Thornton Dial Bernard L. Herman,2012-03-01 Thornton Dial (1928-2016), one of the most important artists in the American South, came to prominence in the late 1980s and was celebrated internationally for his large construction pieces and mixed-media paintings. It was only later, in response to a reviewer's negative comment on his artistic ability, that he began to work on paper. And it was not until recently that these drawings have received the acclaim they deserve. This volume, edited by Bernard L. Herman, offers the first sustained critical attention to Dial's works on paper. Concentrating on Dial's early drawings, the contributors examine Dial's use of line and color and his recurrent themes of love, lust, and faith. They also discuss the artist's sense of place and history, relate his drawings to his larger works, and explore how his drawing has evolved since its emergence in the early 1990s. Together, the essays investigate questions of creativity and commentary in the work of African American artists and contextualize Dial's works on paper in the body of American art. The contributors are Cara Zimmerman, Bernard Herman, Glenn Hinson, Juan Logan, and Colin Rhodes.

Electrothermics Javad Fouladgar,2012-12-13 This book concerns the analysis and design of induction heating of poor electrical conduction materials. Some innovating applications such as inductive plasma installation or transformers, thermo inductive non-destructive testing and carbon-reinforced composite materials heating are studied. Analytical, semi-analytical and numerical models are combined to obtain the best modeling technique for each case. Each model has been tested with experimental results and validated. The principal aspects of a computational package to solve these kinds of coupled problems are described. In the first chapter, the mathematical tools for coupled electromagnetic and thermal phenomena are introduced. In Chapter 2, these tools are used to analyze a radio frequency inductive plasma installation. The third chapter describes the methodology of designing a low frequency plasma transformer. Chapter 4 studies the feasibility of the thermo inductive technique for non-destructive testing and the final chapter is dedicated to the use of induction heating in the lifecycle of carbon-reinforced composite materials. Contents 1. Thermal and Electromagnetic Coupling, Javad Fouladgar, Didier Trichet and Brahim Ramdane. 2. Simplified Model of a Radiofrequency Inductive Thermal Plasma Installation, Javad Fouladgar and Jean-Pierre Ploteau. 3. Design Methodology of A Very Low-Frequency Plasma Transformer, Javad Fouladgar and Sourì Mohamed Mimoune. 4. Fever Within Bernard L. Herman,2016 Ronald Lockett (1965-1998) stands out among southern artists in the late twentieth century. Raised in the African American industrial city of Bessemer, Alabama, Lockett explored a range of recurring themes through his art: faith, the endless cycle of life, environmental degradation, historical events, the sweetness of idealized love, mourning, human emotion, and personal struggle. By the time Lockett died at age thirty-two, he had created an estimated four hundred works that document an extraordinary artistic evolution. This book offers the first in-depth critical treatment of Lockett's art, alongside sixty full-color plates of the artist's paintings and assemblages, shedding light on Lockett's career and work. By placing Lockett at its center, contributors contextualize what might be best understood as the Birmingham-Bessemer School of art, which includes Thornton Dial, Joe Minter, and Lonnie Holley, and its turbulent social, economic, and personal contexts. While broadening our understanding of southern contemporary art, Fever Within uncovers how one artist's work has become emblematic of the frustrated, yearning, unredeemed promises, and family and community resilience expressed by a generation of African American artists at the close of the twentieth century. Contributors include Paul Arnett, Sharon Patricia Holland, Katherine L. Jentleson, Thomas J. Lax, and Colin Rhodes.

Hard Truths Thornton Dial,David C. Driskell,Greg Tate,2011 Thornton Dial has lived his entire life in the American South. Incorporating salvaged objects into his art, he creates epic works including haunting reflections on homelessness, global conflict, the tragedy of 9/11, and African American history.
