 2023-02-21 This book offers an analysis of how the Chemical and Biological Weapons (CBW) regime has responded in the immediate aftermath of the COVID-19 pandemic. Coronavirus has highlighted the need to better protect modern societies from natural, accidental and deliberate disease affecting humans, animals and plants. Within that context preventing the deliberate hostile use of biological and chemical agents will be of increasing importance. Dando asks to what extent there has been a significant strengthening to the CBW non-proliferation regime in the immediate aftermath of the COVID-19 pandemic using an analysis focused on two proposals to strengthen the Chemical Weapons Convention and the Biological and Toxin Weapons Convention which aim to constrain advances in science and technology developments that could be misused. On this basis he concludes that it would be hard to argue that to date there has been a significant strengthening of the CBW regime.

🔍 THE WUHAN COVER-UP Robert F. Kennedy Jr., 2023-12-06 “RFK Jr. exposes the decades of lies.”—Luc Montagnier, Nobel Laureate From the New York Times, Wall Street Journal, USA Today, and Publishers Weekly bestselling author of *The Real Anthony Fauci* comes an explosive exposé of the cover-up behind the true origins of COVID-19. “Gain-of-function” experiments are often conducted to deliberately develop highly virulent, easily transmissible pathogens for the stated purpose of developing preemptive vaccines for animal viruses before they jump to humans. More insidious is the “dual use” nature of this research, specifically directed toward bioweapons development. The Wuhan Cover-Up pulls back the curtain on how the US government’s increase in biosecurity spending after the 2001 terror attacks set in motion a plan to transform the National Institute of Allergy and Infectious Diseases (NIAID), under the direction of Dr. Anthony Fauci, into a de facto Defense Department agency. While Dr. Fauci zealously funded and pursued gain-of-function research, concern grew among some scientists and government officials about the potential for accidental or deliberate release of weaponized viruses from labs that might trigger worldwide pandemics. A moratorium was placed on this research, but true to form, Dr. Fauci found ways to continue unperturbed—outsourcing some of the most controversial experiments offshore to China and providing federal funding to Wuhan Institute of Virology’s (WIV’s) leading researchers for gain-of-function studies in partnership with the Chinese military and the Chinese Communist Party. Robert F. Kennedy Jr.’s meticulously researched and rigorously sourced analysis leads readers on a staggering journey to learn about: the key enablers and henchmen pushing for gain-of-function research the economic motives behind gain-of-function research successfully engineered “chimeric viruses” that can infect and kill humans the coordinated effort to silence speculation of COVID-19’s laboratory genesis the complicity of scientific journals to hide the origins of COVID-19 the role of the Wuhan Institute of Virology in China’s biowarfare/biodefense program the relationships between US health, military, and intelligence bureaucracies and scientists and their Chinese counterparts the roles of Bill Gates and Sir Jeremy Farrar in orchestrating a global cover-up The Wuhan Cover-Up unveils a global conspiracy of epic proportion and lethal consequence.

🔍 MOLECULAR DETECTION OF HUMAN VIRAL PATHOGENS Dongyou Liu, 2016-04-19 Despite being recognized and fought against over countless centuries, human viral pathogens continue to cause major public health problems worldwide—killing millions of people and costing billions of dollars in medical care and lost productivity each year. With contributions from specialists in their respective areas of viral pathogen research, *Molecular Detection of Human Viral Pathogens* provides a reliable reference on molecular detection and identification of major human viral pathogens. Each chapter briefly reviews the classification, epidemiology, clinical features, and diagnosis of one related viral pathogen or a group of them. The clinical sample collection and preparation procedures are outlined, and a selection of representative stepwise molecular detection protocols is covered. The chapters conclude with a discussion on further research requirements relating to improved diagnosis. With its judicious selection of streamlined, ready-to-use protocols for major human viral pathogens—including commercial kits—*Molecular Detection of Human Viral Pathogens* is an indispensable tool for medical, veterinary, and industrial laboratory scientists involved in virus determination.

