International Structural Steel Sections Boris Androic,Ivica Dzeba,Darko Dujmovic,2000-05-31 For some years now, steel construction has no longer been the reserve of specialists. To take advantage of all the possibilities offered by the modern steel industry in terms of a good fit of shape and material, the first rough design plays an important part in planning any structure. Tender or offer specifications based on Eurocode 3 will hopefully open the way to competitiveness using the international reasonable steel market. This book contains a short annotation about steel grades and qualities, followed by a basic introduction to the European safety concept, 104 tables for all European rolled sections, a selection of British and American sections, hot-rolled and cold-formed hollow sections as well as tables giving data on dimensions, properties and classification, design resistance, design buckling resistance and design lateral torsional buckling resistance moment under two different load conditions, based on the European buckling curves. These tables allow preliminary design, profile selection or a quick safety check of various structural members, so as to avoid time-consuming computer analysis, or to check the plausibility of results so obtained.
