*Bob and the Blob* Simon Carr, 2021-09-18 Bob's day is off to a bad start. He is abducted by alien blobs and is put into a zoo, while the rest of humanity is being taken to slaughter to be turned into burgers. He has had better Thursdays. Bob's handler, Fred, befriends Bob, and the two of them try to change the legal status of humans, from food to intelligent life, so that the slaughter ship can be stopped, and everyone returned to earth, it is not easy as there are a lot of not very intelligent life forms on that ship.

**The Blob** Ian Thorne, Howard Schroeder, 1982-01-01 When a meteor crashes to earth, it carries a mysterious destructive blob inside.

September 2017. The 40 papers presented in this volume were carefully reviewed and selected from 46 submissions. They were organized in topical sections named: brain lesion image analysis; brain tumor image segmentation; and ischemic stroke lesion image segmentation.

*The Elgar Companion to Geography, Transdisciplinarity and Sustainability* Fausto O. Sarmiento, Larry M. Frolich, 2020-05-29 With contributions from top geographers, this Companion frames sustainability as exemplar of transdisciplinary science (critical geography) while improving future scenarios, debating perspectives between rich North/poor South, modern urban/backwards rural, and everything in between. The Companion has five sections that carry the reader from foundational considerations to integrative trends, to resources use and accommodation, to examples highlighting non-traditional pathways, to a postscript about cooperation of the industrialized Earth and a prognosis of the road ahead for the new geographies of sustainability.

**Human-Computer Interaction. Novel User Experiences** Masaaki Kurosu, 2016-07-04 The 3-volume set LNCS 9731, 9732, and 9733 constitutes the refereed proceedings of the 18th International Conference on Human-Computer Interaction, HCII 2016, held in Toronto, ON, Canada, in July 2016. The total of 1287 papers and 186 posters presented at the HCII 2016 conferences and were carefully reviewed and selected from 4354 submissions. The papers thoroughly cover the entire field of Human-Computer Interaction, addressing major advances in knowledge and effective use of computers in a variety of application areas. The volumes constituting the full 27-volume set of the conference proceedings.

**The Ware Tetralogy** Rudy Rucker, 2019-04-02 Rucker's four Ware novels—Software, Wetware , Freeware , and Realware—form an extraordinary cyberweird future history with the heft of an epic

fantasy novel and the speed of a quantum processor. Still exuberantly fresh despite their age, they primarily follow two characters (and their descendants): Cobb Anderson, who instigated the first robot revolution and is offered immortality by his grateful “children,” and stoner Sta-Hi Mooney, who (against his impaired better judgment) becomes an important figure in robot-human relations. Over several generations, humans, robots, drugs, and society evolve, but even weird drugs and the wisdom gathered from interstellar signals won’t stop them from making the same old mistakes in new ways. Rucker is both witty and serious as he combines hard science and sociology with unrelentingly sharp observations of all self-replicating beings. This classic series well deserves its omnibus repackaging, particularly suitable for libraries. — Publisher's Weekly. Rudy Rucker is one of the modern heroes of science fiction, one of the original cyberpunks. The early cyberpunks only had a few writers who could be meaningfully called punks — writers like John Shirley and Richard Kadrey — but there was only one who could truly be called cyber: Rudy Rucker. Rucker is a mad professor, a mathematician and computer scientist with a serious, scholarly interest in the limits of computation and the physics and mathematics of higher-dimension geometry. But that’s just about the only thing you can describe as ‘serious’ when it comes to Rucker. He’s a gonzo wildman, someone for whom ‘trippy’ barely scratches the surface. His work is shot through with weird sex, weird drugs, weird brain chemistry, and above all, weird science. — Cory Doctorow

**InterstellarNet: Origins** Edward M. Lerner, 2015-07-26 When the First Call from the Stars Comes, Do We Even Dare to Answer? Life changes for everyone in general--and for physicist Dean Matthews in particular--when astronomers detect a radio signal from a nearby star. First Contact forces humanity to face hard questions, and do it fast. Every answer spawns new questions. Every solution sets in motion a new and more daunting crisis to challenge Dean, his family--and an expanding number of interstellar civilizations--for generations to come. Praise for InterstellarNet: Origins ...in InterstellarNet: Origins...Lerner proves he knows enough real-world, present-day computer science and economics to combine them into a wonderfully thought-provoking story....