🔍 MEMOIR OF A PANDEMIC Brett Giroir, 2023-05-11 Every American should read this insightful and gripping account to understand all our nation accomplished in the midst of the worst pandemic in 100 years and the difference one dedicated leader at United States Public Health Service made for millions of Americans. —Former Vice President Mike Pence In January 2020, Admiral Brett P. Giroir, MD, was among the first federal leaders tapped to handle the reintegration of US citizens from Wuhan, China, in the earliest days of what became the COVID-19 pandemic. As such, he was one of the few to see what everyone believed were the only Americans exposed to the novel virus at the time. Ultimately, Giroir would be called to serve on the White House Coronavirus Task Force under President Donald Trump. Rather than an exhaustive and comprehensive history of the pandemic response, this memoir adds to the historical record through personal narrative and by contextualizing several key inflection points. Giroir reflects upon his time on the front lines of the early cruise ship outbreaks and makeshift hospitals to the Situation Room in the White House. He explains the complex backdrop of personalities, policies, and politics that influenced critical decisions as the pandemic developed. In doing so, he also shines a light on the unknown characters who played critical roles in the national COVID response, the personalities and conflicts involved, the intense debates about policies and perceptions, and the decision-making processes that led to our national plan—for better or worse. Giroir concludes that overcoming a pandemic is not as easy as merely replacing a president or “following the science.” The inescapable fact is that the human species will remain vulnerable to pandemics, even more so in the future because of factors both natural and human influenced. Our ability to respond to future pandemics will depend on the adequacy of our preparation, the capabilities and relationships of individual leaders, and the inevitable politics of the day. For now, an important retrospective of what we did, both right and wrong, is imperative.

🔍 HOW TO PREVENT THE NEXT PANDEMIC Bill Gates, 2022-05-03 Governments, businesses, and individuals around the world are thinking about what happens after the COVID-19 pandemic. Can we hope to not only ward off another COVID-like disaster but also eliminate all respiratory diseases, including the flu? Bill Gates, one of our greatest and most effective thinkers and activists, believes the answer is yes. The author of the #1 New York Times best seller *How to Avoid a Climate Disaster* lays out clearly and convincingly what the world should have learned from COVID-19 and what all of us can do to ward off another catastrophe like it. Relying on the shared knowledge of the world's foremost experts and on his own experience of combating fatal diseases through the Gates Foundation, Gates first helps us understand the science of infectious diseases. Then he shows us how the nations of the world, working in conjunction with one another

AND WITH THE PRIVATE SECTOR, HOW WE CAN PREVENT A NEW PANDEMIC FROM KILLING MILLIONS OF PEOPLE AND DEVASTATING THE GLOBAL ECONOMY. HERE IS A CLARION CALL—STRONG, COMPREHENSIVE, AND OF THE GRAVEST IMPORTANCE.

📖 **EMERGING AND ENDEMIC PATHOGENS** KEVIN P. O’CONNELL,EVAN W. SKOWRONSKI,LELA BAKANIDZE,ALEXANDER SULAKVELIDZE,2010-09-03 It is a truism among biologists that an organism’s phenotype is the product of both its genotype and its environment. An organism’s genotype contains the total informational potential of the individual, while its environment shapes the expression of the ge- type, influences the rate of mutation and occurrence of modifications, and ultimately determines the likelihood that the genotype (or fractions thereof) will survive into the next generation. In the relationship between host and pathogen, therefore, each forms a part of the environment of the other, mutually influencing the biology of both partners on scales ranging from the life history of individuals to the fate of populations or entire species. Molecular biologists working on problems in pathogenesis generally think of the host organism as the pathogen’s environment and perhaps occasionally consider the pathogen as part of the host’s environment. However, because “environment” can be defined at many scales, so, too, can phenotypes: if a pathogen, as a species, is c- sidered to exist in a host, as a species, then among its phenotypes is the nature of the pandemic disease it can cause within the host community. The contributors to the proceedings of this NATO Advanced Research Workshop have treated the interplay of environment and genotype in the host–pathogen relationship and its relationship to the problem of emerging infectious disease at both the macroscopic and microscopic/ molecular levels along this continuum of scale (with some human history thrown in at times for good measure).

