To Provide and Maintain a Navy Henry Hendrix, 2020-12-19 The national conversation regarding the United States Navy has, for far too long, been focused on the popular question of how many ships does the service need? To Provide and Maintain a Navy, a succinct but encompassing treatise on sea power by Dr. Henry J Jerry Hendrix, goes beyond the numbers to reveal the crucial importance of Mare Liberum (Free Sea) to the development of the Western thought and the rules based order that presently governs the global commons that is the high seas. Proceeding from this philosophical basis, Hendrix explores how a free sea gave way to free trade and the central role sea borne commercial trade has played in the overall rise in global living standards. This is followed by analysis of how the relative naval balance of power has played out in terms of naval battles and wars over the centuries and how the dominance of the United States Navy following World War II has resulted in seven decades of unprecedented peace on the world's oceans. He further considers how, in the years that followed the demise of the Soviet Union, both China and Russia began laying the groundwork to challenge the United States maritime leadership and upend five centuries of naval precedents in order to establish a new approach to sovereignty over the world's seas. It is only at this point that Dr. Hendrix approaches the question of the number of ships required for the United States Navy, the industrial base required to build them, and the importance of once again aligning the nation's strategic outlook to that of a seapower in order to effectively and efficiently address the rising threat. To Provide and Maintain a Navy is brief enough to be read in a weekend but deep enough to inform the reader as to the numerous complexities surrounding what promises to be the most important strategic conversation facing the United States as it enters a new age of great power competition with not one, but two nations who seek nothing less than to close and control the world's seas.

News for All the People Juan Gonzalez, Joseph Torres, 2011-12-23 A new, sweeping narrative history of American news media that puts race at the center of the story From the earliest colonial newspapers to the Internet age, America's racial divisions have played a central role in the creation of the country's media system, just as the media has contributed to—and every so often, combated—racial oppression. *News for All the People* reveals how racial segregation distorted the information Americans received from the mainstream media. It unearths numerous examples of how publishers and broadcasters actually fomented racial violence and discrimination through their coverage. And it chronicles the influence federal media policies exerted in such conflicts. It depicts the struggle of Black, Latino, Asian, and Native American journalists who fought to create a vibrant yet little-known alternative, democratic press, and then, beginning in the 1970s, forced open the doors of the major media companies. Written in an exciting, story-driven style and replete with memorable portraits of journalists, both famous and obscure, *News for All the People* weaves back and forth between the corporate and government leaders who built our segregated media system—such as Herbert Hoover, whose Federal Radio Commission eagerly awarded a license to a notorious Ku Klux Klan organization in the nation's capital—and those who rebelled against that system. Based on years of original archival research and up-to-the-minute reporting and written by two veteran journalists and leading advocates for a more inclusive and democratic media system, *News for All the People* should become the standard history of American media.

News for All the People: The Epic Story of Race and the American Media Juan González, Joseph Torres, 2011-10-31 A landmark narrative history of American media that puts race at the center of the story. Here is a new, sweeping narrative history of American news media that puts race at the center of the story. From the earliest colonial newspapers to the Internet age, America's racial divisions have played a central role in the creation of the country's media system, just as the media has contributed to—and every so often, combated—racial oppression. *News for All the People* reveals how racial segregation distorted the information Americans received from the mainstream media. It depicts the struggle of Black, Latino, Asian, and Native American journalists who fought to create a vibrant yet little-known alternative, democratic press, and then, beginning in the 1970s, forced open the doors of the major media companies. The writing is fast-paced, story-driven, and replete with memorable portraits of individual journalists and media executives, both famous and obscure, heroes and villains. It weaves back and forth between the corporate and government leaders who built our segregated media system—such as Herbert Hoover, whose Federal Radio

Commission eagerly awarded a license to a notorious Ku Klux Klan organization in the nation's capital—and those who rebelled against that system, like Pittsburgh Courier publisher Robert L. Vann, who led a remarkable national campaign to get the black-face comedy Amos 'n' Andy off the air. Based on years of original archival research and up-to-the-minute reporting and written by two veteran journalists and leading advocates for a more inclusive and democratic media system, *News for All the People* should become the standard history of American media.
