Abstract of the Certificates of Corporations Organized Under the General Laws of Massachusetts ... ,1916

International Financial Statistics, June 2017 International Monetary Fund. Statistics Dept.,2017-05-31 This paper explores International Financial Statistics (IFS) that contains country tables for most IMF members, as well as for Anguilla, Aruba, the Central African Economic and Monetary Community (CEMAC), Curaçao, the currency union of Curaçao and Sint Maarten, the Eastern Caribbean Currency Union (ECCU), the euro area, Montserrat, the former Netherlands Antilles, Sint Maarten, the West African Economic Monetary Union (WAEMU), West Bank and Gaza, and some non-sovereign territorial entities for which statistics are provided internationally on a separate basis. All trade figures in IFS are converted from national currency values to US dollars and from US dollar values to national currency. The country tables, euro area tables, and world tables provide measures of effective exchange rates, compiled by the IMF's Research Department, Strategy, Policy, and Review Department, Statistics Department, and area departments. For manufactured goods, trade by type of good and market is distinguished in the database. So it is possible to allow at a disaggregated level for competition among various exporters in a foreign market (i.e., third-market competition) as well as that arising from bilateral trade links.

Moody's Manual of Investments: American and Foreign ,1928

International Financial Statistics, July 2017 International Monetary Fund. Statistics Dept.,2017-07-05 This paper discusses about countries where multiple exchange rates are in effect, IMF staff estimates of weighted average exchange rates are used in many cases. A weighted average exchange rate is constructed as an average of the various exchange rates, with the weights reflecting the share of trade transacted at each rate. The notes to the country tables in the monthly issues provide information about exceptions in the choice of the consumer price

index and the period average exchange rate index. For a relatively small number of countries, notes in the country tables in the monthly issues indicate where alternative price indices, such as the wholesale/producer price index or a weighted average of several price indices, are used; where data constraints have made it necessary to use weighting schemes based on aggregate bilateral non-oil trade data; and where trade in services (such as tourism) has been taken into account.
