Measuring and Monitoring Plant Populations Caryl Elzinga, Daniel Salzer, John Willoughby, 2015-01-02 This technical reference applies to monitoring situations involving a single plant species, such as an indicator species, key species, or weed. It was originally developed for monitoring special status plants, which have some recognized status at the Federal, State, or agency level because of their rarity or vulnerability. Most examples and discussions in this technical reference focus on these special status species, but the methods described are also applicable to any single-species monitoring and even some community monitoring situations. We thus hope wildlife biologists, range conservationists, botanists, and ecologists will all find this technical reference helpful.

**The Three Mothers** Anna Malaika Tubbs, 2021-02-02 Tubbs' connection to these women is palpable on the page – as both a mother and a scholar of the impact Black motherhood has had on America. Through Tubbs' writing, Berdis, Alberta, and Louise's stories sing. Theirs is a history forgotten that begs to be told, and Tubbs tells it brilliantly. – Ibram X. Kendi, #1 New York Times bestselling author of *How to Be an Antiracist* and National Book Award winner *Stamped from the Beginning* Much has been written about Berdis Baldwin's son James, about Alberta King's son Martin Luther, and Louise Little's son Malcolm. But virtually nothing has been said about the extraordinary women who raised them. In her groundbreaking and essential debut *The Three Mothers*, scholar Anna Malaika Tubbs celebrates Black motherhood by telling the story of the three women who raised and shaped some of America's most pivotal heroes. These three extraordinary women passed their knowledge to their children with the hope of helping them to survive in a society that would deny their humanity from the very beginning—from Louise teaching her children about their activist roots, to Berdis encouraging James to express himself through writing, to Alberta basing all of her lessons in faith and social justice. These women used their strength and motherhood to push their children toward greatness, all with a conviction that every human being deserves dignity and respect despite the rampant discrimination they faced. These three mothers taught resistance and a fundamental belief in the worth of Black people to their sons, even when these beliefs flew in the face of America's racist practices and led to ramifications for all three families' safety. The fight for equal justice and dignity came above all else for the three mothers. These women, their similarities and differences, as individuals and as mothers, represent a

piece of history left untold and a celebration of Black motherhood long overdue.

*Rehearsals for Living* Robyn Maynard, Leanne Betasamosake Simpson, 2022-06-28  
Amid the overlapping crises of a pandemic, ecological disaster, and global capitalism, two leading Black and Indigenous feminist theorists ask one another: what do liberated lands, minds, and bodies look like? These letters are part debate, part dialogue, and part lively and detailed familial correspondence between two razor-sharp thinkers, sending notes to each other during a stormy present. Featuring a foreword by Ruth Wilson Gilmore and an afterword by Robin D.G. Kelley.

**The Serengeti Rules** Sean B. Carroll, 2017-03-07 Now the subject of an Emmy Award-winning film the New York Times calls spellbinding How does life work? How does nature produce the right numbers of zebras and lions on the African savanna, or fish in the ocean? How do our bodies produce the right numbers of cells in our organs and bloodstream? In *The Serengeti Rules*, award-winning biologist and author Sean Carroll tells the stories of the pioneering scientists who sought the answers to such simple yet profoundly important questions, and shows how their discoveries matter for our health and the health of the planet we depend upon. One of the most important revelations about the natural world is that everything is regulated—there are rules that regulate the amount of every molecule in our bodies and rules that govern the numbers of every animal and plant in the wild. And the most surprising revelation about the rules that regulate life at such different scales is that they are remarkably similar—there is a common underlying logic of life. Carroll recounts how our deep knowledge of the rules and logic of the human body has spurred the advent of revolutionary life-saving medicines, and makes the compelling case that it is now time to use the *Serengeti Rules* to heal our ailing planet. A bold and inspiring synthesis by one of our most accomplished biologists and gifted storytellers, *The Serengeti Rules* is the first book to illuminate how life works at vastly different scales. Read it and you will never look at the world the same way again.

**Amped** Daniel H. Wilson, 2013-02-12 As he did in New York Times bestseller *Robopocalypse*, Daniel Wilson masterfully envisions a stunning world where superhuman technology and humanity clash in surprising—and thrilling—ways. It's the near future, and scientists have developed implants that treat brain dysfunction—and also make recipients capable of superhuman feats. Exploiting societal fears of the newly enhanced, politicians pass a set of laws to restrict the rights of “amplified” humans, instantly creating a new persecuted underclass known as “amps.” On the day that the Supreme Court passes the first of these laws, twenty-nine-year-old schoolteacher Owen Gray is forced into hiding, only dimly aware of the latent powers he possesses. To escape imprisonment, and to find out who he really is, Owen seeks out a community in Oklahoma where, it is rumored, a group of the most enhanced amps may be about to change the world—or destroy it.

**Canyoneering the Northern San Rafael Swell** Steve Allen,Joe Mitchell,2013

The San Rafael Swell is a seemingly endless expanse of slickrock, reefs, rivers, narrow canyons, mesas, towers, and pinnacles. It is the wilderness home of coyotes, eagles, mountain lions, and bighorn sheep. Steve Allen's Canyoneering: The San Rafael Swell has long been the standard for exploring this remarkable area. With the input of fellow guidebook author Joe Mitchell, Canyoneering the Northern San Rafael Swell replaces the older volume with a completely rewritten and updated text containing more detail, greater accuracy, and a tighter focus on the northern half of the Swell. This is the most current and comprehensive guide to the region. Designed for wilderness enthusiasts of all ages and skill levels, this guide provides detailed information on 25 hikes, including trip length, difficulty, elevation gain, and water sources. Side trips, points of interest, and historical information are noted throughout the text. This guidebook includes for the first time a wealth of topographic maps for all routes and roads, elevation profiles, and GPS coordinates. A second volume covering the southern portion of the San Rafael Swell is in preparation.
