Rock bolting: Theory and application in mining and underground construction Ove Stephansson,2021-06-23 This includes the Proceedings of the international symposium, Abisko, Sweden, 28 August-2 September 1983. Rock bolts today represent the dominant support system in mines and underground structures. Some results and experiences are discussed to give a better understanding of the strength of individual rock bolts and systems of bolts, and the interaction between bolts and rock masses of various types. Topics covered are as follows: rock bolting in theory and experiments; design principles and experience; and ground control and instrumentation: cable bolting.

Water, Electricity, and the Poor Kristin Komives,World Bank,2005 This book reviews the prevalence and variants of consumer subsidies found in the developing world and the effectiveness of these subsidies for the poor. It places consumer subsidies in a broader social protection framework and compares them with poverty-focused programmes in other sectors using a common metric. It concludes that the most common subsidy instruments perform poorly in comparison with most other transfer mechanisms. Alternative consumption and connection subsidy mechanisms show more promise, especially when combined with complementary non-price approaches to making utility services accessible and affordable to poor households. The many factors contributing to those outcomes are dissected, identifying those that can be controlled and used to improve performance.

Biochemical and Neurophysiological Correlation of Centrally Acting Drugs E. Trabucchi,R. Paoletti,N. Canal,2013-10-22 Section on Pharmacology of the International Union of Physiological Sciences (SEPHAR), Proceedings of the Second International Pharmacological Meeting, August 20-23, 1963, Volume 2: Biochemical and Neurophysiological Correlation of Centrally Acting Drugs focuses on the composition, reactions, and applications of centrally acting drugs. The selection first offers information on the physiology of striopallidum in relation to extrapyramidal function and disorders and actions of dopa and dopamine in relation to function of the central nervous system. Discussions focus on correlation of behavioral and clinical states with metabolism of dopamine, functions of dopamine in the brain, and the central pharmacology of dopamine. The text then examines the role of brain dopamine (3-hydroxytyramine) in Parkinsonism, including behavior of dopamine in the extrapyramidal centers in patients with Parkinson's disease; brain dopamine and the extrapyramidal symptomatology of Parkinson's disease; and parallelism between Parkinson's disease and the Parkinson-like state induced by reserpine in man. The publication ponders on pharmacological studies on tremorine and metabolism of tremorine. The manuscript also takes a look at the contribution on the pathophysiology of intentional tremor; failure of Antiparkinson drugs to antagonize hypothermia in tremorine-treated rats; and significance of dopamine in psychomotor stimulant action. The selection is a dependable source of data for readers interested in centrally acting drugs.