Lerner's world-building and extrapolating are top notch. --SFScope Lerner mixes physics, computer science, and economics into a series of very intellectually satisfying puzzles. Some of the puzzles involve understanding the alien, and some depend on understanding ourselves ... A very satisfying read, especially for the intellectually inclined. --Mike Brotherton, author of Spider Star One of the most original, believable, thoroughly thought-out, and utterly fascinating visions ever of what interstellar contact might really be like. --Dr. Stanley Schmidt, Editor, Analog Magazine Edward Lerner takes us from a first SETI detection to full scale interstellar net economics, with thrills along the way. No one had thought through what a working interstellar net would be like. Lerner has the professional heft to make sense of it, tell a story, and make us care. Good stuff, told in clear, quick prose. A groundbreaking job! --Gregory Benford, author of Timescape. Bredon didn't mean to interfere with the Powers-but then they interfered with him! When the beings of myth and legend start fighting among themselves, mere mortals had best beware. Millennia ago, the survivors of a crash settled the planet of Denner's Wreck. Their descendents long ago forgot their own history. Centuries later, the planet was rediscovered by visitors who stayed-and came to be called The Powers. The descendants of the original settlers soon learned to treat the newcomers like gods. Then, one fine day, Bredon the Hunter found himself caught up in the affairs of the Powers-at just the moment one of them went mad! With a new afterword by the Author. Previously published as Denner's Wreck. FoxAcre Press is proud to present its books on the Google Play store.

*The Potters' Quarter* Agnes Newhall Stillwell, Jack Leonard Benson, 1948 The long-awaited final part of the publication of the Corinth Potters' Quarter is based on the work of the excavator, A. N. Stillwell, edited and supplemented after her death by J. L. Benson. The pottery, although frequently fragmentary, can often be assigned to known painters or workshops, and the deposits, especially in

view of the defective pieces in them, can be argued to contain material almost exclusively of local manufacture. A brief introduction serves to explain the organization of the catalogue and to characterize the principal deposits, most of which contained material from several periods; a summary of represented painters and workshops concludes the chapter. The catalogue presents over 2,300 examples from more than 4,000 inventoried pieces. Almost all are illustrated with photographs, frequently supplemented with detail line drawings of motifs; selected profile drawings represent the principal shapes. A new foldout plan of the Potters' Quarter is included.

**Cyrene II: East Greek Island & Laconian** Gerald P. Schaus, 1984 This volume includes a detailed illustrated catalogue of the East Greek, Island, and Laconian pottery from the sanctuary. The author uses the data to help establish the chronology for the founding and early development of this important Greek colony. University Museum Monograph, 56

*Information and Communications Technology in Support of Migration* Babak Akhgar, Karen Latricia Hough, Yara Abdel Samad, Petra Saskia Bayerl, Anastasios Karakostas, 2022-05-31 The book provides a holistic review, presenting a multi-stakeholder, multi-disciplinary, international, and evidence-based approach to Information and Communications Technology (ICT) in migration. The book brings together different views and multifaceted responses to ICT-based migration management, examining their overlap, conflict, and synergies. The book is a major addition to the field, tackling important debates concerning humanitarianism and securitization in the reception of migrants, as well as exploring the role of digital technology in aiding migrant integration. The authors explore contentious areas such as the use of new technologies deployed on borders for migration management and border security under the umbrella of smart border solutions including drones, AI algorithms, and face recognition, which are widely criticized for ignoring the fundamental human rights of migrants. The research presented will depart from the euphoric appraisals that technology has made things easier for migrants and those who assist them, to critically examine the bane and boon, benefits and afflictions, highlighting the barriers, as well as the solutions, including

several under-researched aspects of digital surveillance and the digital divide. This edited volume has been developed by the MIICT project, funded under the EU Horizon 2020 Action and Innovation programme, under grant agreement No 822380. Provides a positive approach to the integration of migrants, asylum seekers, and refugees using Information and Communications Technology (ICT) solutions Offers a strategic approach to providing digital services for migrants at an EU, national and local level Bridges the gap between academia and front-line practitioners' work by providing theoretical, policy, ethical, and methodological recommendations

**Raw Materials for Future Energy Supply** Friedrich-W. Wellmer, Peter Buchholz, Jens Gutzmer, Christian Hagelüken, Peter Herzig, Ralf Littke, Rudolf K. Thauer, 2018-06-25 This is the first book that analyses the future raw materials supply from the demand side of a society that chiefly relies on renewable energies, which is of great significance for us all. It addresses primary and secondary resources and substitution, not only from technical but also socioeconomic and ethical points of view. The "Energiewende" (Energy Transition) will change our consumption of natural resources significantly. When in future our energy requirements will be covered mostly by wind, solar power and biomass, we will need less coal, oil and natural gas. However, the consumption of minerals, especially metallic resources, will increase to build wind generators, solar panels or energy storage facilities. Besides e.g. copper, nickel or cobalt, rare earth elements and other high-tech elements will be increasingly used. With regard to primary metals, Germany is 100 % import dependent; only secondary material is produced within Germany. Though sufficient geological primary resources exist worldwide, their availability on the market is crucial. The future supply of the market is dependent on the development of prices, the transparency of the market and the question of social and ethical standards in the raw materials industry, as well as the social license to

operate, which especially applies to mining. The book offers a valuable resource for everyone interested in the future raw material supply of our way of life, which will involve more and more renewable energies.
