Algorithms, Complexity Analysis and VLSI Architectures for MPEG-4 Motion Estimation Peter M. Kuhn,2013-06-29 MPEG-4 is the multimedia standard for combining interactivity, natural and synthetic digital video, audio and computer-graphics. Typical applications are: internet, video conferencing, mobile videophones, multimedia cooperative work, teleteaching and games. With MPEG-4 the next step from block-based video (ISO/IEC MPEG-1, MPEG-2, CCITT H.261, ITU-T H.263) to arbitrarily-shaped visual objects is taken. This significant step demands a new methodology for system analysis and design to meet the considerably higher flexibility of MPEG-4. Motion estimation is a central part of MPEG-1/2/4 and H.261/H.263 video compression standards and has attracted much attention in research and industry, for the following reasons: it is computationally the most demanding algorithm of a video encoder (about 60-80% of the total computation time), it has a high impact on the visual quality of a video encoder, and it is not standardized, thus being open to competition. Algorithms, Complexity Analysis, and VLSI Architectures for MPEG-4 Motion Estimation covers in detail every single step in the design of a MPEG-1/2/4 or H.261/H.263 compliant video encoder: Fast motion estimation algorithms Complexity analysis tools Detailed complexity analysis of a software implementation of MPEG-4 video Complexity and visual quality analysis of fast motion estimation algorithms within MPEG-4 Design space on motion estimation VLSI architectures Detailed VLSI design examples of (1) a high throughput and (2) a low-power MPEG-4 motion estimator. Algorithms, Complexity Analysis and VLSI Architectures for MPEG-4 Motion Estimation is an important introduction to numerous algorithmic, architectural and system design aspects of the multimedia standard MPEG-4. As such, all researchers, students and practitioners working in image processing, video coding or system and VLSI design will find this book of interest.

Tibetan Literature Leonard van der Kuijp,James Burnell Robinson,Paul Harrison,1996-01-01 Tibetan Literature addresses the immense variety of Tibet's literary heritage. An introductory essay by the editors attempts to assess the overall nature of 'literature' in Tibet and to understand some of the ways in which it may be analyzed into genres. The remainder of the book contains articles by nearly thirty scholars from America, Europe, and Asia—each of whom addresses an important genre of Tibetan literature. These articles are distributed among eight major rubrics: two on history and biography, six on canonical and quasi-canonical texts, four on philosophical literature, four on literature on the paths, four on ritual, four on literary arts, four on non-literary arts and sciences, and two on guidebooks and reference works.

This is the first study of the social and cultural history of Tibetan book technology that takes materials, living traditions and cross-cultural comparisons into consideration. Bringing together leading experts from different disciplines, it discusses the introduction of printing in Tibetan societies in the context of Asian book cultures with an eye to the questions raised by the study of the European history of printing. Among Tibetan Texts E. Gene Smith,2001-06-15 For three decades, E. Gene Smith ran the Library of Congress's Tibetan Text Publication Project of the United States Public Law 480 (PL480) - an effort to salvage and reprint the Tibetan literature that had been collected by the exile community or by members of the Bhotia communities of Sikkim, Bhutan, India, and Nepal. Smith wrote prefaces to these reprinted books to help clarify and contextualize the particular Tibetan texts: the prefaces served as rough orientations to a poorly understood body of foreign literature. Originally produced in print quantities of twenty, these prefaces quickly became legendary, and soon

photocopied collections were handed from scholar to scholar, achieving an almost cult status. These essays are collected here for the first time. The impact of Smith's research on the academic study of Tibetan literature has been tremendous, both for his remarkable ability to synthesize diverse materials into coherent accounts of Tibetan literature, history, and religious thought, and for the exemplary critical scholarship he brought to this field.

  The Culture of the Book in Tibet Kurtis R. Schaeffer,2009 Drawing on sources spanning the fourteenth through the eighteenth centuries, Kurtis R. Schaeffer envisions the scholars and hermits, madmen and ministers, kings and queens responsible for Tibet's massive canons. He describes how Tibetan scholars edited and printed works of religion, literature, art, and science and what this indicates about the interrelation of material and cultural practices. The Tibetan book is at once the embodiment of the Buddha's voice, a principal means of education, a source of tradition and authority, an economic product, a finely crafted aesthetic object, a medium of Buddhist written culture, and a symbol of the religion itself. A meticulous study that draws on more than 150 understudied Tibetan sources, The Culture of the Book in Tibet is the first volume to trace this singular history, allowing for a greater understanding of the Tibetan plateau.

This book is dedicated to the history, theory, and practice of Tibetan medicine, a unique and complex system of understanding body and mind, treating illness, and fostering health and well-being. Sowa Rigpa has been influenced by Chinese, Indian, and Greco-Arab medical traditions but is distinct from them. Developed within the context of Buddhism, Tibetan medicine was adapted over centuries to different health needs and climates across the region encompassing the Tibetan Plateau, the Himalayas, and Mongolia. Its focus on a holistic approach to health has influenced Western medical thinking about the prevention, diagnoses, and treatment of illness.   Aphrodite's Tortoise Lloyd Llewellyn-Jones,2003-12-31 Greek women routinely wore the veil. That is the unexpected finding of this meticulous study, one with interesting implications for the origins of Western civilisation. The Greeks, popularly (and rightly) credited with the invention of civic openness, are revealed as also part of a more Eastern tradition of seclusion. Llewellyn-Jones' work proceeds from literary and, notably, from iconographic evidence. In sculpture and vase painting it demonstrates the presence of the veil, often covering the head, but also more unobtrusively folded back onto the shoulders. This discreet fashion not only gave a priviledged view of the face to the ancient art consumer, but also, incidentally, allowed the veil to escape the notice of traditional modern scholarship. From Greek literary sources, the author shows that full veiling of the head and face was commonplace. He analyses the elaborate Greek vocabulary for veiling and explores what the veil meant to achieve. He shows that the veil was a conscious extension of the house and was often referred to as `tegidion', literally `a little roof'. Veiling was thus an ingeneous compromise; it allowed women to circulate in public while mainting the ideal of a house-bound existence. Alert to the different types of veil used, the author

uses Greek and more modern evidence (mostly from the Arab world) to show how women could exploit and subvert the veil as a means of eloquent, sometimes emotional, communication. First published in 2003 and reissued as a paperback in 2010, Llewellyn-Jones' book has established itself as a central - and inspiring - text for the study of ancient women.
