Foundations of GTK+ Development Andrew Krause, 2007-09-09 There are only two mainstream solutions for building the graphical interface of Linux-based desktop applications, and GTK+ (GIMP Toolkit) is one of them. It is a necessary technology for all Linux programmers. This book guides the reader through the complexities of GTK+, laying the groundwork that allows the reader to make the leap from novice to professional. Beginning with an overview of key topics such as widget choice, placement, and behavior, readers move on to learn about more advanced issues. Replete with real-world examples, the developer can quickly take advantages of the concepts presented within to begin building his own projects.

Handbook of Military Industrial Engineering Adedeji B. Badiru, Marlin U. Thomas, 2009-02-25 In light of increasing economic and international threats, military operations must be examined with a critical eye in terms of process design, management, improvement, and control. International Electronic Evidence Stephen Mason, 2008 An increasing number of civil and criminal proceedings involve the use of digital evidence across jurisdictional boundaries. Digital evidence now affects every aspect of law, including contract, employment, family, crime, intellectual property, and land law. In effect, no area of law is excluded, and digital evidence has become of greater importance now that the Internet has become ubiquitous. It is increasingly apparent that criminals and terrorists target the electronic environment in order to steal, to carry out extortion, and to abuse children across jurisdictions. Additionally, both public and commercial organizations now rely on the digital environment to such an extent that it has become critical to business and, perhaps, the survival of the state. *International Electronic Evidence* provides an outline of the substantive law of evidence, admissibility, disclosure, and procedural requirements in respect of digital evidence for the jurisdictions covered, which include: Argentina, Austria, Belgium, Bulgaria, Croatia, Cyprus, Czech Republic, Denmark, Egypt, Estonia, Finland, France, Germany, Greece, Hungary, Iceland, Italy, Japan, Latvia, Lithuania, Luxembourg, Malta, Mexico, Netherlands, Norway, Poland, Portugal, Romania, Russia, Slovakia, Slovenia, Spain, Sweden, Switzerland, Thailand, and Turkey.

Beyond Boundaries Miguel Nicolelis, 2011-03-15 A pioneering neuroscientist

shows how the long-sought merger of brains with machines is about to become a paradigm-shifting reality Imagine living in a world where people use their computers, drive their cars, and communicate with one another simply by thinking. In this stunning and inspiring work, Duke University neuroscientist Miguel Nicolelis shares his revolutionary insights into how the brain creates thought and the human sense of self—and how this might be augmented by machines, so that the entire universe will be within our reach. Beyond Boundaries draws on Nicolelis's ground-breaking research with monkeys that he taught to control the movements of a robot located halfway around the globe by using brain signals alone. Nicolelis's work with primates has uncovered a new method for capturing brain function—by recording rich neuronal symphonies rather than the activity of single neurons. His lab is now paving the way for a new treatment for Parkinson's, silk-thin exoskeletons to grant mobility to the paralyzed, and breathtaking leaps in space exploration, global communication, manufacturing, and more. Beyond Boundaries promises to reshape our concept of the technological future, to a world filled with promise and hope.

Electronic Disclosure Stephen Mason, 2015 eDisclosure is a hot topic for all practising lawyers in England and Wales. All those who run contentious business need to know how the courts are dealing with the complexities and problems that electronic disclosure throws up, and how they respond to the

practical challenges discovered by firms in meeting the electronic disclosure protocol. Although the judiciary has offered guidance on the rules relating to eDisclosure for some time, the case law suggests that many lawyers remain blissfully unaware of three important topics: eDisclosure, eEvidence and eSignatures. This concise guide is intended as an aid to both lawyers and their technical advisers working on eDisclosure in England and Wales, and to indicate how judges have approached the issues arising in both civil and criminal proceedings. It will be of interest to all jurisdictions struggling with the same issues.

Everything is Bullshit Zachary Crockett, Rohin Dhar, Alex Mayyasi, David Raether, 2014 Many of our society's most cherished traditions are actually based on historical accident, the profit motives of a few companies, or the agenda of someone who died long ago. A lot of what we believe and do is bullshit, yet we walk around thinking our way of doing things is inherently correct. Why do we exchange diamond engagement rings? Why is wine so expensive? How does art become 'art'? Why do so many non-profits want us to donate our cars? Why does college cost so much? Why do so many pets die in animal shelters? Why is the world the way it is?--Back cover.
