Blueprint, with a new afterword Robert Plomin, 2019-07-02
A top behavioral geneticist makes the case that DNA inherited from our parents at the moment of conception can predict our psychological strengths and weaknesses. In *Blueprint*, behavioral geneticist Robert Plomin describes how the DNA revolution has made DNA personal by giving us the power to predict our psychological strengths and weaknesses from birth. A century of genetic research shows that DNA differences inherited from our parents are the consistent lifelong sources of our psychological individuality—the blueprint that makes us who we are. Plomin reports that genetics explains more about the psychological differences among people than all other factors combined. Nature, not nurture, is what makes us who we are. Plomin explores the implications of these findings, drawing some provocative conclusions—among them that parenting styles don't really affect children's outcomes once genetics is taken into effect. This book offers readers a unique insider's view of the exciting synergies that came from combining genetics and

psychology. The paperback edition has a new afterword by the author.

Re:Align Jonathan Trevor, 2022-06-09 Why do some businesses thrive while many more struggle? In this age of disruption, a key reason is the failure of many leaders to realign all the moving parts of their enterprise, including its business strategy and how it is organised, to best support its enduring purpose. Thousands of enterprises globally are operating below their potential simply because they are not well aligned or fail to realign to reflect the new realities of their changing business environment. This book aims to change that. This book is about strategic realignment, a leadership process to overcome disruption and secure high performance on a sustainable basis. Given that change is a constant and disruption to the business environment ever more likely, strategic realignment must become a core competency in order that all enterprises and leaders can succeed in the future. Most executives recognise this but lack a robust system of thought to execute strategic realignment effectively and realise its full benefits. But once mastered, strategic realignment offers a means of turning disruption into an advantage. In *Re:Align*, Jonathan Trevor provides a blueprint to help leaders ask good questions, have better conversations and make the best possible choices to realign their enterprise to be fit for purpose. Drawing upon active research at the University of Oxford's Saïd Business School (with contributions from the joint works of Dr Jonathan Trevor and Dr Barry Varcoe), the book also provides practical case studies and evidence-based insights. *Re:Align* offers both a thoughtful and compelling message as well as an effective toolkit to help leaders everywhere to overcome disruption and improve enterprise performance.

It is an effective guide to planning and implementing design projects to ensure strategic anchoring of the process and outcome. Doughnut Economics Kate Raworth, 2017-02-23 *The Sunday Times Bestseller *A Financial Times Book of the Year *A Forbes Book of the Year *Winner of the Transmission Prize 2018 *Longlisted for the FT/McKinsey Business Book of the Year Award 2017 *Porchlight "Best Business Book of 2017: Current Events & Public Affairs" The book that redefines economics for a world in crisis. Economics is the mother tongue of public policy. It dominates our decision-making for the future, guides multi-billion-dollar investments, and shapes our responses to climate change, inequality, and other environmental and social challenges that define our times. Pity then, or more like disaster, that its fundamental ideas are centuries out of date yet are still taught in college courses worldwide and still used to address critical issues in government and business alike. That's why it is time, says renegade economist Kate Raworth, to revise our economic

thinking for the 21st century. In *Doughnut Economics*, she sets out seven key ways to fundamentally reframe our understanding of what economics is and does. Along the way, she points out how we can break our addiction to growth; redesign money, finance, and business to be in service to people; and create economies that are regenerative and distributive by design. Named after the now-iconic “doughnut” image that Raworth first drew to depict a sweet spot of human prosperity (an image that appealed to the Occupy Movement, the United Nations, eco-activists, and business leaders alike), *Doughnut Economics* offers a radically new compass for guiding global development, government policy, and corporate strategy, and sets new standards for what economic success looks like. Raworth handpicks the best emergent ideas—from ecological, behavioral, feminist, and institutional economics to complexity thinking and Earth-systems science—to address this question: How can we turn economies that need to grow, whether or not they make us thrive, into economies that make us thrive, whether or not they grow? Simple, playful, and eloquent, *Doughnut Economics* offers game-changing analysis and inspiration for a new generation of economic thinkers. This is sharp, significant scholarship . . . Thrilling.—Times Higher Education Raworth's magnum opus . . . Fascinating.—Forbes *Doughnut Economics* shows how to ensure dignity and prosperity for all people.—Huffington Post

The Charge Brendon Burchard, 2012-05-15 From the author of the #1 New York Times bestseller *The Millionaire Messenger*, an electrifying book that provides the keys to motivation to satisfy the most essential creative and intellectual needs.

Focal Point Jenny Qi, 2021-10-13 Winner of the 2020 Steel Toe Books Poetry Award, *Focal Point* is a scientist's unofficial dissertation, a daughter's faithful correspondence, and a coming-of-age story. Written largely while Jenny Qi was a young Ph.D. student conducting cancer research after her beloved mother's death from cancer, the collection turns to all the rituals of all the

faiths, invoking Western and Eastern mythology and history, metaphors from cell biology, and even Jimi Hendrix, as Qi searches for a container to hold grief. The opening poem of this debut collection primes us to consider all definitions of the titular focal point, as the speaker evaluates this moment of early loss beneath a literal and metaphoric microscope. Here, the past and future converge, but from here, what does divergence look like? What can a scientific mind do except interrogate and attempt to measure the unknown and immeasurable? These poems, at once tender and suffused with wry humor, diverse in form and scope, go on to navigate illness, early relationships, racism, climate change, mass shootings, and the COVID-19 pandemic, unflinching in the face of death and the darker side of human nature. At its core, *Focal Point* is an uncompromising interrogation of how to be alive in the world, always loving something that has been or is in the process of being lost.

Transmedia Narratives for Cultural Heritage Nicole Basaraba, 2022-04-21 Transmedia Narratives for Cultural Heritage focuses on theoretical approaches to the analysis and creative practice of developing non-fiction digital transmedia narratives in the rapidly growing cultural heritage sector. This book applies a media-focused transdisciplinary approach to understand the conventions of emerging digital narrative genres. Considering digital media's impact on narrative creation and reception, the approach, namely remixed transmedia, can aid practitioners in creating strategic non-fiction narratives for cultural heritage. These creations also need to be evaluated and a digital-media focused 'ludonarrative toolkit' allows for the critical analysis of the composition and public participation in interactive digital narratives. This toolkit is applied and exemplified in genres including virtual museums, serious games, and interactive documentaries. The book also includes a seven-phase theoretical framework that can assist future creators (and project managers) of non-fiction transmedia 'mothership' narratives; and a methodology (based on 'big data analysis') for how to invent new cultural heritage narratives through bottom-up remixing that allows for public inclusion. Two transnational case studies on the 11 UNESCO World Heritage Australian Convict Sites and the Irish National Famine Way demonstrate the seven-phase framework's applicability. As many scholars across disciplines are increasingly creating digital narratives on historical topics for public consumption in various forms, the theoretical foundations and practical project management framework will be useful for scholars and project teams in the domains of transmedia studies,

interactive narratives, cultural heritage, media studies, comparative literature, and journalism.