📖 **FOREIGN ENTANGLEMENTS** ARNAUD DEVELAY,2024-03-01 “HARD-HITTING AND COMPREHENSIVE, DEVELAY’S INVESTIGATIVE TREATISE UNCOVERS THE REAL NEXUS OF UKRAINIAN AND U.S. DEMOCRATIC PARTY ESTABLISHMENT CORRUPTION. FOR ANYONE INTERESTED IN WHAT REALLY HAPPENED, THIS BOOK SHOULD BE AT THE TOP OF THEIR READING LIST.” PATRICK HENNINGSEN, JOURNALIST AND FOUNDER OF 21ST CENTURY WIRE The freight train that is the conflict in Ukraine inexorably advances to its final destination. Each one of its passengers feels inextricably trapped onboard as the infernal machine acquires more speed and time runs out for an off-ramp. For years, the exit signs have succeeded one another so as to turn into an ever more indistinguishable blur: The Minsk Agreements, the late 2021 Russian proposal to Washington on security guarantees, the aborted peace negotiations held in Istanbul at the onset of the war. All that remains is the (increasing) background noise of random security experts, pundits and occasional reality-based politicians offering the notion that maybe Ukraine might just not be able to win the West’s proxy war with Russia. Why won’t sensible heads in Washington own up to the situation and call it a day? Why does the West keep sending Ukraine billions of dollars better spent at home while exhorting Ukraine to send countless young (and old and female) Ukrainians to certain death? What is it about Ukraine that seems to prevent the foreign policy blob from finding a way out, as happened in Korea, Viet-Nam and Cambodia? Can it be because Ukraine remains to this day the exclusive playground of a concentration of interests which, taken all together, constitute a who’s who of the Washington Establishment—including DARPA, DTRA, the EcoHealth Alliance, and the Bill and Melinda Gates Foundation to name but a few. For years, Kiev had served as a home away from home to US political figures and their offspring, furthering Ukraine’s deserved reputation for being one of the most corrupt places on Earth. For years, Ukraine offered all of them opportunities to advance their respective projects and operate with total impunity. Arnaud Develay dives into the murky waters of Washington’s “external management” of Ukraine dating back to the infamous Maidan coup d’📖 tat and extending forward to include the political weaponization of law and elections foibles, past and forthcoming, reflecting the fracturing of the American political class. It’s one hell of an expose, full of the nitty-gritty on how America seems ready and willing to tear itself apart.

📖 **THE END OF EPIDEMICS** Dr. Jonathan D. Quick,Bronwyn Fryer,2018-01-30 “Jonathan Quick offers a compelling and intensely readable plan to prevent worldwide infectious outbreaks. The End of Epidemics is essential reading for those who might be affected by a future pandemic—that is, just about everyone.”—Sandeep Jauhar, bestselling author of Heart: A History The 2020 outbreak of coronavirus has terrified the world--and revealed how unprepared we are for the next outbreak of an infectious disease. Somewhere in nature, a killer virus is boiling up in the bloodstream of a bird, bat, monkey, or pig, preparing to jump to a human being. This not-yet-detected germ has the potential to wipe out millions of lives over a matter of weeks or months. That risk makes the threat posed by ISIS, a ground war, a massive climate event, or even the dropping of a nuclear bomb on a major city pale in comparison. In The End of Epidemics, Duke Global Health Institute faculty member and past chair of the Global Health Council Dr. Jonathan D. Quick examines the eradication of smallpox and devastating effects of influenza, AIDS, SARS, Ebola, and other viral diseases . Analyzing local and global efforts to contain these diseases and citing firsthand accounts of failure and success, Dr. Quick proposes a new set of actions which he has coined The Power of Seven, to end epidemics before they can begin. These actions include: - Spending prudently to prevent disease before an epidemic strikes, rather than spending too little, too late - Ensuring prompt, open, and accurate communication between nations and aid agencies, instead of secrecy and territorial disputes - Fighting disease and preventing panic with innovation and good science Practical and urgent, The End of Epidemics is crucial reading for citizens, health professionals, and policy makers alike. “Dr. Quick’s urgent message makes one hope that this book will reach a huge audience and that its exhortations will be acted on everywhere.”—The Wall Street Journal

📖 **ETHICAL FAILURES OF THE COVID-19 PANDEMIC RESPONSE** P📖 ter Marton,2022-12-08 This book draws attention to the non-biological—political, economic, societal and cultural—variables shaping both the emergence and persistence of the COVID-19 pandemic and the global response to it, with a particular focus on political decisionmakers’ role in the domestic and international politics surrounding the process of the pandemic. The book identifies the strategic and underlying ethical failures of decision making, using a process-tracing approach to reconstruct considerations, decisions and actions by key leaders—interested in thus weaving a global narrative of the response. The author highlights key speech acts, and interprets the causal implications embedded in a chronological and contextualised appraisal of events, statements and public health measures. The book further discusses the normative ethics of pandemic response, and presents lessons drawn from the present experience. It also offers a normative analysis taking into consideration pre-pandemic guidelines for response, including in the literature of public health ethics and pandemic preparedness plans.
