Blue Ocean Strategy with Harvard Business Review Classic Article "Blue Ocean Leadership" (2 Books) W. Chan Kim, Renée A. Mauborgne, 2017-06-27 Chart a path to creating uncontested market space and winning the future. This collection of work by globally preeminent management thinkers W. Chan Kim and Renée Mauborgne brings together their perennial bestseller book *Blue Ocean Strategy* with their classic article "Blue Ocean Leadership." *Blue Ocean Strategy*, the global phenomenon that has sold over 4 million copies and is recognized as one of the most iconic and impactful strategy books ever written, argues that cutthroat competition results in nothing but a bloody red ocean of rivals fighting over a shrinking profit pool. Based on a study of 150 strategic moves (spanning more than 100 years across 30 industries), Kim and Mauborgne argue that lasting success comes not from battling competitors but from creating "blue oceans"—untapped new market spaces ripe for growth. The book presents a systematic approach to making competition irrelevant and outlines principles and tools any organization can use to create and capture their own blue oceans. In the article "Blue Ocean Leadership," the authors apply their concepts and tools to what is perhaps the greatest challenge of leadership: closing the gulf between the potential and realized talent and energy of employees. The authors offer a systematic method for uncovering, at every level of the organization, which leadership acts and activities will inspire employees to give it their all and a process for getting managers throughout the company to undertake these tasks.

The authors provide a framework for avoiding spaces where competition is bloody (red oceans) and moving to blue ocean spaces with ample potential.

Blue Ocean Leadership (Harvard Business Review Classics) W. Chan Kim, Renée A. Mauborgne, 2017-05-30 Ten years ago, world-renowned professors W. Chan Kim and Renee Mauborgne broke ground by introducing blue ocean strategy, a new model for discovering uncontested markets that are ripe for growth. In this bound version of their bestselling Harvard Business Review classic article, they apply their concepts and tools to what is perhaps the greatest challenge of leadership: closing the gulf between the potential and the realized talent and energy of employees. Research indicates that this gulf is vast: According to Gallup, 70% of workers are disengaged from their jobs. If companies could find a way to convert them into engaged employees, the results could be transformative. The trouble is, managers lack a clear understanding of what changes they could make to bring out the best in everyone. In this article, Kim and Mauborgne offer a solution to that problem: a systematic approach to uncovering, at each level of the organization, which leadership acts and activities will inspire employees to give their all, and a process for getting managers throughout the company to start doing them. Blue ocean leadership works because the managers' customers—that is, the people managers oversee and report to—are involved in identifying what's effective and what isn't. Moreover, the approach doesn't require leaders to alter who they are, just to undertake a different set of tasks. And that kind of change is much easier to implement and track than changes to values and mind-sets. The Harvard Business Review Classics series offers you the opportunity to make seminal Harvard Business Review articles a part of your permanent management library. Each highly readable volume contains a groundbreaking idea that continues to shape best practices and inspire countless managers around the world—and will have a direct impact on you today and for years to come.

Red Ocean Traps (Harvard Business Review Classics) W. Chan Kim, Renée A. Mauborgne, 2017-05-30 As established markets become less profitable, companies increasingly need to find ways to create and capture new markets. Despite much investment and commitment, most firms struggle to do this. What, exactly, is getting in their way? World-renowned professors W. Chan Kim and Renee Mauborgne, the authors of the best-selling book *Blue Ocean Strategy* have spent over a decade exploring that question. They have seen that the trouble lies in managers' mental models—ingrained assumptions and theories about the way the world works. Though these models may work perfectly well in mature markets, they undermine executives' attempts to discover uncontested new spaces with ample potential (blue oceans) and keep companies firmly anchored in existing spaces where competition is bloody (red oceans). In this bound version of their bestselling Harvard Business Review classic article, they describe how to break free of these red ocean traps. To do that, managers need to: (1) Focus on attracting new customers, not pleasing current customers; (2) Worry less about segmentation and more about what different segments have in common; (3) Understand that market creation is not synonymous with either technological innovation or creative destruction; and (3) Stop focusing on premium versus low-cost strategies. The Harvard Business Review Classics series offers you the opportunity to make seminal Harvard Business Review articles a part of your permanent management library. Each highly readable volume contains a groundbreaking idea that continues to shape best practices and inspire countless managers around the world—and will have a direct impact on you today and for years to come.

Blue Ocean Strategy Andreas Mebert, Stephanie Lowe, 2017-07-05 In *Blue Ocean Strategy*, W. Chan Kim and Renée Mauborgne tackle the central problem facing all businesses: how to perform better than your competitors? Their solution involves taking a creative approach to the normal view of competition. In the normal framework, competition is a zero-sum game: if there are two companies competing for the same market, as one does better, the other has to do worse. The authors' creative leap is to suggest one can beat the competition by not competing. Companies should avoid confronting competitors in crowded marketplaces, what they call "red oceans," and instead seek out new markets, or "blue oceans." Once the blue oceans have been identified, companies can get down to the task of creating unique products which exploit that market. Chan and Mauborgne argue, for example, that a wine company might decide to start appealing to a group previously uninterested in wine. This would be a "blue ocean" market, giving the winemaker a huge advantage, which they could exploit by creating a wine that appealed to the tastes of a beer-drinking demographic. A classic of business writing, *Blue Ocean Strategy* is creative thinking and problem solving at its best.

Good Strategy Bad Strategy Richard Rumelt, 2011-07-19 *Good Strategy/Bad Strategy* clarifies the muddled thinking underlying too many strategies and provides a clear way to create and implement a powerful action-oriented strategy for the real world. Developing and implementing a strategy is the central task of a leader. A good strategy is a specific and coherent response to--and approach for--overcoming the obstacles to progress. A good strategy works by harnessing and applying power where it will have the greatest effect. Yet, Rumelt shows that there has been a growing and unfortunate tendency to equate Mom-and-apple-pie values, fluffy packages of buzzwords, motivational slogans, and financial goals with "strategy." In *Good Strategy/Bad Strategy*, he debunks these elements of "bad strategy" and awakens an understanding of the power of a "good strategy." He introduces nine sources of power--ranging from using leverage to effectively focusing on growth--that are eye-opening yet pragmatic tools that can easily be put to work on Monday morning, and uses fascinating examples from business, nonprofit, and military affairs to bring its original and pragmatic ideas to life. The detailed examples range from Apple to General Motors, from the two Iraq wars to Afghanistan, from a small local market to Wal-Mart, from Nvidia to Silicon Graphics, from the Getty Trust to the Los Angeles Unified School District, from Cisco Systems to Paccar, and from Global Crossing to the 2007-08 financial crisis. Reflecting an astonishing grasp and integration of economics, finance, technology, history, and the brilliance and foibles of the human character, *Good Strategy/Bad Strategy* stems from Rumelt's decades of digging beyond the superficial to address hard questions with honesty and integrity.
